A “data revolution” for the MDGs / SDGs?

- What is big data
- The challenge
- New partnerships for new data?

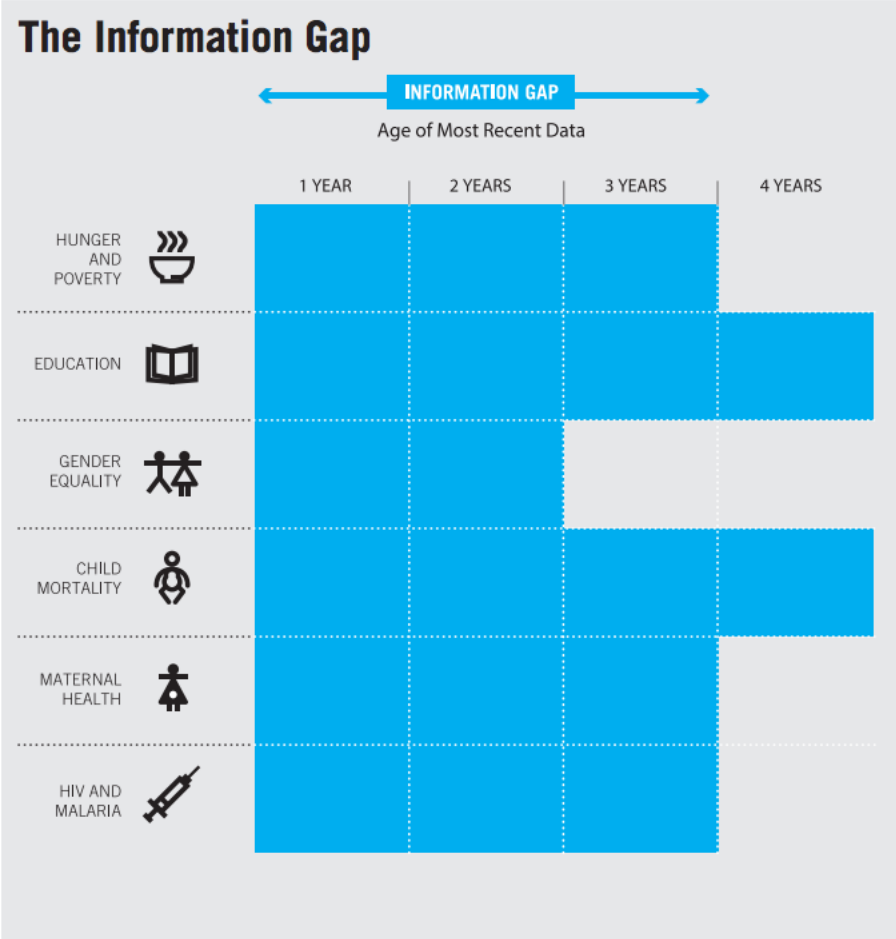
Would you cross the street based on information that is five minutes old?

GLOBAL PULSE

The MDGs data gap



Household-level data is challenging to collect on a real-time basis, making development progress difficult to track. (Source: Millennium Development Goals Report, 2011)

LIVE Singapore! project research exhibition visualizations press

The Real-Time City is Now Real!

After an initial process of data analysis from several data streams, six visualizations have been delineated that investigate different areas of interest and of relevance to the city of Singapore. The visualizations aim to provide greater understanding of some of the city's dynamics.
