

APTIAD

THE ASIA-PACIFIC TRADE AND INVESTMENT AGREEMENTS DATABASE

Your gateway to information on Preferential Trade Agreements of Asia-Pacific economies

In order to provide a useful tool for policy-makers and researchers to monitor and analyze the development of trade agreements, ESCAP maintains an online database, known as the **Asia-Pacific Trade and Investment Agreements Database** or **APTIAD** and available at: artnet.unescap.org/databases.html. It comprises three platforms: the Trade Agreements Database (TAD); a Glossary and Briefing Notes.

The **Trade Agreements Database** platform provides detailed descriptive and updated information on the provisions of regional trade agreements (RTAs) / bilateral trade agreements (BTAs) involving one or more members from the Asia-Pacific region that are either signed, in force or under negotiations. By December 2013 there were 223 such agreements, including those agreements that have not been notified to the WTO but for which there is official information readily available, and also those agreements under negotiation for which there has been at least a first formal negotiation round.

The online database allows searches in two ways. One relates to the agreements themselves where users can search by titles, members, key terms, types and by scopes of agreements and their status. Another one is the possibility to search publications relevant to regional integration and trade agreements.

For easier use of the database, users can download a **Glossary** of related terms. The **Briefing Notes** are issued occasionally and discuss emerging issues and contemporary trends in trade integration.
