

Capacity Building Training on Establishment of Geo-portal for DRM and Geospatial Data Management for Disaster Risk Reduction

3 - 7 March 2014, Suva, Fiji

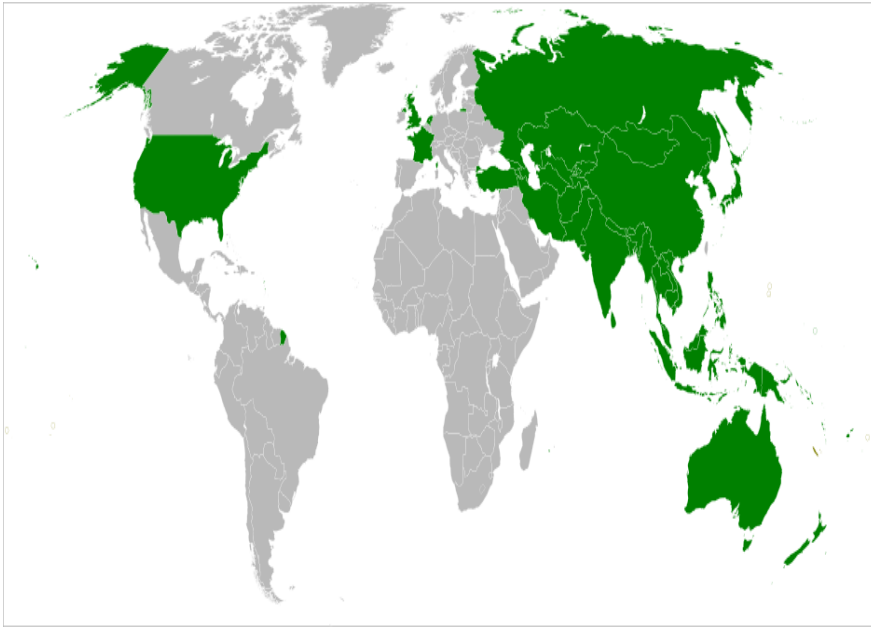

Tae Hyung KIM
ICT and Disaster Risk Reduction Division (IDD)
UNESCAP

Contents

- I. Introduction**
- II. Who is ESCAP?**
- III. What is ESCAP doing?**
- IV. Background**
- V. Objectives of the Training**
- VI. Structure of the Training**

Who is ESCAP?

1. UN Economic and Social Commission for Asia and the Pacific
2. UN regional norm-setting organization
3. Inter-disciplinary approaches
4. Hold strong capacity building mechanism
5. Wide networks with regional policy makers and agencies

What is ESCAP Doing?

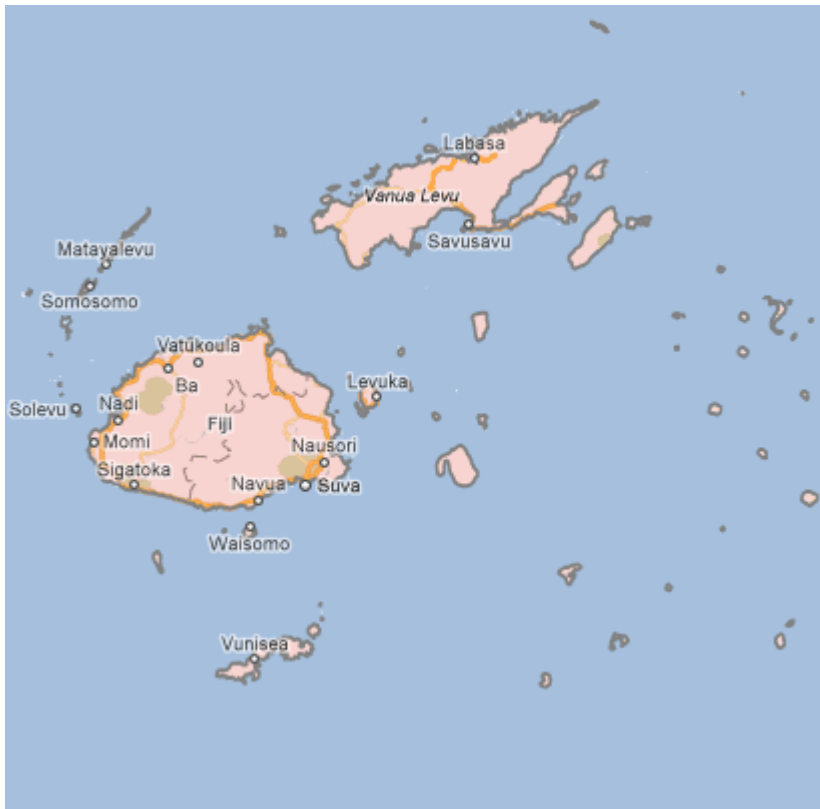

1. Policy Dialogues -
Regional agenda
setting
2. Capacity Building
3. Analytical Work –
Innovative policy
options
4. Researches

Key Initiatives and Directions

1. Resolutions
2. Geo-portal for disaster risk reduction
3. Capacity building for geospatial data management
4. Regional cooperative mechanisms for early warning and monitoring

Background: Recent Disasters in Fiji

- December 2012: Tropical cyclone Evan; 39101 people affected
- March 2012: Flooding in the Western Division; 14984 people affected
- January 2012: Flooding in Ba, Lautoka, Nadi, and Nadrog; 4561 people affected
- March 2010: Tropical cyclone Tomas; 39101 people affected

Background: Why?

- Lack of prediction
- Relief rather than mitigation and preparedness
- Space technologies and GIS applications
