Scheme of Presentation

- History and basic features of automated system
- Cost of development
- Performance vis-à-vis previous semi automated system
- Single Widow introduction in Pakistan
- Stages achieved so far
- What's remaining to be done
- Regional connectivity – Initiatives taken
- Lessons learnt

Genesis & Evolution of Technology

1981-83	Appraiser Guidance System; Statistical Report System; Batch Data Entry System
1992	On-line Transaction Processing System (OLTP)
2004	Implementation of One Customs System
2005	Roll Out of PaCCS at KICT, PICT and QICT
2009	Development of WeBOC at Islamabad Airport
2011	Pilot run at Port Qasim
2012	Roll Out of WeBOC Karachi
2013	Country-wide Roll Out

Basic Features Of WeBOC

- Paperless system – rolled out in 2012 (Karachi) 2013 (whole country)
- On-line -- manifest filing (ships) & goods declaration filing (traders)
24/7
- Online payments (through PD account)
- All custom processes performed on-line by customs staff
- Assessment based on examination reports and images uploaded
- Risk Management System (Green, Yellow, Red channels)
- Inspection/Examination of goods reduced from 100% to 30%

Basic Features Of WeBOC

- First-in, First-out (FIFO)
- Online adjudication process
- Complete log of all activities -- strict controls
- Communication with custodian of goods through EDI
- Transparency and less cost of doing business
- Minimize Dwell Time

Cost of Development

- M/s Agility demanded more than 100-150 million dollars (Rs 10 billion) for paperless software 'PACCS'
- WeBOC developed indigenously --- One million dollars (Rs 10 crore) --
- Developed by:
 - Officers of Pakistan Customs; and
 - M/s Pakistan Revenue Automation Limited (PRAL) – IT company owned by FBR

PRE-WEBOC PAPER BASED SYSTEM

**34 signatures and 62 verifications
on every GD**

**Customs documents had to be
carried from desk to desk**
