

Deutsche Post DHL Inhouse Consulting Asia Pacific

Enhancing International Trade Logistics for Inclusive Development

An Inside-out Perspective from the Logistics Industry

Asia Pacific Trade Facilitation Forum, Beijing, 10th September 2013

Stephen Fung

Associate Partner, Head of North Asia, Deutsche Post DHL Inhouse Consulting

Importance of Efficient Supply Chains in International Trade

If all countries reduce Supply Chain barriers halfway, global GDP would rise by 4.7% and global trade by 14.5%¹⁾

Japan Tsunami and Impact on Global Supply Chains...

- GDP of Japan decreased by 0.5%²⁾
- Toyota lost its #1 position to GM³⁾
- Sony had to shut down production at five of its plants

Supply Management to achieve Competitive Edge...

- Fire in Phillips factory that provided 40% components to Nokia & Ericsson
- Ericsson waited for Phillips disaster response; its production stalled due to lack of components
- Nokia signed contracts with other component suppliers

Increasing Global Interconnectedness...

- Obama: “Labor cost differential between US and China per iPhone is \$65 only⁴⁾. Bring jobs back to US”
- Jobs: “Those jobs are not coming back, because it’s a lot more about international Supply Chain and capabilities than just labor cost”

Source: DPDHL Inhouse Consulting Analysis; 1) World Economic Forum; 2) HIS Global; 3) “Lean & Resilient” – DHL Automotive Research Paper; 4) 300m iPhone devices * US\$65 = US\$19.5bn in labor value gained by Apple since 2007

Increasing Importance of Less Developed Countries in International Trade

Asia forms the locus around which three key trade triangles have emerged; these are expected to account for around 40% of global trade by 2028
