

Energy Transition Pathways for the 2030 Agenda SDG 7 Roadmap for Indonesia

The shaded areas of the map indicate ESCAP members and associate members.¹

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations regional hub promoting cooperation among countries to achieve inclusive and sustainable development. The largest regional intergovernmental platform with 53 Member States and 9 Associate Members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development, which it does by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. ESCAP research and analysis coupled with its policy advisory services, capacity building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

Acknowledgements

The preparation of this report was led by the Energy Division of the Economic and Social Commission for Asia and the Pacific (ESCAP) in collaboration with the National Energy Council (NEC), Indonesia and the Ministry of National Development Planning (BAPPENAS), Indonesia.

The principal authors and contributors of the report were Anis Zaman, Saif Saahil and Charlotte Yong. Significant contributions to the overall work were from Dr Saleh Abdurrahman, senior energy and environmental specialist at the Ministry of Energy and Mineral Resources (ESDM); Dr. Yahya Rachmana Hidayat, Director of Energy Resources, Mineral, and Mining Ministry of National Development Planning, Bappenas; Mr Sugeng Mujiyanto, Head of Energy Policy Bureau, Secretariate General of National Energy Council of Indonesia; Mr Setyo Budiantoro, SDGs Manager of Economic Development Pillar, SDGs Secretariat of BAPPENAS; Mr Budi Cahyono, Secretary General's Office, National Energy Council; and Hakimul Batih, Executive Director, Indonesia Institute for Energy Economics (IIEE).

The review and valuable suggestions were provided by Hongpeng Liu, Director of the Energy Division, ESCAP, Michael Williamson, Section Chief of the Energy Division, ESCAP.

Peer reviews were conducted by Dr Nuki Agya Utama, Executive Director, ASEAN Center for Energy; Dr Yongping Zhai, Chief, Energy Sector Group, Asian Development Bank; Dr Saleh Abdurrahman, Senior Energy and Environmental Specialist, Ministry of Energy and Mineral Resources, Indonesia; Dr. Kee-Yung Nam, Principal Energy Economist, Sustainable Development and Climate Change Department, Asian Development Bank; Dr Xedu Lu, Lead Climate Change Specialist, East Asia Department, Asian Development Bank; Dr Yufeng Yang, Honorary Research Fellow, Imperial College London; and Dr Wenji Zhou, Research Scholar at the Energy Program, International Institute for Applied System Analysis (IIASA). Financial support was provided by Energy Foundation China (EFC).

Robert Oliver edited the manuscript. The cover and design layout were created by Xiao Dong.

Administrative and secretariat support was provided by Prachakporn Sophon, Sarinna Sunkphayung, Nawaporn Sunkpho and Thiraya Tangkawattana.

Abbreviations and acronyms	vi
Executive summary	vii
A. Highlights of the roadmap.....	vii
B. Achieving Indonesia's SDG 7 and NDC targets by 2030.....	viii
C. Important policy directions	x
1. Introduction	1
1.1 Background	1
1.2 SDG 7 targets and indicators	1
1.3 Nationally Determined Contributions.....	1
2. NEXSTEP methodology	2
2.1. Key methodological steps	3
2.2. Scenario definitions	4
2.3. Economic analysis	5
2.3.1. Basics of economic analysis.....	5
2.3.2. Cost parameters	5
2.4. Scenario Analysis.....	5
3. Overview of the Indonesia's energy sector	6
3.1. Current situation.....	7
3.2. National energy profile.....	8
3.3. National energy policies and targets	8
3.4. National energy resources.....	9
3.5. National energy balance	10
3.6. Energy Demand Outlook	10
3.6.1. Business as usual scenario.....	10
3.6.2. Current policy scenario.....	11
3.7. Electric Power Generation Outlook	12
3.7.1. Business as usual scenario.....	12
3.7.2. Current policy scenario	12
3.8. Energy Supply Outlook.....	13
3.8.1. Business as usual scenario.....	13
3.8.2. Current policy scenario	13

3.9. Energy Sector Emissions Outlook.....	14
3.9.1. Business as usual scenario.....	14
3.9.2. Current policy scenario.....	14
4. SDG scenario – achieving SDG 7 by 2030	16
4.1. SDG 7 targets	17
4.1.1. SDG 7.1.1. Access to electricity	17
4.1.2. SDG 7.1.2. Access to clean fuels and technologies for cooking	17
4.1.3. SDG 7.2. Renewable energy	18
4.1.4. SDG 7.3. Energy efficiency	18
4.1.5. NDC unconditional target.....	19
4.2. Power generation in the context of SDG 7.....	20
4.3. Policy actions for achieving SDG 7	22
4.3.1. Decentralized renewable energy for rural electrification.....	22
4.3.2. Identifying cost-effective options to achieve universal access to clean cooking.....	22
4.3.3. Energy efficiency improvement offers significant cost-saving	23
4.3.4. Multi-sectoral approach needed to achieve the renewable energy target.....	24
4.3.5. Investment in the power sector is needed for the energy transition	24
4.3.6. Net benefits in the power sector.....	25
4.3.7. Renewables are cheaper than fossil fuel.....	26
5. Energy transition pathways with increased ambitions	28
5.1. Scenario ranking.....	30
5.2. Raising ambition – enhancing the NDC target and achieving SDG 7.....	32
5.3. No new investment in coal-based power generation.....	32
5.3.1. Carbon capture and storage for coal-fired power plants in Indonesia.....	33
5.4. Putting a price on carbon will help to reduce investment gap	33
5.5. Phasing out the fossil fuel subsidy will level the playing field for renewables	34
5.6. Green financing	34
5.7. A holistic approach to reducing the investment gap	35
5.8. Improving energy efficiency beyond the SDG 7 target.....	36
5.9. Marginal abatement cost curve	36
6. Rebuilding better in the recovery from COVID-19 with the SDG 7 roadmap	38
6.1. Accelerating access to clean and modern energy services.....	40
6.2. Reducing financial risks by reshaping the power sector	40
6.3. Savings from the energy sector will help to build other sectors.....	41
6.4. Restructuring fiscal measures to invest where it is needed the most.....	41
7. Revisiting existing policies	42
8. Conclusion	46
References	48

Annexes	49
I. National Expert SDG 7 Tool for Energy Planning Methodology	49
II. Key assumptions.....	50
III. Economic analysis data.....	52
IV. Power generation, by scenario	54
V. Summary of scenarios.....	55
VI. Limitations of NEXSTEP	66
VII. Indonesia RUPTL 2019 – 2028 Planned Capacity Addition	66
VIII. Stock-Turnover Analysis	67
IX. Indonesia energy balance 2018	72
