

Expert Group Meeting on Modernizing the GASI

Quarantine and Inspection Services through the use of ICT

QIA

Seiki Jun(seiki@korea.kr)

July 4 2012

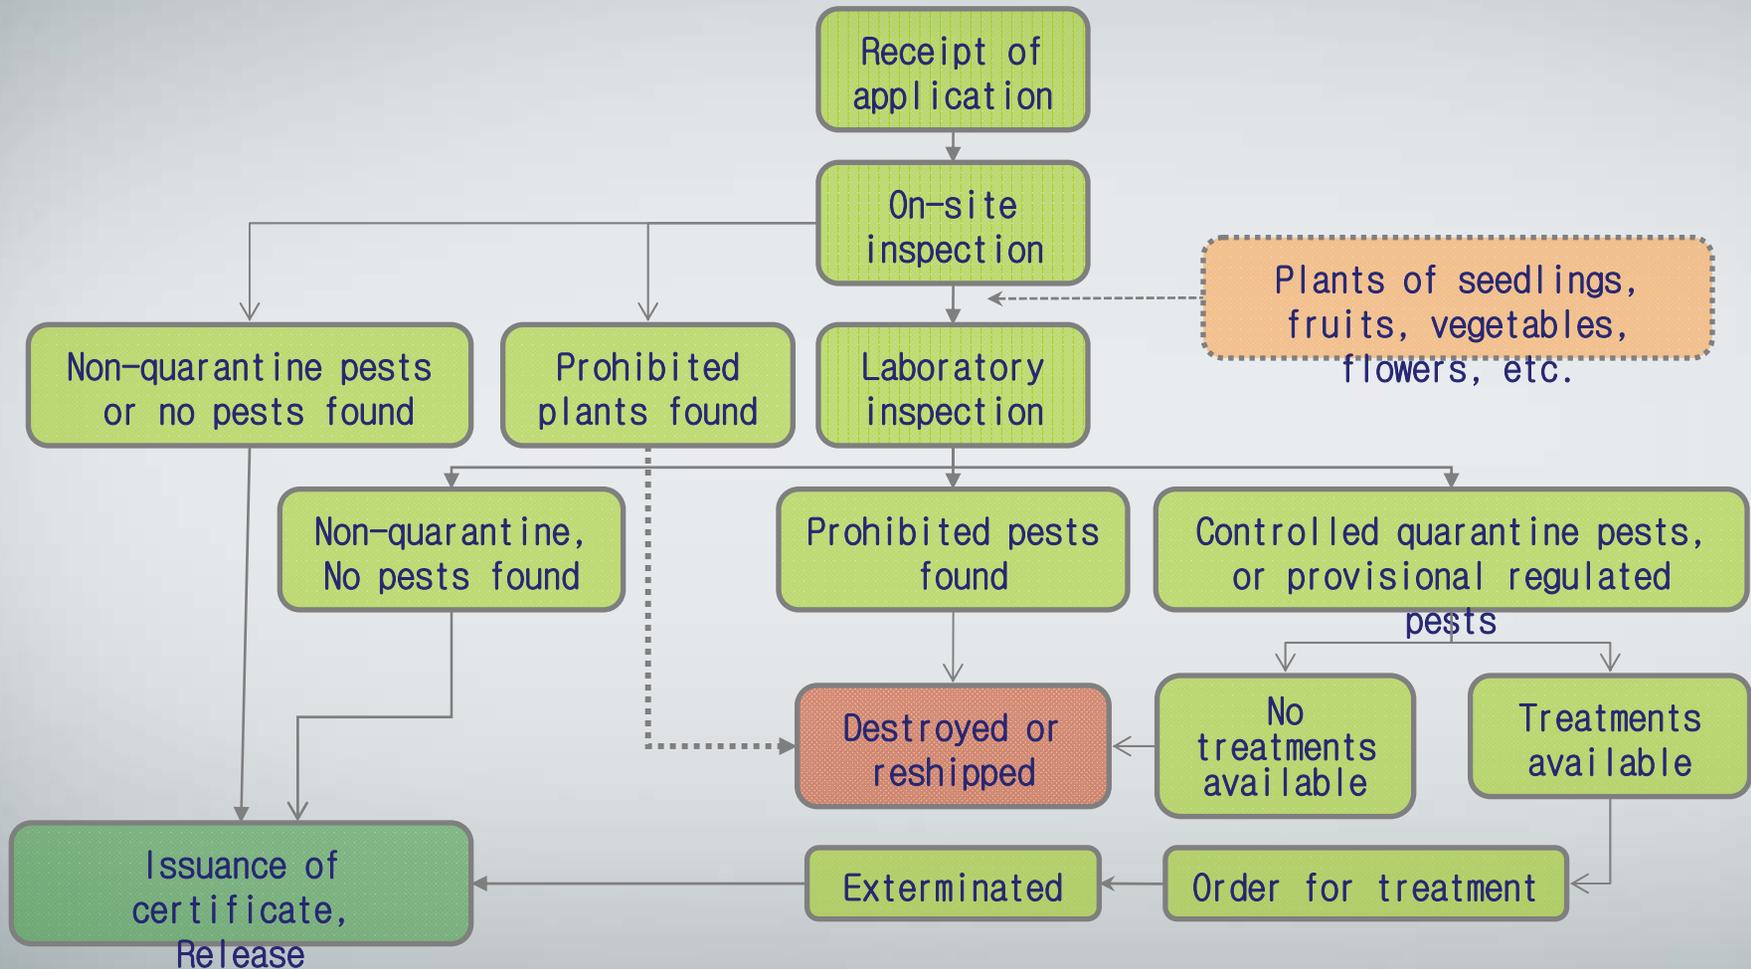

CONTENTS

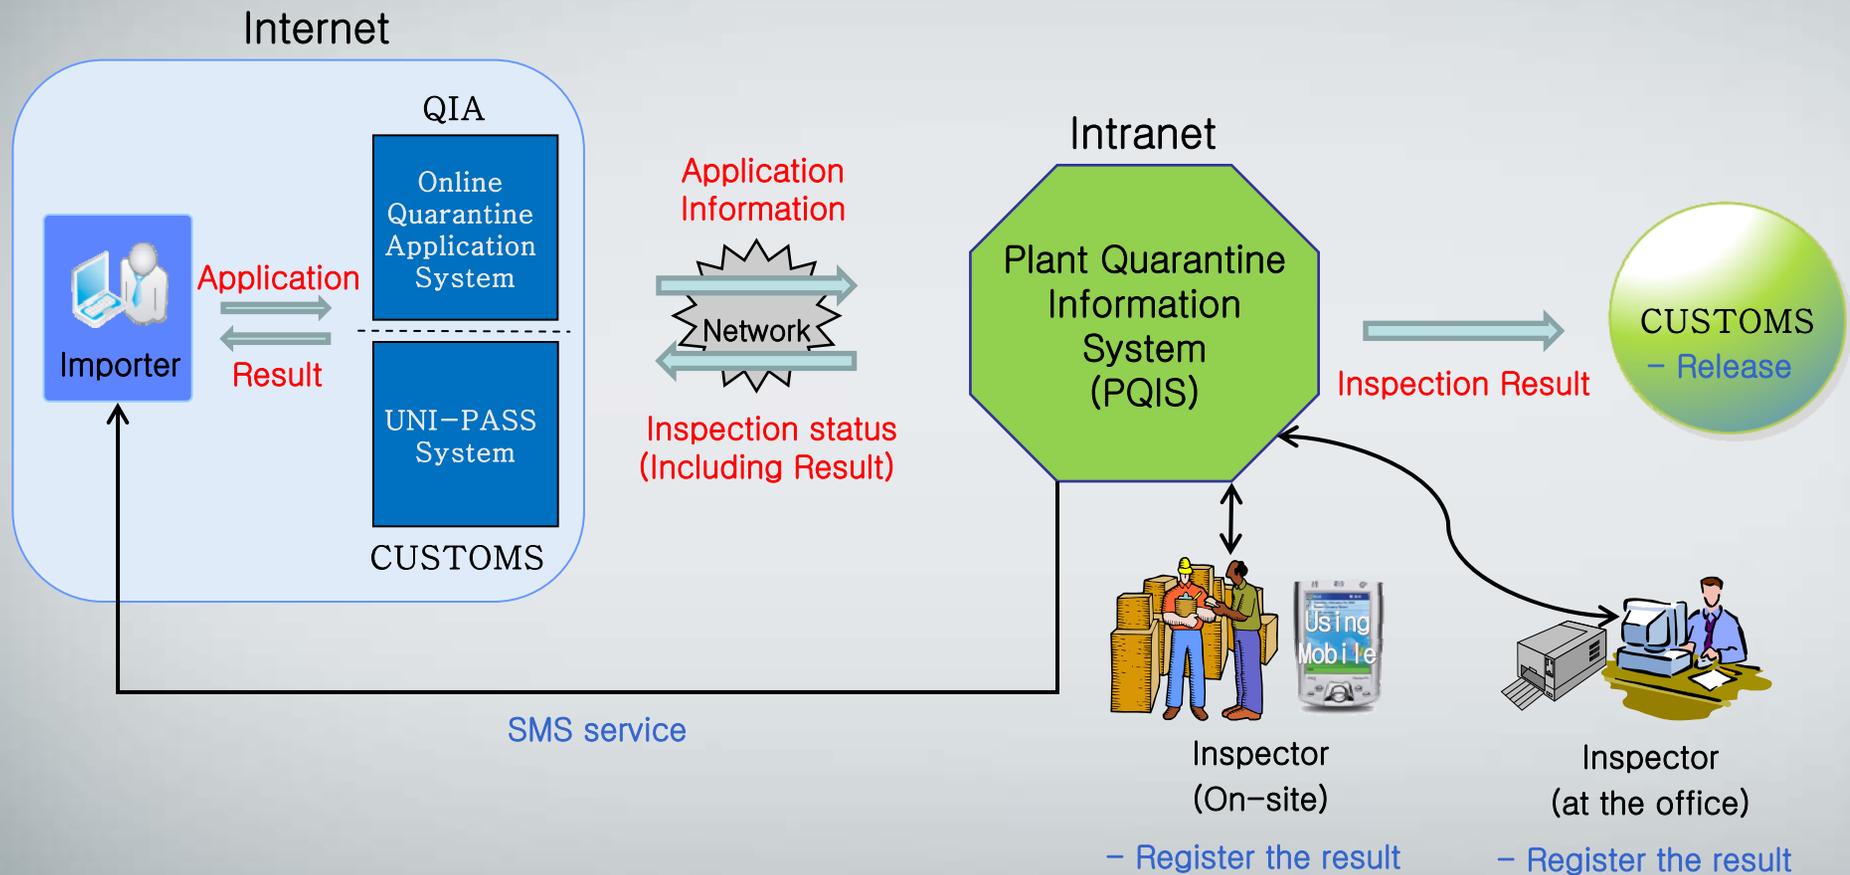

- 1 Quarantine and Inspection services for Import**
- 2 Quarantine and Inspection services for Export**
- 3 Electronic Certification(E-cert)**

Procedure of imported plant inspection

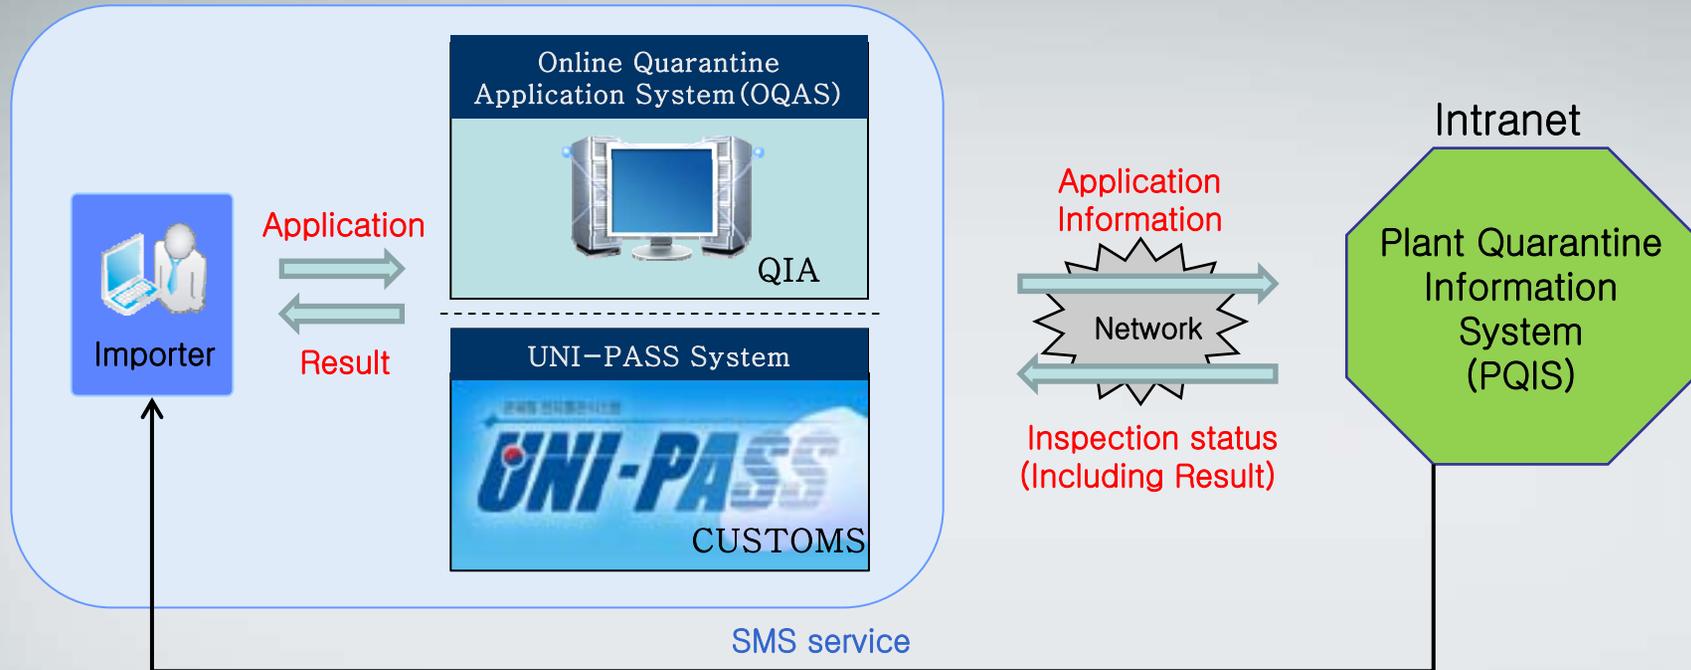

Data flow of imported plant inspection

- Online Application System

Internet-based

Enable importers to submit the inspection application and check the inspection status through the Online Quarantine Application System or UNI-PASS System.

- ✓ Importers have two options to submit the application via the internet.
 - OQAS made by QIA or UNI-PASS System made by Korea Customs Service
- ✓ They can check the inspection status by themselves on the websites.
 - Confirmation of acceptance, Disinfection, Inspection result (Approval, Destroyed, etc.)

- E-approval

Inspectors are given authority for approval using a mobile phone at the site.

- ✓ Inspectors can approve the plant products and can send the result to Customs with their mobile at the same time.
 - Importers can receive the result through the website or Short Message Service.
- ✓ It simplifies approval process and reduces processing time.
 - Importers don't need to receive the import certificate, a hard-copy, for customs procedure.
