

Strengthening capacity for operationalizing sustainable transport connectivity along the China-Central Asia-West Asia Economic Corridor to achieve the 2030 Agenda

Study Report 2022

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations regional hub promoting cooperation among countries to achieve inclusive and sustainable development. As the largest regional intergovernmental platform with 53 member States and 9 associate members, ESCAP has emerged as a strong regional think-tank, offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. The research and analysis of ESCAP coupled with its policy advisory services, capacity-building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

The views expressed in this publication are those of the authors and do not necessarily reflect the views of the United Nations Secretariat. The opinions, figures and estimates set forth in this publication are the responsibility of the authors and should not necessarily be considered as reflecting the views or carrying the endorsement of the United Nations.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Mention of firm names and commercial products does not imply the endorsement of the United Nations.

The present publication was prepared by the Transport Division of ESCAP under the overall guidance of Ms. Azhar Jaimurzina Ducrest, Transport Connectivity and Logistics Section Chief and led by Mr. Edouard Chong, with contributions from Mr. Fedor Kormilitsyn and Mr. Changju Lee, Economic Affairs Officers, Transport Division. Core authors comprised of (alphabetical order): Dr. Christoph Nedopil, Dr. Varvara Krechetova and Dr. Vladimir Kryuchkov.

Grateful acknowledgment is made to the Government of China for the generous funding of this study.

CONTENTS

Contents	3
List of tables	5
List of figures.....	5
List of abbreviations	7
Introduction	9
Chapter I China – Central Asia – West Asia Economic Corridor.....	11
I.1 Overview	11
I.2 CCWA Economic Corridor: existing operational challenges and non-physical barriers	18
I.2.1 Railway operational challenges and non-physical barriers	18
I.2.2 Road operational challenges and non-physical barriers.....	19
I.2.3 Border crossings.....	23
I.3 CCWA Economic Corridor: transport assets of countries.....	25
I.3.1 Railways.....	25
I.3.2 Roads.....	33
I.3.3 Key nodes.....	37
I.4 Impact of COVID-19 pandemic	41
I.4.1 COVID-19 pandemic situation.....	41
I.4.2 COVID-19 pandemic related measures for freight transport at the borders along the CCWA Economic corridor.....	44
I.4.3 COVID-19 impact on transport volumes and foreign trade in the countries along the CCWA Economic corridor.....	50
Chapter II Improving connectivity in the CCWA and beyond.....	53
II.1 Green infrastructure development.....	53
II.2 Sustainable infrastructure finance	57
II.3 An indicator set to measure sustainable infrastructure connectivity in the CCWA and beyond	58
II.4 Policy recommendations for sustainable connectivity along the CCWA Economic Corridor	64
Chapter III Connectivity on Smart Transport Systems	71
III.1 Smart Transport Systems with the CCWA Economic Corridor.....	71
III.2 Exploration of Representative Smart Transport Applications.....	72
III.3 Smart Transport Systems in Target Countries along the CCWA Economic Corridor	77
III.4 Analytical Findings on Smart Transport Systems along the CCWA Economic Corridor ...	107
III.4.1 Current status of smart transport systems across target countries	107
III.4.2 Future plans of smart transport systems for the next 10 years across target countries	110
III.4.3 Main benefits and challenges from smart transport systems in target countries	113
III.4.4 Examination of smart transport systems in priority corridors	114
III.4.5 Analysis of smart transport systems for cross-border movements	115
III.4.6 Major lessons learned for formulating policy recommendations	122
III.5 Chapter Conclusions.....	125
Conclusions	129

Annexes 132

Annex I Statistical data	132
Annex II Connectivity updates on the CCWA countries	138
Annex III Transport related agreements across CCWA Economic Corridor	156
References	159

LIST OF TABLES

Table 1 Economic data of the CCWA economies, 2018	11
Table 2 Corridors relevant for CCWA countries	15
