

Energy Transition Pathways for the 2030 Agenda

Sustainable Energy Transition Road Map for Surat Thani Province, Thailand

Energy Transition Pathways for the 2030 Agenda

Sustainable Energy Transition Road Map for Surat Thani Province, Thailand

**Developed using National Expert SDG7
Tool for Energy Planning (NEXSTEP)**

*The shaded areas of the map indicate ESCAP members and associate members.**

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations' regional hub, promoting cooperation among countries to achieve inclusive and sustainable development. The largest regional intergovernmental platform with 53 member States and 9 associate members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development, which it does by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. The research and analysis undertaken by ESCAP, coupled with its policy advisory services, capacity building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

Contents

Acknowledgements	v
Foreword	vi
Abbreviations and acronyms	ix
Executive Summary	x
A. Highlights of the roadmap.....	x
B. Aligning Surat Thani province's energy transition pathway with the SDG 7 targets and national commitments.....	xi
C. Key policy recommendations.....	xii
บทสรุปผู้บริหาร	xiii
แนวทางการปรับเปลี่ยนสู่การใช้พลังงานสะอาดอย่างยั่งยืน.....	xiii
การเชื่อมโยงแนวทางการปรับเปลี่ยนสู่การใช้พลังงานสะอาดอย่างยั่งยืนของจังหวัดสุราษฎร์ธานีเข้ากับเป้าหมายการพัฒนาอย่างยั่งยืนในข้อที่ 7 และเป้าหมายการพัฒนาประเทศ.....	xiv
ข้อเสนอแนะเชิงนโยบาย.....	xv
1. Introduction	1
1.1. Background	2
1.2. SDG 7 targets and indicators	2
2. NEXSTEP methodology	3
2.1. Key methodological steps	4
2.2. Scenario definitions	5
2.3. Economic analysis	5
2.3.1. Basics of economic analysis.....	6
2.3.2. Cost parameters	6
2.3.3. Scenario analysis	6
3. Overview of Surat Thani province's energy sector	7
3.1. Overview of Surat Thani province	9
3.2. Provincial energy profile	9
3.3. Provincial energy balance, 2018	10
3.4. Energy modelling projections.....	11
3.5. Energy policies and targets	12
3.6. Surat Thani's energy system projections in the current policy settings	13

3.6.1. Energy demand outlook	14
3.6.2. Electricity generation outlook.....	16
3.6.3. Energy supply outlook.....	17
3.6.4. Energy sector emissions outlook.....	18

4. SET scenario – sustainable energy transition pathway for Surat Thani province **19**

4.1. SET energy demand outlook	21
4.2. progress towards main sustainable energy indicators.....	22
4.2.1. Access to modern energy	22
4.2.2. Renewable energy	22
4.2.3. Energy efficiency	23
4.3. Electricity supply and demand in the context of sustainable energy transition	26
4.4. Energy flows and balance, 2030	26
4.5. GHG emission reduction with sustainable energy transition	27

5. Raising ambitions with sustainable transport strategies and moving towards a net zero society **29**

5.1. Ambitious scenario: Sustainable Transport Strategies (STS) scenario	30
5.1.1. Energy demand outlook	30
5.1.2. GHG emission reduction and energy savings	31
5.1.3. Electricity demand and supply in 2030.....	33
5.1.4. Energy flows and balance, 2030	33
5.2. Ambitious scenario: Towards Net Zero (TNZ) scenario.....	34
5.2.1. Energy demand outlook	34
5.2.2. GHG emission reduction and energy savings.....	34
5.2.3. Energy flows and balance, 2030	35
5.2.4. Pathways to decarbonizing Surat Thani province's electricity supply	36

6. Low carbon transition for Koh Samui **39**

6.1. Energy demand and GHG emissions in 2017.....	40
6.2. Energy demand and GHG emissions outlook under the current policy settings	41
6.3. Energy savings and GHG emission reduction potential under energy transition pathways.....	42
6.4. Decentralising renewable energy generation for Koh Samui	43
6.5. Waste management approaches for Koh Samui	44

7. Policy recommendations for a sustainable energy transition **45**

7.1. Transitioning to industrial best practices to realise substantial energy savings in energy demand....	47
7.2. Sustainable transport strategies to realise a low-carbon transport sector.....	48
7.3. Pursuance of high renewable power share through cost-effective pathways	48
7.4. Moving towards net zero carbon	49

8. Conclusion **51**

Annexes

54

Annex I Surat Thani's status against the SDG 7 indicators	54
Annex II Key assumptions for NEXSTEP energy modelling	55
(a) General key assumptions	55
(b) Demand analysis and growth projections by sector	55
Annex III Power technologies assumptions	59
Annex IV Summary results for the scenarios	60
Annex V Energy balance.....	60
Business as Usual (BAU) scenario, 2030	60
Current policy (CP) scenario, 2030	61
Sustainable Energy Transition (SET) scenario, 2030	61
Sustainable Transport Strategies (STS) scenario, 2030	62
Towards Net Zero (TNZ) scenario, 2030	62

List of figures

Figure ES 1. Comparison of emissions by scenarios 2022-2030.....	xii
ตัวอย่าง เปรียบเทียบการปล่อยก๊าซเรือนกระจกในแต่ละสถานการณ์ ระหว่างปี พ.ศ. 2565 – พ.ศ. 2573.....	xvi
Figure 1. Different components of the NEXSTEP methodology.....	5
Figure 2. GHG emissions in 2018.....	10
Figure 3. TFEC breakdown by sector and fuel type, 2018.....	11
Figure 4. TFEC breakdown by fuel type, 2018	11
Figure 5. Surat Thani's energy demand outlook, CPS 2022-2030.....	14
Figure 6. Energy demand distribution by transport sector sub-categories, CPS in 2030.....	15
Figure 7. Energy demand distribution by commercial sector sub-categories, CPS in 2030.....	16
Figure 8. Electricity demand distribution by demand sector in 2030, CPS.....	16
Figure 9. Percentage share of renewable electricity and grid emission factor of central grid, 2018-2030	17
Figure 10. TDES breakdown by fuel type, CPS in 2030	17
