

Energy Transition Pathways for the 2030 Agenda

SDG 7 Road Map for Pakistan

Energy Transition Pathways for the 2030 Agenda

SDG 7 Road Map for Pakistan

**Developed using the National Expert SDG7
Tool for Energy Planning (NEXSTEP)**

*The shaded areas of the map indicate ESCAP members and associate members.**

The Economic and Social Commission for Asia and the Pacific (ESCAP) serves as the United Nations' regional hub, promoting cooperation among countries to achieve inclusive and sustainable development. The largest regional intergovernmental platform with 53 member States and 9 associate members, ESCAP has emerged as a strong regional think-tank offering countries sound analytical products that shed insight into the evolving economic, social and environmental dynamics of the region. The Commission's strategic focus is to deliver on the 2030 Agenda for Sustainable Development, which it does by reinforcing and deepening regional cooperation and integration to advance connectivity, financial cooperation and market integration. The research and analysis undertaken by ESCAP, coupled with its policy advisory services, capacity building and technical assistance to governments aims to support countries' sustainable and inclusive development ambitions.

Abbreviations and acronyms	viii
Executive Summary	ix
A. Highlights of the road map	ix
B. Achieving Pakistan's SDG 7 and NDC targets by 2030	x
C. Important policy directions	xii
1. Introduction	1
1.1. Background	2
1.2. SDG 7 targets and indicators	2
1.3. Nationally Determined Contribution.....	3
1.4. NEXSTEP methodology	3
1.4.1. Energy and emissions modelling	4
1.4.2. Economic analysis.....	4
1.4.3. Scenario analysis	4
2. Country overview	5
2.1. Demographic and macro-economic profile.....	6
2.2. Energy sector overview	7
2.2.1. National energy profile.....	7
2.2.2. National energy policies, plans, strategies and institutions	9
2.2.3. National energy resources and potentials	11
3. Modelling assumptions	13
3.1. Scenario definitions	15
3.1.1. BAU scenario	15
3.1.2. Current policies scenario	15
3.1.3. SDG scenario	15
3.1.4. Ambitious scenario	15
3.2. Assumptions	15
4. Energy transition outlook in the current policy scenario	17
4.1. Demand	18
4.1.1. Residential sector	18

4.1.2. Industrial sector	20
4.1.3. Transport sector	21
4.1.4. Commercial and agriculture sectors	22
4.2. Power sector	23
4.2.1. Capacity	23
4.2.2. Generation	24
4.3. Supply	26
5. SDG scenario: An assessment of SDG 7 targets and indicators	27
5.1. Energy demand and supply	28
5.2. SDG 7 targets	31
5.2.1. SDG 7.1.1, Access to electricity	31
5.2.2. SDG 7.1.2, Access to clean fuels and technologies for cooking	31
5.2.3. SDG 7.2, Renewable energy	33
5.2.4. SDG 7.3, Energy efficiency	35
5.3. Nationally Determined Contribution targets	36
5.4. Marginal abatement cost curve for achieving SDG 7	37
6. Going beyond SDG 7	39
6.1. Decarbonization of the power sector by 2030 scenario	40
6.1.1. Power sector strategy in the decarbonization of the power sector scenario	40
6.1.2. Power generation outlook	41
6.1.3. Challenges and opportunities to decarbonize the power sector	42
6.2. Decarbonization of the whole economy by 2050 scenario	42
6.2.1. Demand sector strategy	43
6.2.2. Power sector and energy supply outlook	43
6.2.3. GHG emission outlook	44
7. Policy recommendations	45
7.1. Scenario evaluation	45
7.2. Policy actions for achieving SDG 7	47
7.2.1. Electric cooking stoves and improved cooking stoves provide a sustainable long-term solution with multifold benefits	47
7.2.2. Adoption of sustainable and clean heating in the residential sector to reduce air pollution-related health impacts	47
7.2.3. Raising the efficiency standards of household appliances to save running costs	47
7.3. Policy recommendations to raise ambitions beyond SDG 7	48
7.3.1. Transport electrification is a major step towards net zero 2050	48
7.3.2. Incentivize industrial energy efficiency measures for a more competitive industry sector	48
7.3.3. Decarbonization of the power sector to meet national energy demand	49
7.3.4. Green financing	49
8. Building back better from COVID-19	51
8.1. Accelerating access to clean and modern energy services	52
8.2. Savings from the energy sector will help to build other sectors	52
8.3. Long-term recovery planning to build back better while ensuring sustainable growth	52

9. Conclusion and the way forward 53
