

Government of
The Republic of Indonesia

The Government of Indonesia & UNFPA:

2017

KEY ACHIEVEMENTS

SEXUAL REPRODUCTIVE HEALTH & RIGHTS

1. Improved midwifery education standards (vocational and professional), rights-based family planning strategy for district implementation, and subnational maternal deaths surveillance and response (MDSR), that significantly contribute to the reduction of maternal mortality
2. Study on Family Planning determinants for maternal deaths:
 - Tools for study on FP determinants for Maternal deaths finalized
 - Study on FP determinants for Maternal Deaths conducted (with no case control study but alternate secondary data analysis)
3. Update of SRH-related SDG indicators available
4. Mapping of family planning facilities in 2 pilot districts and recommendation for FP in UHC implementation and policy available
5. Report on the implementation of Supply Chain Management (SCM) modeling including review of BOKB (special allocation funds) in 9 districts available
6. National FP costed implementation plan available
7. Indonesia's expertise in family planning internationally acknowledged through GoI-UNFPA SSTC initiatives
8. The Minimum Implementation Service Package (MISP) Operational and Logistic Guidelines adopted into national disaster preparedness and response policies
9. Over 92,000 female sex workers reached through HIV prevention and services

ADOLESCENT SEXUAL REPRODUCTIVE HEALTH

1. Indonesia's first Youth Development Index available for policy and programming
2. Curriculum on ASRH (Adolescent Sexual & Reproductive Health) for the CSE (Comprehensive Sexuality Education) handbook for teachers available
3. Pocket book on youth involvement in disaster response available
4. Indonesia's first comprehensive and multi-sector National Action Plan on Youth Development (2017-2019), in the context of the demographic bonus, available
5. Policy advice on ICPD themes incorporated into Indonesia's National Plan of Action on School Age Child and Adolescent Health (2017-2019)
6. "Leaving no one behind" in reproductive health, through UNALA, an innovative, private sector-led service delivery initiative; reaching 2,645 young people with services and information, and 385,570 through social media

GENDER EQUALITY

1. Recommendation for development of regulation to strengthen mechanism of health sector response to GBV available
2. Evidence-based advocacy on harmful practices available:
 - Policy brief on harmful practices available as key reference for policy advocacy
 - Development of recommendation for SDGs indicator including the strategy and advocacy materials for harmful practices
 - Documentation of lessons learned and development of model for child marriage prevention
3. Partners for Prevention (P4P) Pilot carried out in Papua:
 - Approximately 75% of 80 participants (adolescents) trained have increasingly significant attitude change on gender equitable relationships
 - Approximately 75% of 60 participants (caregivers) trained have increasingly significant attitude change on gender equitable relationships
 - Evaluation report of the P4P pilot available
4. Studies on harmful practices (Child Marriage, FGM/C) available to provide evidence for SDG targets 5.3
5. Indonesia's first VAW Survey (SPHPN 2016) as baseline for SDGs and RPJMN (2020-2024) available, through the provision of expertise
6. Guidelines for GBV prevention and response in disaster settings adopted into national disaster preparedness and response policies

POPULATION DYNAMICS AND DATA

1. Improved implementation of the Population Census, Inter-censal Population Surveys (SUPAS), and Demographic and Health Surveys (SDKI), through the provision of expertise
2. Migration Study, as background to the 2015-2045 Population Projections, available
3. Population Projections and Population Dynamics available, in support of Indonesia's sustainable development
4. Selected SDGs indicators using BPS data available, through the provision of expertise
5. Innovative design of 2020 population census, including for disaster management purposes available:
 - Web GIS design, digitized mapping data-based design and field trial of the instruments, and SOPs for improved data collection (CAPI) available
 - Provision of technical assistance and capacity building to further improve innovative and interactive web-based subnational data information system
6. Policy brief for parliamentarians on FP enabling environment (KUHP/ Penal Code) available
