PREFACE

Assalamu'alaikum wr. wb

Praise to the Lord Almighty for His blessings, so this report on "Review of Maternal Mortality in 5 Region in Indonesia" is well prepared. This review is the first time that nearly 4000 cases of maternal mortality have been analyzed— that number is around 50 percent of all maternal deaths recorded the 2010 Population Census. With such a large number of cases being reviewed, it is possible to do inter-regional analysis, comparing results from Sumatera, Java-Bali, Kalimantan, Sulawesi, and Eastern Indonesia.

This publication examines characteristics and causes of maternal deaths, as well as information on quality of care and conditions in health facilities, which can be related to the maternal mortality ratio.

I would like to extend my appreciation to the research team, especially Dr. Teti Tejayanti, MKM and Ms. Kristina Sabatini, SKM, M.Epid, who have worked so hard in analyzing and accommodating enormous inputs from many experts, enabling this report to be presented so well. I would like also to thank UNFPA for its support in developing and publishing this report. To all contributors, thank you for the invaluable inputs to developing the review.

This report will be a great reference for improvement in the general health programme and the maternal health programme in particular. This macro review is expected to be followed up with further research in every region. The results and recommendations are expected to be implemented to improve the maternal health programme to accelerate efforts to achieve MDGs, particularly maternal mortality reduction.

Billahit taufiq walhidayah, wassalamu'alaikum wr. wb.

Head Of Balitbangkes

Dr. dr. Trihono, M.Sc

TABLE OF CONTENTS

PREFACE	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	v
LIST OF CHARTS	vi
EXECUTIVE SUMMARY	vii
 BACKGROUND	 1
 OBJECTIVES	
1. General Objective	2
2..Specific Objectives	2
 FRAMEWORK	 3
 METHODOLOGY	
1. Type of research	4
2. Data.....	4
3. Data analysis.....	4
4. Operational definitions.....	5
 RESULT AND DISCUSSIONS	
1. Characteristic of maternal death	6
2. Number of maternal death	6
3. Causes of maternal death	8
a. Maternal death causes by group/ tabulation	8
b. Causes of death without grouping	13
4. Characteristic of maternal mortality by cause of death	14
5. Quality of Care	16
a. Overall cause of maternal death	16
b. Pregnancy induced Hypertension.....	18
c. Post-partum Hemorrhage.....	21
6. Health Facilities.....	21
 CONCLUSION	 29
RECOMMENDATIONS	31
