The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

## List of tables

Table 1. Availability of maternal mortality data records by source type and country for use in generating maternal mortality ratio estimates (MMR, maternal deaths per 100 000 live births) for 2015

Table 2. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by United Nations Millennium Development Goal (MDG) region, 2015

Table 3. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths and AIDS-related indirect maternal deaths, by United Nations Millennium Development Goal (MDG) region, 2015

Table 4. Comparison of maternal mortality ratio (MMR, maternal deaths per 100 000 live births) and number of maternal deaths, by United Nations Millennium Development Goal (MDG) region, 1990 and 2015

## List of annexes

- Annex 1. Summary of the country consultations 2015
- Annex 2. Measuring maternal mortality
- Annex 3. Methods used to derive a complete series of annual estimates for each covariate, 1985–2015
- Annex 4. Adjustment factor to account for misclassification of maternal deaths in civil registration, literature review of reports and articles
- Annex 5. Usability assessment of civil registration data for selected years (1990, 1995, 2000, 2005, 2010 and latest available year)
- Annex 6. Estimation of AIDS-related indirect maternal deaths
- Annex 7. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, lifetime risk and percentage of AIDS-related indirect maternal deaths, 2015
- Annex 8. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk by WHO region, 2015
- Annex 9. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by WHO region, 1990–2015
- Annex 10. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk by UNICEF region, 2015
- Annex 11. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNICEF region, 1990–2015
- Annex 12. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk by UNFPA region, 2015
- Annex 13. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNFPA region, 1990–2015
- Annex 14. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk by World Bank Group region and income group, 2015
- Annex 15. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by World Bank Group region and income group, 1990–2015
- Annex 16. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk by UNPD region, 2015
- Annex 17. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNPD region, 1990–2015
- Annex 18. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by United Nations Millennium Development Goal region (indicated in bold) and other grouping, 1990–2015
- Annex 19. Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by country, 1990–2015

## Acknowledgments

The Maternal Mortality Estimation Inter-Agency Group (MMEIG), together with Leontine Alkema of the National University of Singapore, Singapore, and the University of Massachusetts Amherst, United States of America (USA), Sanqian Zhang of the National University of Singapore, Singapore, and Alison Gemmill of the University of California at Berkeley, USA, collaborated in developing these maternal mortality estimates.

The MMEIG consists of the following individuals, listed in alphabetical order: Mohamed Ali of the World Health Organization (WHO); Agbessi Amouzou of the United Nations Children's Fund (UNICEF); Ties Boerma of WHO; Liliana Caravajal of UNICEF; Doris Chou of WHO; Patrick Gerland of the United Nations Population Division (UNPD); Daniel Hogan of WHO; Victor Gaigbe-Togbe of the UNPD; Edilberto Loaiza of the United Nations Population Fund (UNFPA); Matthews Mathai of WHO; Colin Mathers of WHO; Samuel Mills of the World Bank Group; Holly Newby of UNICEF; Lale Say of WHO; Emi Suzuki of the World Bank Group; and Marleen Temmerman of WHO. Leontine Alkema is the lead adviser to the MMEIG.

Flavia Bustreo of WHO oversaw the overall work and process of developing the estimates.

An external technical advisory group (TAG) provided independent technical advice. The members of the TAG are: Saifuddin Ahmed of Johns Hopkins University, USA; David Braunholz, independent consultant, United Kingdom of Great Britain and Northern Ireland; Peter Byass of Umeå University, Sweden; Namuunda Mutombo of the African Population and Health Research Centre, Kenya; and Thomas Pullum of ICF Macro, USA.

We are also grateful to Jeffrey Eaton of Imperial College London, United Kingdom, Bilal Barakat of the Vienna Institute of Demography/International Institute for Applied Systems Analysis (IIASA), Austria, and Emily Peterson of the University of Massachusetts Amherst, USA, for discussion of the analyses.

The Department of Governing Bodies and External Relations of WHO, WHO country offices, UNFPA country offices and UNICEF country offices are all gratefully acknowledged for facilitating the country consultations.

Thanks are also due to the following WHO regional office staff:

**Regional Office for Africa:** Phaniel Habimana, Derege Kebede, Tigest Ketsela Mengestu, Peter Mbondji, Gisele Carole Wabo Nitcheu, Triphonie Nkurunziza, Leopold Ouedraogo

**Regional Office for the Americas:** Gerardo de Cosio, Patricia Lorena Ruiz Luna, Cuauhtemoc Ruiz Matus, Bremen De Mucio, Antonio Sanhueza, Suzanne Serruya

**Regional Office for South East Asia:** Mark Landry, Neena Raina, Sunil Senanayake, Arun Thapa

**Regional Office for Europe:** Gauden Galea, Gunta Lazdane, Ivo Rakovac, Claudia Elisabeth Stein

**Regional Office for the Eastern Mediterranean:** Mohamed Mahmoud Ali, Haifa Madi, Ramez Khairi Mahaini

**Regional Office for the Western Pacific:** Jun Gao, Susan P. Mercado, Mari Nagai, Teret Reginaldo, Howard Sobel.

In addition, Maria Barreix, Dmitri Botcheliouk, Lauri Jalanti and Karin Stein of WHO provided translation during the country consultations. Thanks to all focal points of governments who reviewed the preliminary estimates of maternal mortality ratios and provided valuable feedback.

Financial support was provided by WHO, through the Department of Reproductive Health and Research and HRP (the UNDP/UNFPA/UNICEF/WHO/World Bank Special Programme of Research, Development and Research Training in Human Reproduction), the United States Agency for International Development (USAID) and the National University of Singapore.

This report was prepared by Leontine Alkema, Elena Broaddus, Doris Chou, Daniel Hogan, Colin Mathers, Ann-Beth Moller, Lale Say and Sanqian Zhang. Many thanks to Maria Barreix, Sara Cottler and Karin Stein for extensive work during the final preparation of the report.

Contact persons: Doris Chou (e-mail: [choud@who.int](mailto:choud@who.int)) and Lale Say (e-mail: [sayl@who.int](mailto:sayl@who.int)), Department of Reproductive Health and Research, WHO.
