CONTENTS

Note on terminology	v
I. Introduction	1
Medical code of ethics	1
Definition of female genital mutilation	1
Types of female genital mutilation	1
Female genital mutilation as a social norm	2
Definition of “medicalization”	2
Global scale of the problem of female genital mutilation and medicalization	3
Recognition of the problem by the global health community and national authorities	4
Engaging health professionals to support abandonment of female genital mutilation and never to perform it is critical to success in eliminating the practice	5
About the global strategy against medicalization of female genital mutilation	5
II. Global goals – global realities	6
Reaffirming the Millennium Development Goals	6
Female genital mutilation and human rights	6
III. Challenges to be addressed	7
Reasons for medicalization of FGM	7
Why there is a demand for medicalized FGM	7
Why some health-care providers agree to perform FGM	7
Why some organizations support medicalization	8
Why some health-care providers, individuals and organizations support reinfibulation	8
Reasons why medicalization of female genital mutilation must be stopped	8
Why medicalization of female genital mutilation must be stopped	8
Why reinfibulation should be prevented	9

Challenges to stopping the medicalization of female genital mutilation	9
Lack of protocols, manuals and guidelines to guide the health-care providers	9
Insufficient training and support for health-care providers	10
Lack of involvement of the local health sector in the prevention of female genital mutilation	10
Lack of laws and the will to prosecute	10
IV. Strategy to accelerate progress	11
What health-care providers and national authorities can do	11
(a) Mobilize political will and funding	12
(b) Strengthen the understanding and knowledge of health-care providers	12
(c) Create supportive legislative and regulatory frameworks	13
(d) Strengthen monitoring, evaluation and accountability	15
V. Call to action	16
References	17

Note on terminology

The term “female genital mutilation” is used in this strategy as it was in the two interagency statements on female genital mutilation (WHO 1997 and WHO 2008). The word “mutilation” emphasizes the gravity of the act. Some United Nations agencies use the term “female genital mutilation/cutting” wherein the additional term “cutting” is intended to reflect the importance of using non-judgemental terminology with practising communities. Both terms emphasize the fact that the practice is a violation of girls’ and women’s human rights.
