Urban Recovery Framework

Urban Profiling Toolbox

Analysis tools for urban profiling
in crisis-affected cities.

UN HABITAT
FOR A BETTER URBAN FUTURE

DISCLAIMER

The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat off the United Nations concerning the legal status of any country territory, city or area, or of its authorities, or concerning delimitation of its frontiers or boundaries, or regarding its economic system or degree of development. The analysis, conclusions and recommendations of this document do not necessarily reflect the views of the United Nations Human Settlements Programme, the Governing Council of the United Nations Human Settlements Programme or its Member States. References to names of firms and commercial products and processes does not imply their endorsement by the United Nations, and a failure to mention a particular firm, commercial product or process is not a sign of disapproval. Excerpts from the text may be reproduced without authorisation, on condition that the source is indicated.

ACKNOWLEDGMENTS

Overall project supervision: Dr. Erfan Ali.
Authors: Ivan Thung, Elaf Raslan and Nathalie Garner.
Contributors from UN-Habitat: Raniah Kamal, Nanor Karageozian, Pablo Fernandez Maestre, Jonathan Weaver, Antara Tandon and Zeyad Elshakra.
Contributors from iMMAP: Lina Nasereddin and Koen van Rossum.

The first review of the toolbox was conducted through the Regional Urban Profiling workshop in Cairo in 2019, with feedback received from: Tommaso Cossu, Babar Mumtaz, Ali Abhire, Yuka Terada (UN-Habitat), Isis Nunez (JIPS), Margarita Kondratovic (iMMAP) and Tom Leiermann (UNESCO). In the second review, Stephanie Loose (UN-Habitat) provided feedback.

This toolbox was made possible thanks to support of country offices within UN-Habitat's Regional Office for Arab States and UN-Habitat headquarters in Nairobi – including the Somalia Programme and the Urban Planning and Design Lab, iMMAP and JIPS.

FINANCIAL SUPPORT

This document was prepared with the generous support of the 11th Tranche of the Development Account (DA 1819AX), in the context of the project: "Urban profiling for post-crisis stabilization, recovery and reconstruction in conflict-affected cities in the Arab region", cooperating with ESCWA.

URBAN RECOVERY ANALYSIS FRAMEWORK FOR URBAN PROFILING IN CONFLICT-AFFECTED CITIES

TABLE OF CONTENTS

Introduction....8

Urban Recovery Analysis Framework
- Context Analysis....9
- Housing....10
- Economy....12
- Infrastructure and Services....14
- Governance....16
- Civil Society....18
- Environment....20
- Cultural Heritage....22

Urban Profiling....24

Urban Profiling Toolbox
- Overview....27
- Survey-based Tools....28
  - #1 Neighbourhood Socio-economic Household Survey....29
  - #2 Inventory of Damage and Operational Capacity through KIIs....31
  - #3 Neighbourhood Profiling Field Assessments....33
  - #4 Neighbourhood Profiling Household Surveys....38
- Participation Tools....40
  - #5 Conflict and Stakeholder Analysis....41
  - #6 Inventory of Urban Services at the Neighbourhood Level (City Cahier)....43
  - #7 Urban Functionality Index....46
  - #8 Community Based Planning for Rapid Urban Profiling....49
  - #9 Neighbourhood Profiling Focus Group Discussions (FGDs)....51
  - #10 Neighbourhood Profiling Key Informant Interviews (KIIs)....53

WASH	Water, Sanitation and Hygiene
4Ws	Who is Where, When, doing What (in terms of humanitarian actors)

INTRODUCTION

URBAN RECOVERY FRAMEWORK

Urban profiling is a methodology implemented in various conflict-affected countries in the region. Through urban profiles, UN-Habitat seeks to provide up to date, holistic documentation and analysis of the impact of the crisis in key cities, synthesising information and insight from existing sources and priority sectors, supplemented by direct field research by UN-Habitat teams based in each city. This document has been developed with the goal to assist practicioners in implementing urban profiles in conflict-affected countries. It consists of two parts: an analysis toolbox and an analysis framework.

The Urban Recovery Analysis Framework has been developed to support the development of an urban profile through a shared set of research questions that examine:

1) How conflict has affected the city;
2) What the relief phase challenges are and how they will impact the development phase;
3) What strategic areas or projects require attention in the short-medium timespan.

negotiation position of local government towards central government and humanitarian/development actors.

DESIGN OF THE FRAMEWORK

This analysis framework has been developed with the understanding that different cities can differ greatly in terms of size and density; whether they might be fragile or in a state of conflict; by the drivers of conflict that may be present; and by the development challenges they face. Due to these varying factors, this framework is not a comprehensive methodology, nor does it provide a step-by-step process for implementing an urban profile. Rather, it provides a starting point, tools and learning for practitioners faced with implementing a profile on the ground. Furthermore, this framework takes into consideration the recommendations put forward in the paper entitled "Urban Profiling For Better Responses To Humanitarian Crises" (http://urbancrises.org/wp-content/uploads/2019/02/1.-Urban-Profiling-For-Better-Responses-to-Humanitarian-Crises-1.pdf)

The urban profiles developed under this framework should attempt to address the majority of its primary

Tools to support the implementation of profiles:

A 'toolbox' is attached to this framework. It contains the necessary guidance for analyses that have been implemented in previous urban profiles.

Alignment with existing frameworks:

The frameworks pillars are based on the ongoing work on Urban Recovery Frameworks, currently being developed within UN-Habitat's Regional Office for Arab States (ROAS), due to its extensive urban profiling experience in the region, including in Syria, Libya and Yemen. A regional approach was initiated to learn from similar contexts in the region.
