Resource Efficiency and the City Resilience Profiling Tool

With the support of

The **Resource Efficiency Enhancer** was prepared by UN-Habitat as part of the ongoing Urban Resilience Enhancer series. In order to promote collaboration and gather valuable inputs, the enhancers are open to peer review by expert organizations working in relevant sectors. For the Resource Efficiency Enhancer, the United Nations Environment conducted an in-depth review to provide inputs, comments and suggestions. These inputs have shaped the Enhancer into its current draft that will be subject to further review before finalization (early 2019).

Disclaimer

The Enhancers are under continual development and should not be taken as complete or comprehensive resilience tools. They serve to increase engagement, validate approaches and lead to further engagement of resilience building through the CRPT.

Barcelona, November 2018
City Resilience Profiling Programme
UN-Habitat
