

CONDOMINIUM HOUSING IN ETHIOPIA:

The Integrated Housing
Development Programme

UN HABITAT
FOR A BETTER URBAN FUTURE

Series Summary:

Housing Practices: country experiences of designing and implementing affordable housing programmes

Housing Practices is an ongoing series that documents the experiences of countries who are implementing large-scale affordable housing programmes. It is a flagship series developed and produced by the Housing Policy Section of UN-HABITAT, which provides authoritative and independent documentation of innovative affordable housing programmes in countries of the developing world.

Rather than drawing from theory or abstract models, Housing Practices addresses the demand for practical guidance on housing programmes based on experience. Each volume holistically documents one 'best-practice' housing programme that has achieved significant results. The volumes are thoroughly researched and presented in a way that clearly communicates the country's housing sector context, the elements of the programme, key achievements and challenges, and suggestions for further programme improvement.

Disseminating up-to-date information on country-specific large-scale housing programmes is vital to reveal to other developing countries the programmatic opportunities for addressing their housing shortages, reducing slum formation and growth, and improving the housing conditions of their citizens.

ACKNOWLEDGEMENTS

This report was prepared by Matthew French and Katherine Hegab from the Housing Policy Section, UN-HABITAT. Katherine Hegab and Rasmus Precht undertook the UN-HABITAT mission to Addis Ababa where they conducted research through site-visits, interviews with key stakeholders and household surveys on condominium sites. Claudio Acioly, Christophe Lalande and Rasmus Precht from Housing Policy Section, UN-HABITAT, supervised and finalised all outputs of this project. Valuable comments were provided by UN-HABITAT's Regional Office for Africa and the Arab States.

UN-HABITAT acknowledges the contribution of all individuals and organisations whose names are listed below. In addition to those mentioned here, appreciation is given to the households who participated in the household surveys undertaken in Bole Gerji and Gotera.
