# Presenting the UN-Water Integrated Monitoring Initiative for SDG 6

Through the UN-Water Integrated Monitoring Initiative for Sustainable Development Goal (SDG) 6, the United Nations seeks to support countries in monitoring water- and sanitation-related issues within the framework of the 2030 Agenda for Sustainable Development, and in compiling country data to report on global progress towards SDG 6.

The Initiative brings together the United Nations organizations that are formally mandated to compile country data on the SDG 6 global indicators, who organize their work within three complementary initiatives:

- **WHO/UNICEF Joint Monitoring Programme for Water Supply, Sanitation and Hygiene (JMP)**<sup>1</sup>

Building on its 15 years of experience from Millennium Development Goals (MDG) monitoring, the JMP looks after the drinking water, sanitation and hygiene aspects of SDG 6 (targets 6.1 and 6.2).

- **Integrated Monitoring of Water and Sanitation-Related SDG Targets (GEMI)**<sup>2</sup>

GEMI was established in 2014 to harmonize and expand existing monitoring efforts focused on water, wastewater and ecosystem resources (targets 6.3 to 6.6).

- **UN-Water Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS)**<sup>3</sup>

The means of implementing SDG 6 (targets 6.a and 6.b) fall under the remit of GLAAS, which monitors the inputs and the enabling environment required to sustain and develop water and sanitation systems and services.

The objectives of the Integrated Monitoring Initiative are to:

- Develop methodologies and tools to monitor SDG 6 global indicators
- Raise awareness at the national and global levels about SDG 6 monitoring
- Enhance technical and institutional country capacity for monitoring
- Compile country data and report on global progress towards SDG 6

The joint effort around SDG 6 is especially important in terms of the institutional aspects of monitoring, including the integration of data collection and analysis across sectors, regions and administrative levels.

# CONTENTS

<b>Acknowledgements</b>	6
<b>Foreword</b> by Gilbert F. Hounbo, UN-Water Chair and President of the International Fund for Agricultural Development	7
<b>Report highlights</b>	8
<b>1. Monitoring safe wastewater treatment and reuse</b>	10
<b>2. Monitoring methodology – "Proportion of wastewater safely treated"</b>	13
6.3.1a: Percentage of safely treated domestic wastewater flows	15
6.3.1b: Percentage of safely treated industrial wastewater flows	16
<b>3. Methodology development and learnings from methodology testing</b>	18
Methodology development and testing process	19
Key feedback from countries and stakeholders	20
<b>4. Results and analysis</b>	21
6.3.1a: Percentage of safely treated domestic wastewater flows	22
6.3.1b: Percentage of safely treated industrial wastewater flows	25
National standards for wastewater treatment	26
Safe use of wastewater	26

<b>5. Towards comprehensive monitoring of safe wastewater treatment and reuse</b>	28
<b>6. Conclusion</b>	30
<b>References</b>	32
<b>Boxes, tables and figures</b>	33
<b>Learn more about progress towards SDG 6</b>	34

# ACKNOWLEDGEMENTS

The World Health Organization (WHO) and the United Nations Human Settlements Programme (UN-Habitat) wish to acknowledge the following people for their contributions in expert meetings and task forces to the development and testing of the 6.3.1 monitoring methodology.

- Graham Alabaster, UN-Habitat, Switzerland
- Alessandra Alfieri, United Nations Statistics Division (UNSD), United States of America
- Rob Bain, WHO/UNICEF Joint Monitoring Programme, United States of America
- Isabel Blackett, Independent consultant, United Kingdom
- Gero Carletto, International household survey expert, Italy
- Kartik Chandran, Columbia University, United States of America
- Sasha Danilenko, World Bank International Benchmarking Network for Water and Sanitation Utilities (IBNET)
- Luca Di Mario, WHO consultant, Italy
- Pay Drechsel, International Water Management Institute, Sri Lanka
- Barbara Evans, University of Leeds, United Kingdom
- Jürgen Foerster, Manager of European Water Statistics, European Commission
- Bruce Gordon, WHO, Switzerland
- Rifat Hossain, WHO, Switzerland
- Vivian Ilarina, National focal point for the System of Environmental Economic Accounting (SEEA), Philippines
- Rick Johnston, WHO/UNICEF Joint Monitoring Programme, Switzerland
- Mitsuo Kitagawa, Japan International Cooperation Agency wastewater expert, Japan
- Peter Kolsky, University of North Carolina, United States of America
- Trinh Kyomugisha, Ministry of Water and Environment, Uganda
- Pali Lehohla, Joint Monitoring Programme/Global Analysis and Assessment of Sanitation and Drinking-Water (GLAAS) Strategic Advisory Group (SAG) member, South Africa
- Fernanda Malta, National focal point for SEEA, Brazil
