

STUDY RESULTS

***“Services provided to migrant women, especially to returnee women, and the creation of a dialogue platform for migrant women”
with the participation of women, representatives of government institutions and non-governmental organizations***

The survey data on services provided to migrants, including returnee women, revealed the following:

- ✓ Returnees are not acquainted with services available neither how to access them;
- ✓ Local public authorities and non-governmental organizations are not really acquainted with other services provided at the local level besides their services.

In this regard, several actions shall be taken to improve services destined to migrants, particularly to returnee women and create a dialogue platform for migrant women to access existing services:

1. Strengthen relationships and efforts in advertising relevant services to central and local authorities, NGOs and migrants.
2. Create and develop the online communication network of returnees.
3. Appoint a secretariat that will be supported financially, to manage the online communication network of returnees aimed at strengthening the network of returnees and local service providers targeting migrants.
4. Provide advice and expertise to active groups of returnees (including the established secretariat) to guide them in creating non-governmental organizations (status, registration, communication with authorities etc.) and developing an operational plan for 1-2 years.
5. Build capacities and provide training to network members, local service providers targeting migrants and local public administration.
6. Organize lobbying for the development of services destined to returnees at the local level by the newly created network and non-governmental organizations providing services to migrants.
7. Development of the Guide (information about institutions and NGOs dealing with employment, human trafficking, with basic information including the address, phone number of institutions/organizations, target groups and services provided) for migrants in an accessible way to support returnees benefit from the services existing for them.
8. Join efforts with local service providers to be able to offer more effective services and to reach returnees from rural areas.
9. Offer small grants to non-governmental organizations providing services to returnees. Accessing the small grants, the organizations shall benefit from coaching and monitoring in activities related to management, including financial management, PR activities, thus strengthening their competences.
10. Promote services destined to returnees through embassies and diplomatic missions of the Republic of Moldova (leaflets describing services, posters, handbook for returnees, etc.) and teach leaders of Diaspora associations to disseminate the information available.
11. Strengthen partnerships between non-governmental organizations providing services to returnees, local public authorities and Moldovan Diaspora associations.
12. Involve migrants in planning local activities and implementing community projects.
13. Display the results of the *Mapping of state institutions and non-governmental organizations providing services to migrants* project on the web sites of the Ministry of Labour, Social Protection and Family and the Bureau for the Diaspora Relations.
14. Present the outcomes of the *Mapping of state institutions and non-governmental organizations providing services to migrants* project to representatives of the Congress of Local Authorities from Moldova.
15. Engage the media in promoting/advertising the best practices related to the integration of returnees and activities carried out in local communities with migrants' participation.
