Food Security and Nutrition Assessment of People Living with HIV in Tunisia

TABLE OF CONTENTS

| | |
|---|-----------|
| List of Tables | VI |
| List of Figures | VII |
| Acknowledgements | VIII |
| Abbreviations | IX |
| Executive Summary | X |
| CHAPTER I - Introduction and Methodology | 1 |
| Background | 1 |
| Objectives | 2 |
| Methodology | 2 |
| Desk review | 2 |
| Quantitative assessment | 3 |
| Qualitative assessment | 4 |
| Eligibility criteria and ethical approval | 4 |
| Study limitations | 5 |
| CHAPTER II - Profiling PLHIV Population | 7 |
| Demographic characteristics | 7 |
| Household (HH) composition | 9 |
| Health care, chronic illness and disability | 10 |
| Livelihoods and HH finances | 11 |
| Housing and Wealth Index | 12 |
| HIV and Antiretroviral Treatment | 14 |
| Services and unmet needs | 16 |
| PLHIV under COVID-19 | 17 |
| HIV related risk behaviour | 18 |
| CHAPTER III - Situation of Food Security | 21 |
| Consolidated Approach to Reporting Indicators on Food Security (CARI) | 22 |
| Food Consumption Score (FCS) | 25 |
| Food Consumption Score – Nutrition (FCS-N) | 28 |
| Livelihood-based Coping Strategy Index (CSI) | 30 |
| Food Expenditure Share (FES) | 31 |
| Consumption-based Coping Strategy Index, Reduced (rCSI) | 31 |
| Women Dietary Diversity Score (WDDS) | 33 |
| Malnutrition | 33 |
| CHAPTER IV - Qualitative assessment | 39 |

| | |
|---|-----------|
| Stigma and discrimination | 39 |
| Mental health issues..... | 39 |
| Professional life | 40 |
| Medical care and treatment..... | 40 |
| Civil society | 41 |
| Food assistance | 41 |
| CHAPTER V - Conclusion and Recommendations | 43 |
| Challenges and Study Limitations..... | 43 |
| Annexes | 46 |
| Annex I: Study Questionnaire | 46 |
| Annex II: Qualitative discussions guide | 65 |

LIST OF TABLES

| | | |
|-------------------|---|----|
| Table 1.1 | : Sample frame and sample size..... | 4 |
| Table 1.2 | : Key populations interviewed for qualitative information | 4 |
| Table 2.1 | : Socio-demographic characteristics..... | 8 |
| Table 2.2 | : Variables considered for HH wealth index | 12 |
| Table 2.3 | : Mapping of services for PLHIV under treatment..... | 17 |
| Table 3.1 | : Consolidated Approach for Reporting Indicators of Food Security (CARI console) | 24 |
| Table 3.2 | : Prevalence of Food Insecurity among PLHIV population..... | 24 |
| Table 3.3 | : Food Consumption Score, food groups, and respective weights..... | 25 |
| Table 3.4 | : Food consumption score threshold and food consumption groups prevalence among PLHIV respondents..... | 27 |
| Table 3.5 | : Nutrient rich food groups included in FCS-N | 27 |
| Table 3.6 | : Livelihood-based Coping Strategies with level of severity and percent of HH employing them..... | 29 |
| Table 3.7 | : Percent of HHs employing various levels of coping strategies..... | 29 |
| Table 3.8 | : Food expenditure share | 31 |
| Table 3.9 | : Consumption-based Coping Strategies..... | 32 |
| Table 3.10 | : Women dietary diversity food groups | 33 |
| Table 3.11 | : Status of malnutrition | 34 |
| Table 3.12 | : Status of malnutrition for pregnant and lactating women..... | 35 |

LIST OF FIGURES

| | | | |
|--------------------|---|--|----|
| Figure 2.1 | - | Distribution of PLHIV respondents and treatment centres | 8 |
| Figure 2.2 | - | Household composition..... | 9 |
| Figure 2.3 | - | Barriers accessing health care services..... | 10 |
| Figure 2.4 | - | Types of chronic diseases (n=224) | 10 |
| Figure 2.5 | - | Types of Disability (n=60) | 11 |
| Figure 2.6 | - | Reasons PLHIV households are in debt (n=512) | 11 |
| Figure 2.7 | - | Reasons for unemployment, by gender (n=572) | 12 |
| Figure 2.8 | - | PLHIV respondents housing..... | 12 |
| Figure 2.9 | - | Wealth index by ART status | 13 |
| Figure 2.10 | - | Wealth index by PLHIV key population | 14 |
| Figure 2.11 | - | Mode of Transmission (MOT), by gender | 14 |
| Figure 2.12 | - | Barriers accessing ART (n=339)..... | 15 |
| Figure 2.13 | - | Distribution of respondents adhering to treatment by health centre (n=647) | 15 |
| Figure 2.14 | - | Most suitable type of assistance | 16 |
| Figure 2.15 | - | COVID-19 related behavioural change..... | 18 |
| Figure 2.17 | - | Percent of key populations using protection/ condom during intercourse in past 30 days..... | 19 |
| Figure 2.16 | - | Percent of IDUs sharing a needle during past 30 days..... | 19 |
| Figure 3.1 | - | Food security index, by wealth quintiles | 24 |
| Figure 3.2 | - | Food security index, by ART adherence..... | 24 |
| Figure 3.3 | - | Food security index, by PLHIV key population..... | 25 |
| Figure 3.4 | - | Average number of days per week each food group is eaten..... | 27 |
| Figure 3.5 | - | Food consumption score, by ART adherence | 27 |
| Figure 3.6 | - | Consumption of FCS-N food groups..... | 29 |
| Figure 3.7 | - | FCS-N, by ART adherence | 29 |
| Figure 3.8 | - | Consumption-based Coping Strategy Index, Reduced (rCSI) | 32 |
| Figure 3.9 | - | Malnutrition, by gender..... | 35 |
| Figure 3.10 | - | Malnutrition, by wealth quintiles | 35 |
| Figure 3.11 | - | Malnutrition, ART adherence | 36 |
| Figure 3.12 | - | Malnutrition, by PLHIV key population..... | 36 |

ACKNOWLEDGEMENTS

The food security assessment among people living with HIV in Tunisia would not have been possible without the contribution of various stakeholders who supported the study design, implementation, analysis, and report writing.

The World Food Programme in Tunisia is grateful to National AIDS programme that supported data collection through the four infectious diseases control and treatment centers across the country,

Appreciation is extended to the study coordinator, enumerators who worked in extremely difficult conditions due to the COVID-19 pandemic, to partner NGOs who facilitated access to study participants missing treatment and people living with HIV who participated in the study,

This study could not have been implemented without the active participation of the head of WFP Tunisia Country Office and the providing funds of the UNAIDS Regional Office to undertake this assessment, Thank you to colleagues in WFP Regional Bureau Cairo as well as colleagues in WFP Tunisia Country Office including

head of programme, nutrition, M&E sections and the entire finance team who actively participated in all phases of this study. Special thanks to the nutrition section of WFP Regional Bureau Cairo for their continued support and perseverance during all phases of preparation, data collection, analysis and presentation of results.

Thank you also to all members of the Steering Committee including the Head of Infectious Diseases Department at Fattouma Bourguiba Teaching Hospital in Monastir ; for his valuable collaboration and continuous support; the Head of National Programme for Fight against AIDS for coordination with the treatment centers and data collection; the UNAIDS Country Manager, Tunisia for his valuable advice, the Head of Research and Planning Department at the National Institute of Nutrition and Food Technology, Tunis for her continuous support ; the Head of Infectious Diseases Department, La Rabta Teaching Hospital, Tunis for her encouragement and the representative of Ministry of Social Affairs for the role of his ministry in strengthening HIV-sensitive social protection programmes.
