

SAVING LIVES
CHANGING LIVES

Hunger Map 2018

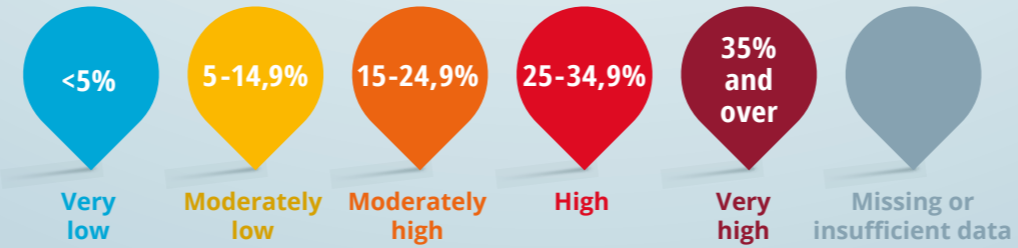

821
million people
– more than 1 in 9 of
the world population –
do not get enough
to eat

150
million children
under 5
are too small for their age
due to insufficient
diets

One in three
women of child-
bearing age suffer
from **anaemia**

Climate variability
and extremes
are among key drivers
of **hunger**

**PREVALENCE OF
UNDERNOURISHMENT
IN THE TOTAL POPULATION
(PERCENT) IN 2015-17**

Undernourishment is defined as the condition in which an individual's habitual food consumption is insufficient to provide the amount of dietary energy required to maintain a normal, active, healthy life. The indicator is reported as the prevalence of undernourishment (PoU), which is an estimate of the percentage of individuals in the total population that are in a condition of undernourishment. To reduce the influence of possible estimation errors in some of the underlying parameters, national estimates are reported as a three-year moving average.
