

SEA Region Measles and Rubella Quarterly update Jul -Sep 2021

Please note that all data contained within is provisional. The number of cases of measles and rubella officially reported by a member state is only available by July of each year (through the joint WHO UNICEF annual data collection exercise). If any numbers from this provisional data are quoted, they should be properly sourced with a date (i.e. provisional data based on weekly measles rubella case-based data reported to SEARO IVD as of 18 Oct 2021).

**World Health
Organization**
REGIONAL OFFICE FOR **South-East Asia**

Immunization and
Vaccine Development
South-East Asia Region

Key highlights – Q3 2021

(Jul-Sept 2021)

- The Region has adopted the goal of “measles and rubella elimination by 2023” ([SEA/RC73/R3](#)).
- A strategic plan for measles and rubella elimination in WHO South-East Asia Region for the period 2020-2024 has been endorsed by Member States.([link](#))
- Significant impact of COVID-19 on measles and rubella activities in the Region.
- Meeting of the WHO South-East Asia Regional Verification Committee conducted between 27-29 September
- A virtual review of the measles and rubella elimination activities in the Region commissioned through independent expert between 1 October to 30 November and is ongoing.

Recent cases of measles and rubella in countries already verified for measles elimination, South-East Asia Region

Country	Year in which verified		Confirmed cases Qtr 1+2+3, 2021		Source of infection of measles cases				% measles cases with known source
	Measles	Rubella	Measles	Rubella	Imported	Import-related	Unknown/not reported	Endemic	
Bhutan	2017	-	0	0	0	0	0	0	NA
