GLOSSARY	x
CHAPTER 1	1
INTRODUCTION	1
REFERENCES	4
CHAPTER 2	7
MONITORING STEPS FOR FLOUR FORTIFICATION PROGRAMMES	7
Introduction	7
Step 1. Engage stakeholders	8
Step 2: Describe the programme	9
Step 3. Focus on the monitoring design	10
Step 4. Gather credible evidence	15
Step 5. Justify conclusions	15
Step 6. Ensure use of results and share lessons learnt	16
CHAPTER 2: ANNEX	16
1.1 Description of the wheat flour fortification programme for Fortopia (a fictitious country)	16
REFERENCES	20
CHAPTER 3	23
QUALITY MANAGEMENT BY THE INDUSTRY – INTERNAL MONITORING	23
Introduction	23
3.1 Quality management systems	23
3.2 Quality assurance procedures for fortified flour	24
3.2.1 Premix is provided by an approved supplier and accompanied by a certificate of conformity/analysis for each batch procured by the mill	24
3.2.2 Quantity of the premix procured is in accordance with the quantity of flour that is regularly produced at the mill	26
3.2.3 Premix appropriately stored and used by expiry date	26
3.2.4 Premix feeders are installed, verified as working correctly, and periodically maintained	26
3.2.5 Premix dosed/added in accordance with production rate of fortified flour	27
3.2.6 Fortified flour packaged, labelled, and stored according to specifications	27

3.3	Quality control procedures for fortified flour	28
3.3.1	Record keeping for single and composite flour samples	28
3.3.2	Fortified flour is regularly confirmed as fortified using a qualitative method for testing the marker nutrient	28
3.3.3	Checking that average nutrient content and its allowable variation range accord with standards	29
CHAPTER 3: ANNEXES		30
3.1	Quality management systems	30
3.2	Internal monitoring: quality assurance and quality control by millers	31
3.2.1	Quality assurance/internal monitoring: inspection for flour premix by millers	31
3.2.2	Quantity of the premix procured is in accordance with the quantity of flour produced at the mill	32
3.2.3	Quality assurance/internal monitoring: storage and inventory of premix at the mill	35
3.2.4	Quality assurance/internal monitoring: periodic performance verification for automatic feeders by millers	35
3.2.5	Preparation of preblend	36
3.3	Quality control of flour by the mill	36
3.3.1	Record keeping for single and composite flour samples	36
3.3.2	Qualitative method for testing the marker nutrient in fortified flour	37
3.3.3	Quantitative methods for testing fortified flour samples and recording and reporting the results	38

CHAPTER 4		43
EXTERNAL, IMPORT, AND COMMERCIAL MONITORING		43
4.1	External monitoring	44
4.1.1	Quality assurance: audit	45
4.1.2	Quality control: inspection	45
4.1.3	External monitoring reporting	48
4.2	Import monitoring	48
4.2.1	Certificate of conformity/analysis for imported fortified flour meets fortification specifications according to standards	48
4.2.2	Imported fortified flour meets fortification specifications according to standards	49
4.2.3	Premix is provided by an approved supplier and accompanied by a certificate of conformity/analysis	50
4.2.4	Import monitoring reporting	50
4.3	Commercial monitoring	50
4.3.1	Fortified flour collected in distribution centres and retail outlets is packaged and labelled as specified in standards	51
4.3.2	Flour at the retail level meets fortification standards	51
4.3.3	Sample analysis	54

4.3.4 Commercial monitoring reporting	54
4.4 Consolidate reports of governmental food control	55
4.4.1 External monitoring report	55
4.4.2 Import monitoring report	56
4.4.3 Commercial monitoring report	56
CHAPTER 4 ANNEXES	58
4.1 External, import, and commercial monitoring: wheat flour monitoring plan	58
4.2 External monitoring: audit and inspection	59
4.3 Fortification standards for flour	62
4.3.1 Comparison of micronutrient content of flour to fortification standard	63
4.3.2 Critical issues to consider when reviewing analytical results of micronutrients	63
4.4 Overview of sample collection, preparation, and analysis for regulatory monitoring	68
4.5 Import monitoring	69
4.5.1 Sample of import monitoring form	69
4.5.2 Sample report of import inspection	69
4.5.3 Verifying flour and premix consignments at an import site	70
4.6 Commercial monitoring	71
4.6.1 Market overview	71
4.6.2 Sampling plan	71
4.6.3 Sample collection form for commercial monitoring	72
REFERENCES	73
CHAPTER 5	75
CONSUMPTION MONITORING	75
5.1 Introduction	75
5.1.1. Considerations for assessing consumption monitoring	75
5.2 Indicator: fortified flour coverage	77
5.3 Indicator: micronutrient content of fortified flour	79
5.4 Indicator: fortified flour intake	80
5.5 Indicator: micronutrient intake from fortified flour	81
5.6 Reporting	82
5.7 Conclusions	83
CHAPTER 5 ANNEXES	83
5.1 Sample consumption monitoring questions that can be added to surveys	83
5.2 Sample consumption monitoring questionnaire applied in South Africa for maize meal	84
5.3 Sample consumption monitoring questionnaire applied in Nigeria to assess fortified flour intake of flour-based foods	86

5.4	Adjustments to consumption monitoring survey where the focus is on flour-based foods	90
5.4.1	Adjustments to assess fortified flour coverage using flour-based foods instead of flour	92
5.4.2	Adjustments to assess the micronutrient content of fortified flour using flour-based foods instead of flour	93
5.4.3	Adjustments to assess fortified flour intake using flour-based foods instead of flour	95
5.4.4	Additional step: Estimate the amount of flour in flour-based foods	95
5.4.5	Adjustments to assess micronutrient intake from fortified flour using flour-based foods instead of flour	95
5.5	Planning for consumption monitoring	96
	Planning consideration 1.	
	What target populations will be surveyed?	96
	Planning consideration 2.	
	Will this be a stand-alone survey, or will the questions be integrated into another survey?	
	How many households or individuals need to be surveyed?	97
	Planning consideration 3.	
	What types of food will be assessed (e.g. flour and/or flour-based foods)?	97
	Planning consideration 4.	
	Will food samples be collected and analysed? If so where, how many, and how will the sampling take place?	98
	Planning consideration 5.	
	What nutrients will be measured in food samples?	99
	Planning consideration 6.	
	What laboratories will measure the nutrients in food samples?	99
5.6	How to measure the recommended fortified flour coverage indicator	100
	Step 1. Apply fortified flour coverage questions in survey and collect samples at household level	100
	Step 2. Administer qualitative or quantitative test to flour samples	100
	Step 3. Calculate fortified flour coverage results	101
	Step 4. If the programme has coverage goals, compare results to goals	101
	Step 5. Prepare a report with results	101
5.7	How to measure the recommended indicator for micronutrient content of fortified flour	102
