Preface	xii
Acknowledgements	xiii
Contributors	xiv
Declaration of interests	xvi
Abbreviations and acronyms	xvii
<b>1 Introduction</b>	<b>1</b>
1.1 FAO/WHO series of guidelines on microbiological risk assessment	1
1.2 Scope and purpose of these guidelines	2
1.3 Guiding the reader through this document	3
1.4 How to begin with risk assessment	4
<b>Part 1 General considerations</b>	<b>5</b>
<b>2 Risk assessment in context</b>	<b>7</b>
2.1 Risk analysis framework	7
2.2 Risk management	8
2.3 Risk assessment	10
2.4 Risk communication	12
<b>3 Food microbiological risk assessment (MRA)</b>	<b>14</b>
3.1 Properties and principles of best-practice risk assessments	14
3.2 Purpose and scope of MRA	16
3.2.1 Estimating baseline risk	17
3.2.2 Comparing risk management strategies	18
3.2.3 Research-related study or model	20
3.3 The role of best- and worst-case scenarios	20
3.4 Assessing the results of a risk assessment	21
3.5 Choosing the type of risk assessment to perform	23
3.5.1 Consistency	25
3.5.2 Resources	25
3.5.3 Theory or data limitations	27
3.5.4 Breadth of application	27
3.5.5 Speed	27
3.5.6 Transparency	28
3.5.7 Stage of analysis	28
3.5.8 Responsiveness	28

<b>4</b>	<b>Hazard identification</b>	<b>30</b>
4.1	Objectives of hazard identification	30
4.2	The process of hazard identification	31
4.3	Data sources for hazard identification	33
<b>5</b>	<b>Exposure assessment</b>	<b>34</b>
5.1	The process of exposure assessment	34
5.2	Modelling approaches	36
5.2.1	Introduction	36
5.2.2	Qualitative and semi-quantitative exposure assessment	38
5.2.3	Quantitative exposure assessment	38
5.2.4	Modelling the production-to-consumption pathway	39
5.2.5	Consumption	51
<b>6</b>	<b>Hazard characterization</b>	<b>58</b>
6.1	The process of hazard characterization	58
6.2	Descriptive characterization	59
6.2.1	Information related to the disease process	60
6.2.2	Information related to the hazard	63
6.2.3	Information related to the host	64
6.2.4	Information related to the food matrix	65
6.2.5	Relationship between the dose and the response	65
6.3	Quantifying the dose-response relationship	67
<b>7</b>	<b>Risk characterization</b>	<b>70</b>
7.1	The process of risk characterization	70
7.2	Qualitative risk characterization in risk assessment	71
7.2.1	Introduction	71
7.2.2	Performing a qualitative risk characterization	72
7.3	Semi-quantitative risk characterization	75
7.3.1	Introduction	75
7.3.2	Performing a semi-quantitative risk characterization	76
7.4	Quantitative risk characterization	81
7.4.1	Introduction	81
7.4.2	Quantitative risk measures	81
7.4.3	Integration of hazard characterization and exposure assessment	89
<b>8</b>	<b>Examples</b>	<b>92</b>
8.1	Examples of qualitative and semi-quantitative risk assessments	92
8.1.1	Risk assessment for main determinants of antibiotic resistance in South East Asia	92

8.1.2	Faecal pollution and water quality, WHO	94
8.1.3	Drinking water guidelines, Australian National Health and Medical Research Council	95
8.1.4	BSE/TSE risk assessment of goat milk and milk-derived products, EFSA	96
8.1.5	Geographical BSE cattle risk assessment, EFSA	97
8.1.6	Risk profile of <i>Mycobacterium bovis</i> in milk, New Zealand Food Safety Authority	98
8.1.7	Seafood safety using RiskRanger, Australia	100
8.1.8	Animal and animal product import risk assessment methodology, Biosecurity Australia	102
8.1.9	Multicriteria-based ranking for risk management of foodborne parasites, FAO/WHO	104
<b>8.2</b>	<b>Examples of quantitative risk assessments</b>	<b>105</b>
8.2.1	<i>E. coli</i> O157:H7 in tenderized vs non-tenderized beef, FSIS	105
8.2.2	<i>Listeria monocytogenes</i> in ready-to-eat foods, FAO/WHO	106
8.2.3	Shiga toxin-producing <i>E. coli</i> O157 in steak tartare patties, Netherlands	107
8.2.4	<i>Vibrio vulnificus</i> in raw oysters, FAO/WHO	108
8.2.5	Histamine in fish sauce, Thailand	109
8.2.6	Pathogens in fresh vegetables, Rwanda	110
8.2.7	<i>Campylobacter</i> and <i>Salmonella</i> in chicken meals, Senegal	112
8.2.8	<i>Vibrio parahaemolyticus</i> in bloody clams, Thailand	112
8.2.9	<i>Salmonella</i> in table eggs, EFSA	114
8.2.10	<i>Cryptosporidium</i> in water – a cost-benefit analysis, United States of America	116

## Part 2 Detailed considerations

119

---

<b>9</b>	<b>Qualitative and semi-quantitative risk assessment: further considerations</b>	<b>121</b>
<b>9.1</b>	<b>Qualitative risk assessment</b>	<b>121</b>
9.1.1	The value and uses of qualitative risk assessment	123
9.1.2	Qualitative risk assessment in food safety	124
9.1.3	Characteristics of a qualitative risk assessment	125
<b>9.2</b>	<b>Semi-quantitative risk assessment</b>	<b>127</b>
9.2.1	Uses of semi-quantitative risk assessment	127
9.2.2	Characteristics of a semi-quantitative risk assessment	129
9.2.3	Limitations of semi-quantitative risk assessment	130

<b>10</b>	<b>Data</b>	<b>133</b>
10.1	<b>Literature (primary and/or meta-analysis)</b>	<b>137</b>
10.1.1	Analytical epidemiological studies	138
10.1.2	Microbiological studies of prevalence and counts/concentrations	138
10.1.3	Cross-contamination data during food processing	140
10.1.4	Food handling and preparation	140
10.1.5	Human volunteer feeding studies	142
10.1.6	Animal studies	144
10.1.7	<i>In vitro</i> studies	145
10.1.8	Biomarkers	146
10.2	<b>National and international surveillance data</b>	<b>148</b>
10.2.1	Food safety rapid alert systems	148
10.2.2	Outbreak data	150
10.2.3	Foodborne disease surveillance and annual health statistics	153
10.2.4	Systematic food contamination monitoring surveys	155
10.2.5	National food production statistics	157
10.2.6	National consumption databases	157
10.2.7	National population census	160
10.3	<b>Industry data</b>	<b>160</b>
10.3.1	Description of product and supply chain	163
10.4	<b>Unpublished data</b>	<b>164</b>
10.5	<b>Data gaps</b>	<b>164</b>
10.5.1	Model restructuring	166
10.5.2	Surrogate data	166
10.5.3	Expert knowledge elicitation (EKE)	167
10.5.4	Collection of new data	169
10.6	<b>Recommendations on data collection and organization</b>	<b>170</b>
10.6.1	Searching for data	170
10.6.2	Selection of data	171
10.6.3	Formatting of data	171
10.6.4	Level of detail recorded	172
10.6.5	Combining data from different sources	173
10.6.6	Presentation of data	173
<b>11</b>	<b>Quantitative modelling approaches</b>	<b>175</b>
11.1	<b>Deterministic</b>	<b>175</b>
11.2	<b>Stochastic</b>	<b>176</b>
11.3	<b>Monte Carlo simulation</b>	<b>177</b>
11.4	<b>Other model classification schemes</b>	<b>178</b>

<b>12</b>	<b>Predictive microbiology</b>	<b>180</b>
12.1	<b>Modelling microbial growth and inactivation</b>	<b>181</b>
12.1.1	Microbial ecology of foods	181
12.1.2	Predictive microbiology	184
12.1.3	Model types and modelling tools	185
12.2	<b>Application of predictive microbiology within exposure assessment</b>	<b>187</b>
12.2.1	Range of model applicability	187
12.2.2	Spoilage microbiota	188
12.2.3	Sources of variability and uncertainty	189
<b>13</b>	<b>Dose-response</b>	<b>192</b>
13.1	<b>The infectious disease processes</b>	<b>192</b>
13.1.1	Infection and illness	194
13.1.2	Sequelae and mortality	194
13.2	<b>Modelling concepts</b>	<b>195</b>
13.2.1	The particulate nature of the inoculum	195
13.3	<b>Selection of models</b>	<b>195</b>
13.3.1	Dose-infection models	197
13.3.2	Dose-illness models	197
13.3.3	Sequelae and mortality	197
13.4	<b>Extrapolation</b>	<b>198</b>
13.4.1	Low dose extrapolation	198
13.4.2	Extrapolation in the pathogen-host-matrix triangle	198
13.5	<b>Dose-response model fitting approaches</b>	<b>201</b>
<b>14</b>	<b>Variability and uncertainty</b>	<b>203</b>
14.1	<b>Variability</b>	<b>203</b>
14.2	<b>Uncertainty</b>	<b>206</b>
14.3	<b>Uncertainty analysis</b>	<b>208</b>
14.4	<b>Uncertainty and variability together</b>	<b>209</b>
