**Third-party materials.** If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

**General disclaimers.** The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

This review was conducted in the scope of preparation of the 2018 WHO Guideline on Health policy and system support to optimize community health worker programmes. Updates to the Guideline, which are not explicitly planned at the date of this publication, will include evidence generated subsequent to the completion of this review.

# Acknowledgments

The development of this report was coordinated by Giorgio Cometto (Global Health Workforce Alliance and Health Workforce Department, WHO), under the oversight of James Campbell (Director, Health Workforce, and Executive Director, Global Health Workforce Alliance, WHO). The analyses and the development of the contents of the report were led by Kerry Scott, Sarah Beckham, Margaret Gross, George Pariyo, Krishna Rao and Henry Perry (Johns Hopkins Bloomberg School of Public Health, United States of America).

The authors would like to express their appreciation for the helpful contributions by Dena Javadi (Alliance for Health Policy and Systems Research, WHO) and Elie Akl (American University in Beirut) for their helpful comments and inputs in the conceptualization and quality assurance of this analysis.

This study was funded by Norad, through grants managed by the Alliance for Health Policy and Systems Research and the Global Health Workforce Alliance partnerships hosted and administered by the World Health Organization.
