The public health research agenda on infodemic management was the main outcome of the first WHO global infodemiology conference, which took place online between 29 June and 21 July 2020, with follow-up research question prioritization exercises through October 2020. This document was produced by the World Health Organization (WHO) Department of Global Infectious Hazard Preparedness.

The conference and research agenda development were led by Tim Nguyen and Tina Purnat of WHO and Elisabeth Wilhelm of the US Centers for Disease Prevention and Control (US CDC). Their work was directed by the WHO COVID-19 Infodemic Management Pillar Lead, Sylvie Briand, who is Director of the WHO Department of Global Infectious Hazard Preparedness.

The organizing team particularly wishes to acknowledge the support and participation of the Africa Centres for Disease Control and Prevention (Africa CDC); the Chinese Center for Disease Control and Prevention (China CDC); US Centers for Disease Prevention and Control (US CDC); and the European Centre for Disease Prevention and Control (ECDC).

WHO is grateful for the work and contributions from experts from all over the world who participated as expert panellists, keynote speakers, facilitators and chairs in the global conference.
