Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

Contents

Acknowledgements	vi
Financial support	vi
Abbreviations	vii
Objectives of the manual	1
1. Surveillance of congenital anomalies	2
Introduction	2
The purpose of congenital anomalies surveillance	2
Types of surveillance programmes	3
Congenital anomalies: definitions	3
2. Planning activities and tools	6
Logic models	6
Partners and funding	6
Legislation	9
Privacy and confidentiality issues	9
Data dissemination	10
Communicating with parents	11
3. Approaches to surveillance	12
Population coverage	12
Case ascertainment	15
Case finding	17
Case inclusion	17
Description formats for congenital anomalies	17
Age of inclusion	19
Inclusion of pregnancy outcomes	21
Coding system	21
Examples of inclusion criteria for population-based surveillance	23
Examples of inclusion criteria for hospital-based surveillance	24
Examples of exclusion criteria for both population- and hospital-based surveillance	24
Core ascertainment variables	25
Data collection methods and tools	27
Data management and protocols	27
Data collection and management	29

4. Diagnosing congenital anomalies.....	33
Lists of selected external and internal congenital anomalies to consider for monitoring	33
Congenital anomalies of the nervous system: Neural tube defects	34
Congenital anomalies of the nervous system: Microcephaly	55
Congenital anomalies of the ear	58
Congenital heart defects: Prenatal diagnosis and postnatal confirmation.....	62
Orofacial clefts.....	84
Congenital anomalies of the digestive system.....	95
Congenital anomalies of the genital and urinary organs	105
Congenital anomalies and deformations of the musculoskeletal system	112
Congenital anomalies and deformations of the musculoskeletal system: Limb reduction defects/limb deficiencies.....	116
Abdominal wall defects.....	141
Chromosomal abnormalities.....	147
5. Congenital infectious syndromes	150
Congenital rubella syndrome (CRS).....	151
Congenital syphilis.....	156
Congenital cytomegalovirus (cCMV)	159
Congenital Zika syndrome (CZS)	162
6. Coding and diagnosis	168
Coding of congenital anomalies.....	168
International Classification of Diseases	168
ICD-10 modifications	169
Personnel responsible for diagnosing and coding.....	169
Effect of the certainty of diagnosis on coding.....	170
Coding possible and confirmed diagnoses	170
Coding multiple congenital anomalies	170
Use of codes for surveillance, data analysis and presentation.....	170
7. Primer on data quality in birth defects surveillance.....	173
Why data quality matters.....	173
A surveillance scenario.....	173
Data that are “fit for use”.....	175
SMART and SMARTER goals	175
General good data strategies and practices	177
Key characteristics of data quality in public health surveillance	178

Quality data come from quality processes.....	179
Processes must be made visible	179
Quality and “waste” in surveillance.....	182
Simple tools to improve data quality.....	184
Concluding remarks	186
References.....	187
Glossary of terms	191
Appendix A.....	201
Appendix B	202
Appendix C.....	210
Appendix D.....	213
Appendix E.....	215
Appendix F.....	216
Appendix G.....	217
Appendix H.....	219
Appendix I.....	223
Appendix J.....	225
Appendix K.....	226

Acknowledgements

This manual is a collaborative effort between the World Health Organization (WHO), the National Center on Birth Defects and Developmental Disabilities (NCBDDD) from the United States Centers for Disease Control and Prevention (CDC) and the International Clearinghouse for Birth Defects Surveillance and Research (ICBDSR).

For their technical input in the preparation of this quick reference handbook, we would like to acknowledge the staff of the NCBDDD, ICBDSR and WHO, particularly the following individuals (in alphabetical order): Mr James K Archer, Dr Jose F Arena, Dr Alejandro Azofeifa, Dr Robert J Berry, Dr Jan Ties Boerma, Dr Lorenzo Botto, Dr Marie Noel Brune Drisse, Ms Grace Davis, Dr Margaret Davis, Dr Luz Maria De-Regil, Dr Pablo Duran, Ms Alissa Eckert, Dr Marcia Feldkamp, Dr Alina Flores, Dr Jaime Frias, Dr Shona Goldsmith, Dr Melba Filimina Gomes, Dr Boris Groisman, Mr Dan J Higgins, Dr Margaret Honein, Ms Jennifer Hulse, Dr Vijaya Kancherla, Ms Christina Kilgo, Dr Eve Lackritz, Dr Ornella Lincetto, Dr Cara Mai, Dr Elizabeth Mary Mason, Dr Pierpaolo Mastroiacovo, Dr Mario Merialdi, Dr Cynthia Moore, Dr Allisyn Moran, Dr Joseph Mulinare, Dr Teresa Murguia de Sierra, Dr Maria Neira, Dr Richard Olney, Dr Mina Patel, Dr Juan Pablo Pena-Rosas, Dr Nelangi Pinto, Dr Vladimir B Poznyak, Dr Ingrid Rabe, Dr Hilda Razzaghi, Dr Francoise Renaud, Dr Lisa Rogers, Dr Nathalie Roos, Dr Jorge Rosenthal, Dr Csaba Siffel, Dr Haley Smithers-Sheedy, Dr Joseph Sniezek, Dr Gretchen Stevens, Dr Melanie Taylor, Dr Marleen Temmerman, Ms Diana Valencia, Dr Claudia Vellozzi, Dr Severin Von Xylander, and Dr Jennifer Williams.

The findings and conclusions in this manual are those of the authors and do not necessarily represent the views of the U.S. Centers for Disease Control and Prevention.

Financial support

WHO thanks the United States Centers for Disease Control and Prevention, especially the National Center on Birth Defects and Developmental Disabilities, for providing financial support for the publication of this manual as part of the cooperative agreement 5 E11 DP002196, *Global prevention of noncommunicable diseases and promotion of health*. Supported in part by contract from Task Force for Global Health to the International Center on Birth Defects (ICBD) of the ICBDSR. We gratefully acknowledge and thank the United States Agency for International Development for providing financial support for this work.
