<b>Acknowledgements.....</b>	<b>vi</b>
<b>Acronyms .....</b>	<b>vii</b>
<b>Definitions .....</b>	<b>viii</b>
<b>Introduction to the toolkit.....</b>	<b>1</b>
<b>1 Module 1: Understanding gender, sex and intersectionality and why it matters for infectious diseases of poverty.....</b>	<b>3</b>
1.1 What are the key concepts you need to know to use this toolkit? .....	5
1.2 Why is intersectional gender analysis important in research on infectious diseases of poverty? .....	8
1.3 Role and importance of gender and intersectionality in relation to infectious diseases of poverty .....	9
1.4 Intersecting positionalities and the inner circle .....	10
1.4.1 Influences on health-related decision-making.....	10
1.4.2 Social and environmental determinants shape infectious diseases of poverty.....	11
1.5 The outer circles: how culture and context shape experience of disease and health service delivery.....	12
1.5.1 Disease experience .....	12
1.5.2 Health service delivery.....	15
1.6 Taking an intersectional approach to gender analysis within the toolkit.....	18
1.7 Engaging stakeholders throughout the research process.....	19
<b>2 Module 2: Getting to grips with how to approach intersectional gender analysis for research on infectious diseases of poverty .....</b>	<b>21</b>
2.1 Approaches to intersectional gender analysis within research on infectious diseases of poverty .....	23
2.1.1 Situating research along the gender assessment scale .....	23
2.1.2 Overview of intersectional gender analysis activities .....	26
<b>3 Module 3: Gender considerations within the design and development of research: data disaggregation and gender frameworks .....</b>	<b>31</b>
3.1 Using gender frameworks as analytical guides .....	33
3.1.1 Gender frameworks for research on infectious diseases of poverty .....	36
3.2 Data disaggregation as an entry point for further understanding .....	38
3.3 Rationale for selection of social stratifiers for intersectional gender analysis .....	40

<b>4 Module 4: Gender considerations within the design and development of research: developing gender analysis questions .....</b>	<b>43</b>
4.1 Intersectional gender analysis questions as entry points for further understanding .....	45
4.1.1 Developing gender analysis questions .....	46
4.1.2 Developing an intersectional gender analysis matrix .....	48
4.1.3 Intersectional gender analysis questions for research on infectious diseases of poverty....	50
4.2 Developing gender-sensitive indicators .....	53
4.2.1 Incorporating intersectional gender analysis questions into data collection tools .....	55
<b>5 Module 5: Research methods to transform inequitable gender norms .....</b>	<b>61</b>
5.1 Why transform inequitable gender norms through research?.....	63
5.2 Why conventional research methods might not work .....	63
5.3 Participatory research methods to transform inequitable gender norms.....	65
5.3.1 Participatory action research as a catalyst for change.....	69
5.3.2 Participatory health research and the links to feminist principles.....	72
5.4 Indicators for transformative change .....	73
5.5 Alternative methods to measure change: Most Significant Change techniques.....	75
<b>6 Module 6: Gender considerations within the data collection process.....</b>	<b>77</b>
6.1 Including intersectional gender-sensitive questions within data collection tools.....	79
6.2 Understanding how the data collection process itself can be imbued with power relations and biases .....	79
6.2.1 Who participates as respondents? .....	80
6.2.2 When is data collected and from where? .....	81
6.2.3 Who is present during data collection? .....	83
6.2.4 Who collects and analyses data? .....	83
6.3 Consider ways in which underlying gender power relations can be challenged and progressively changed during research process.....	86
<b>7 Module 7: Analysing research data using an intersectional gender lens.....</b>	<b>89</b>
7.1 Preparing research to analyse data through an intersectional gender lens .....	91
7.2 Gender analysis of secondary quantitative data.....	92
7.3 Analysing quantitative research data using an intersectional gender lens.....	94
7.3.1 Conducting intersectional sex-disaggregated and/or sex-specific analyses .....	95
7.3.2 Using gender variables to conduct an intersectional gender analysis.....	98
7.3.3 Classifying respondents to facilitate intersectional gender analysis.....	101
7.3.4 Analysing quantitative data through an intersectional gender lens.....	102
7.3.5 Interpreting quantitative data through an intersectional gender lens .....	103
7.4 Analysing qualitative research data using an intersectional gender lens .....	104
7.4.1 Designing the sample to facilitate intersectional gender analysis within qualitative research .....	104
7.4.2 Approaches to intersectional gender analysis within qualitative research .....	105
7.4.3 Going beneath the surface in qualitative analysis .....	107
7.5 Conducting mixed methods intersectional gender analysis .....	108

<b>8 Module 8: Incorporating an intersectional gender lens into implementation research on infectious diseases of poverty .....</b>	<b>109</b>
8.1 The importance of intersectional gender analysis within implementation research on infectious diseases of poverty .....	111
8.2 Role and importance of community engagement within implementation research on infectious diseases of poverty .....	114
8.3 Incorporating a gender lens into implementation research on infectious diseases of poverty .....	116
8.3.1 Incorporating gender analysis questions into implementation research on infectious diseases of poverty .....	116
<b>9 Module 9: Gender considerations within the dissemination and reporting of infectious disease research .....</b>	<b>109</b>
9.1 Thinking about gender and intersectionality after the research is completed .....	125
9.1.1 Avoiding common pitfalls when conducting gender analysis that may bias research results and reporting .....	126
9.2 Creating gender-sensitive reports .....	128
9.3 Ongoing dissemination, reporting and uptake of findings .....	129
9.4 Engaging stakeholders within the reporting and dissemination process .....	130
<b>10 Final remarks .....</b>	<b>131</b>
<b>11 References .....</b>	<b>135</b>

This Toolkit, and its pilot process at country level, was developed and led by the UNICEF/UNDP/World Bank/WHO Special Programme for Research and Training in Tropical Diseases (TDR), under the technical coordination of Mariam Otmani del Barrio (TDR Scientist), and overall guidance of John Reeder (TDR Director). Development of this first edition of the Toolkit was supported by TDR core contributions.

The Toolkit was prepared by a core writing team composed of Rosemary Morgan (Johns Hopkins Bloomberg School of Public Health, USA), Chandani Kharel (HERD International, Nepal), Laura Dean (Liverpool School of Tropical Medicine, UK) and Mariam Otmani del Barrio (TDR). Responsibility for views expressed and any errors of fact or judgement rests with the core writing team.

We would like to thank Soumya Swaminathan (WHO Chief Scientist) and Diah S. Saminarsih (Senior Adviser on Gender and Youth, Office of the WHO Director-General) for their support during the toolkit development process.

We are very grateful to the following individuals who contributed to the peer review process:

External experts who contributed their technical advice during the 2018 TDR Expert Group Meeting on Gender and Intersectionality in Research on Infectious Diseases, when the initial draft of the Toolkit was presented, and/or with constructive review comments in subsequent versions of the document: Pascale Allotey (United Nations University-IIGH, Malaysia), Sarah Hawkes (University College London, United Kingdom of Great Britain and Northern Ireland), Sassy Molyneux (KEMRI-Wellcome Trust Research Programme, Kenya), Lenore Manderson (University of the Witwatersrand, South Africa), Jeremiah Chikovore (Human Sciences Research Council, South Africa), Moses Kelly Kumwenda (University of Malawi, Malawi), Salome Atieno Bukachi (University of Nairobi, Kenya), Emma Fulu (The Equality Institute, Australia), Oswaldo Montoya Telleria (MenEngage Alliance), Sabine Oertelt-Prigione (Radboud University Medical Center, The Netherlands), Raman Preet (Umeå University, Sweden), Veena A. Satyanarayana (National Institute of Mental Health and Neuro Sciences, India), Claire Somerville (The Graduate Institute Geneva, Switzerland) and Teresa Soop (SIDA, Sweden). We also appreciate the support and external review provided by Carmen Vives Cases (University of Alicante, Spain), Barbara Ngwenya (University of Botswana, Botswana), Ian D. Graham (University of Ottawa, Canada), Inge Klinge (Maastricht University, The Netherlands), Cara Tannenbaum (University of Montreal, Canada), Florencia Luna (Latin American University of Social Sciences, Argentina), Olena Hankivsky (The University of Melbourne, Australia), Kate Hawkins (Pamoja Communications) and Shirin Heidari (GENDRO Network).

We would also like to acknowledge contributions and comments from WHO colleagues: Lale Say, Andreas Reis, Doris Chou, Avni Amin, Kabir Sheikh, Veloshnee Govender, Mary Manandhar, Christina Catherine Pallitto, Veronica Magar, Pamela Mbabazi and Antonio Montresor; and TDR colleagues: Bernadette Ramirez, Florence Fouque, Annette Kusel, Eddie Kamau, Olumide Ogundehunsi, Pascal
