Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

The views expressed herein do not necessarily reflect the views of the WHO, IAEA or their respective Member States. The use of particular designations of countries or territories does not imply any judgement by the WHO or IAEA, as to the legal status of such countries or territories, of their authorities and institutions or of the delimitation of their boundaries.

Dotted lines on maps represent approximate border lines for which there may not yet be full agreement. The mention of names of specific companies or of certain manufacturers' products (whether or not indicated as registered) does not imply any intention to infringe proprietary rights, nor should it be construed as an endorsement or recommendation by the WHO or IAEA in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters. Unless otherwise indicated the copyright lies with the WHO or IAEA or is published under licence, or with permission from the copyright owners.

All reasonable precautions have been taken by the IAEA and WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the IAEA or WHO be liable for damages arising from its use.

Acknowledgements

The Secretariat thanks the UNICEF/UNDP/World Bank/WHO Special Programme for Research and Training in Tropical Diseases (TDR) based at the World Health Organization and its director, Dr John Reeder, as well the Joint FAO/IAEA Division of Nuclear Techniques in Food and Agriculture and its director, Mr Qu Liang, and the Department of Technical Cooperation for Latin America and Caribbean of IAEA and its Section Head, Mr Raül Ramirez Garcia, for having allowed the development of this work. The authors also express their sincere gratitude to Makiko Kitamura, Communication Officer in TDR for the help in the design and layout of the final document, and to all collaborators from both agencies' operational units and programmes for their feedback, support and advice. This document was developed through an extensive consultation process, including an advisory committee covering different disciplines. Declarations of interest were provided by all experts as required by WHO and no conflicts of interest were found.

Table of Contents

Abstract	10
Foreword.....	12
Chapter 01 Framework for the implementation of the sterile insect technique (SIT) for <i>Aedes</i> control	17
1.1 Introduction	18
1.2 Key framework components	21
1.2.1 Making the decision to embark on an SIT programme	22
1.2.2 Testing and implementing SIT	23
Chapter 02. Framework for health and environmental risks assessment	31
2.1 Introduction	32
2.2 Theoretical planning and risk assessment process	34
2.2.1 Planning	35
2.2.2 Problem formulation	35
2.2.3 Analysis of hazard and exposure.....	35
2.2.4 Risk characterization	35
2.3 Risk planning for SIT against <i>Aedes</i> mosquitoes.....	36
2.4 Risk assessment for <i>Aedes</i> SIT.....	38
2.4.1 Problem formulation	38
2.4.2 Risk analysis for <i>Aedes</i> SIT	40
2.4.3 Risk characterization for <i>Aedes</i> SIT in a likelihood-consequence matrix.....	41
2.5 Risk communication for <i>Aedes</i> SIT	43
2.6 Risk management for <i>Aedes</i> SIT	44
2.7 Risk assessment responsibilities and governance	46
2.8 Risk analysis checklist	47
Chapter 03. Permits and authorization pathways.....	49
3.1 Introduction	50
3.2 Different levels of authorization pathway	51
3.2.1 Four phases of development before license	51
3.2.2 Development of the technology: Scale-up and additional authorizations.....	53
3.3 SIT applied to mosquitoes and existing authorizations/regulations (past 10 years)	56
3.3.1 Montenegro: Importation of irradiated sterile mosquitoes	56
3.3.2 Germany: Importation of irradiated sterile mosquitoes	57
3.3.3 France: Experiments on the island of La Réunion	57

3.3.4 Italy: Trial with sterile mosquitoes	58
3.3.5 Other trials	58
3.4 The next steps in permits and authorization pathways for <i>Aedes</i> SIT	62
Chapter 04. Mass production and release of sterile male <i>Aedes</i>	65
4.1 Background	66
4.2 Strain selection and colonization	67
4.3 Mass production	68
4.4. Sterilization	70
4.5. Transport and release	71
4.6. Quality control	72
4.7 Guidelines and SOPs	73
4.8 Ongoing SIT projects	74
Chapter 05. Evaluation of entomological efficacy	77
5.1 Introduction	79
5.2 Outline of phase I studies	81
5.2.1 Survival and longevity	82
5.2.2 Mating competition and impact on female fecundity	82
5.2.3 Flight ability	83
5.3 Outline of phase II studies	83
5.3.1 Semi-field evaluations	83
5.3.2 Small-scale pilot field trials	84
5.4 Outline of phase III studies	85
5.5 Outline of phase IV studies	85
5.6 General considerations and guiding principles	86
5.6.1 Defining objectives	86
