Acknowledgments

We are very grateful to the people who contributed to the production of this document under very tight timelines.

We thank Jennifer Gardy, Phillip Welkhoff and Bruno Moonen from the Bill & Melinda Gates Foundation for rapidly convening the various modelling groups to support this analysis. We are grateful to the Malaria Atlas Project team – Daniel Weiss,^{1,2} Samir Bhatt,³ Amelia Bertozzi-Villa^{4,5} and Peter Gething^{1,2} – for the analysis of the impacts of different service disruption scenarios on the burden of malaria. We thank Hannah Slater of PATH for the analysis of malaria seasonality. We are grateful to Jennifer Gardy of the Bill & Melinda Gates Foundation for her considerable contributions to developing the summary graphs and tables from the analytical groups. We thank Melanie Renshaw and Mercy Erskine for information on country distributions of insecticide-treated nets and timing of campaigns.

On behalf of the WHO Global Malaria Programme (GMP), Regional Office for Africa and Regional Office for the Eastern Mediterranean, this work was coordinated by Abdisalan Noor and contributed to by Pedro Alonso, Akpaka Kalu, Jan Kolaczinski, Kimberly Lindblade, Mwalenga Nghipumbwa, Alastair Robb, David Schellenberg and Ghasem Zamani. Further review of the analysis was done by Andrea Bosman, Baba Ebenezer, Khoti Gausi, Elizabeth Juma, Humphrey Karamagi, Steve Kubenga, Spes Ntabagana, Saira Stewart, Erin Shutes and Abdelrahmane Tfeil.

This work was done under the auspices of Workstream 2 (Modelling, Surveillance and Clinical Epidemiology) – one of seven workstreams convened by the Director of GMP, Pedro Alonso, to respond to potential disruptions of malaria services during the COVID-19 pandemic and to develop mitigation mechanisms, while at the same time facilitating the COVID-19 response. We thank the workstreams leadership and the various members for insightful feedback. Report layout, design and production was coordinated by Camille Pillon.

Funding for this work was provided by the Bill & Melinda Gates Foundation.

List of abbreviations

ACTs	artemisinin-based combination therapies
GMP	Global Malaria Programme
IRS	indoor residual spraying
ITNs	insecticide-treated nets
MDA	mass drug administration
<i>pfhrp2</i>	<i>Plasmodium falciparum</i> histidine-rich protein
<i>PfPR</i>	<i>Plasmodium falciparum</i> parasite prevalence
SMC	seasonal malaria chemoprevention
SSA	sub-Saharan Africa
WHO	World Health Organization
