#### WHO technical guidance and specifications of medical devices for screening and treatment of precancerous lesions in the prevention of cervical cancer

# Contents

List of Figures	
List of Tables	I
Acknowledgements	II
Abbreviations	II
Executive Summary	IV
References for executive summary	V
Introduction	1
Background on cervical cancer and treatment of precancerous lesions	
Purpose of the document	
Scope of the document	
Whom this document is intended for	
How to read this document	5
Chapter references	
Section 1 – Screening and Diagnostic Tools	
Chapter 1: Technical guidance and specifications for vaginal specula	
1.1. Background on the speculum	
1.2. Scope of chapter	
1.3. Types of specula for "screen and treat"	
1.4. Operational considerations	
1.5. Quality Management Systems and post-market surveillance	
1.6. Standards and regulatory compliance	
1.7. Key tender/request for quotation specifications for a colposcope	
Chapter references	
Chapter 2: Technical guidance and specifications for HPV In Vitro Diagnostics	
2.1. Scope of chapter	
2.2. Background on HPV in vitro diagnostics	
2.3. Complementary products necessary when using HPV IVDs	
2.4. Quality management systems and post-market surveillance	
2.5. In vitro diagnostic performance	
2.6. Operational Considerations	
2.7. Standards and regulatory compliance	
2.8. Key tender/request for quotation specifications for an HPV IVD	
Chapter references	
Chapter 3: Technical guidance and specifications for acetic acid for use in VIA	
3.1. Scope of chapter	
3.2. Background for visual inspection with acetic acid	
3.3. Materials, equipment and accessories for acetic acid	
3.4. Operational considerations	
3.5. Quality management systems and post-market surveillance	
3.6. Standards and regulatory compliance	
3.7. Key tender/request for quotation specifications for acetic acid for use with VIA	
Chapter references	

Chapter 4: Technical guidance and specifications for colposcope	
4.1. Scope of chapter	
4.2. Background on the colposcope	
4.3. Types of colposcopes	
4.4. Equipment requirements	
4.5. Operational considerations	
4.6. Quality Management Systems and post-market surveillance	
4.7. Standards and regulatory compliance	
4.8. Key tender/request for quotation specifications for a colposcope	
Chapter references	
Section 2 - Treatment technologies	
Chapter 5: Technical guidance and specifications for thermal ablation devices	
5.1. Scope of chapter	
5.2. Background on thermal ablation devices	
5.3. Types of thermal ablation devices	
5.4. Equipment Requirements	
5.5. Operational considerations	
5.6. Quality Management Systems and post-market surveillance	
5.7. Standards and regulatory compliance	
5.8. Key tender/request for quotation specifications for a thermal ablation device	
Chapter references	
Chapter 6: Technical guidance and specifications for a cryosurgical unit	
6.1. Scope of chapter	
6.2. Background for cryotherapy	
6.3. Types of cryotherapy units	
6.4. Equipment requirements	
6.5. Operational considerations	
6.6. Quality Management Systems and post-market surveillance	
6.7. Standards and regulatory compliance	
6.8. Key tender/request for quotation specifications for a cryotherapy device	
Chapter references	102
Chapter 7: Technical guidance and specifications for ESUs used in LLETZ	
7.1. Scope of chapter	105
7.2. Background for ESU and LLETZ	
7.3. Other equipment used in LLETZ	111
7.4. Handling and use	113
7.5. Operational consideration	114
7.6. Quality Management Systems and post-market surveillance	116
7.7. Standards and regulatory compliance	117
7.8. Key tender/request for quotation specifications for an ESU for LLETZ	118
Chapter references	121

Section 3 - Procurement Guidance and further research	
Chapter 8: Procurement guidance for medical devices	
8.1. Nomenclature	
8.2. Incoterms	
8.3. Donations	
Chapter 9: For further research	
Section 4 - Annexes: technical specifications	
Annex 1 – Technical Specifications for specula for "screen & treat"	
Annex 2A – Clinical and analytical performance details for HPV NAT IVDs	
Clinical Performance	
Analytical Performance	
Annex 2B – Technical Specifications for HPV NAT IVDs	
Annex 3 – Technical Specifications for Acetic Acid for VIA	
Annex 4 – Technical Specifications for Colposcopes	
Annex 5 – Technical Specifications for Thermal Ablation Units	
Annex 6 – Technical Specifications for Cryotherapy Units	
Annex 7 – Technical Specifications for ESUs for LLETZ	
Annex 8 – Glossary of terms	
Annex 9 – Declarations of Interest	
Annex 10 – WHO's 4th Global Forum on Medical Devices, December 2018	

# **List of Figures**

Figure 1: Working groups in WHO towards cervical Cancer elimination	
Figure 2: Life course approach to Cervical Cancer to Cervical Cancer Prevention and Control	2
Figure 3: Incidence of cervical cancer in 2018	3
Figure 4: WHO publications complementary to this document	. 6
Figure 5: Insulated speculum with in-built smoke extraction channel (L: Collins, R: Graves)	- 13
Figure 6: Lateral vaginal speculum or retractor	13
Figure 7. Health care provider collecting a specimen for HPV NAT by scraping the cervix	· 24
Figure 8. Self-collection of a specimen for HPV NAT by swabbing the vagina	. 25
Figure 9: Twelve components of a quality management system	. 31
Figure 10: Shapes for probe tips, not specific to thermal ablation (for illustrative purposes only)	- 73
Figure 11: Image of probe-tip illustrating a nipple-tip extrusion	. 73
Figure 12: Image of integrated probe tip, shaft, and handle for a variety of probe tip shapes	- 73
Figure 13: Illustrations of suggested cryotips and dimensions	. 89
Figure 14: Hose and connector/pressure gauge assembly used in cryotherapy	. 90
Figure 15: Image of a standard ESU	108
Figure 16: Different types and sizes of electrodes	. 110
Figure 17: Illustration of the electrical current flowing in a monopolar ESU	. 111

## **List of Tables**

Table 1: Examples of bivalve, self-retaining vaginal specula	
Table 2: Comparison of different HPV NAT IVDs	
Table 3: Items that may be required but not provided to perform HPV testing	
Table 4: Regulatory authority/normative body and risk class for HPV IVDs	
Table 5: Items that may be required to perform VIA	
Table 6: Comparison table of types of colposcopes	
Table 7: Comparison overview of technologies to treat cervical lesions	
Table 8: Comparison between benchtop and handheld thermal ablation devices	
Table 9: Comparison between gas and electrically cooled cryotherapy units	
Table 10: Critical points of CO <sub>2</sub> and N <sub>2</sub> O	
Table 11: Cryo equipment temperature	
Table 12: Required equipment to perform a LLETZ procedure	107
Table 13: Clinical sensitivity and specificity criteria	141
Table 14: Analytical sensitivity criteria	142
Table 15: Intra- and inter-laboratory reproducibility criteria	143

### **Acknowledgements**

The WHO technical guidance and specifications of medical devices for screening and treatment of precancerous lesions in the prevention of cervical cancer was developed under the WHO-led Secretariat to accelerate plans for the elimination of cervical cancer, under the coordination of Adriana Velazquez, lead of Medical Devices and in Vitro Diagnostics team of the Health Products Policy and Standards, of the Access to Medicines and Health Products Division in WHO.

These specifications are the result of a collaboration of experts from different backgrounds and organizations, including WHO, UNFPA, CHAI, and PATH, with funding support from The German Federal Ministry of Health (Bundesministerium für Gesundheit, BMG).

Catherine Behrens, Cai Long and Ying Ling Lin (WHO consultants), along with Marjorie Murray (PATH) for thermal ablation and Minna Soikkeli (UNFPA), for vaginal specula, drafted sections of this document. The general writing, integration and overall document compilation was notably achieved by Martha Gartley and Melissa Leavitt (CHAI).

WHO addresses its sincere gratitude to the following people for their knowledgeable contribution during the development of these technical specifications and for their review of this document:

Mohammed Ameel (NHRSC India), Partha Basu (IARC), Paul Blumenthal (Stanford University and Populations Services International), Miriam Cremer (Cleveland Clinic and Basic Health International), Eunice Lourenco (WHO consultant), Noni Gachuhi (Intellectual Ventures), Babacar Gueye (MOH & SW, Senegal), Karen Hariharan (CHAI), Jose Jeronimo (Peruvian League Against Cancer/ Liga contra el Cancer, Peru), Paolo Lago (Fondazione IRCCS Policlinico San Matteo – WHO Collaborating Centre), Ricky Lu (JHPIEGO), Mauricio Mazo (Basic Health International), Mona Mazgani ( Cancer Clinic, BC, Canada), Miriam Mikhail (Rad-Aid International), Seloi Mogatle (UNFPA), Raul Murillo (Centro Javeriano de Oncología – Hospital Universitario San Ignacio), Nicolas Pallikarakis (INBIT Greece), Groesbeck Parham (University of North Carolina, Chapel Hill), Mercedes Perez Gonzalez (WHO), Colin Pfaff (Baylor College of Medicine, Malawi), Walter Prendiville (IARC), Anita Sands (WHO), Silvia de Sanjose (PATH), Linda Serwaa (UNFPA), Dario Trapani (WHO Consultant), Vivien Tsu (University of Washington), Dinsie Williams (WHO consultant), Safina Yuma (MOH, CD, G, E & C Tanzania), and Laura Alejandra Velez Ruiz Gaitan (WHO Consultant).

Technical editor: Anthony C. Price, Polyglotte Sàrl.

Illustrations and document layout: Studio FFFOG.
