CONTENTS

Foreword vii
Message from the Co-Chairs viii
Contributors and acknowledgements ix
Glossary x
Executive summary xi

CHAPTER 1 **Introduction** 1

CHAPTER 2 **Nursing in a context of broader workforce and health priorities** 5
2.1 Role of the health workforce in achieving the 2030 Agenda 5
2.2 Who is a nurse? 8

CHAPTER 3 **Nursing roles in 21st-century health systems** 11
3.1 Role of nursing in achieving universal health coverage 11
3.2 Role of nursing in dealing with emergencies, epidemics and disasters 15
3.3 Role of nursing in achieving population health and well-being 16

CHAPTER 4 **Policy levers to enable the nursing workforce** 19
4.1 Pre-service education and training 19
4.2 Workforce inflows and outflows 25
4.3 Equitable distribution and efficiency 27
4.4 Regulation 32

CHAPTER 5 **Current status of evidence and data on the nursing workforce** 35
5.1 Nursing workforce availability, composition and distribution 37
5.2 Equity in availability of and access to the nursing workforce 43
5.3 International nurse migration and mobility 47
5.4 Regulation of nursing education and practice 49
5.5 Education and nursing workforce supply 52
5.6 Regulation of employment and working conditions 55
5.7 Governance and leadership 59
5.8 Assessing the current trajectory towards 2030 SDG outcomes 61

CHAPTER 6 **Future directions for nursing workforce policy** 67
6.1 Strengthening the evidence base for planning, monitoring and accountability 68
6.2 Mobility and migration 69
6.3 Developing and supporting the nursing workforce 72
6.4 Building institutional capacity and leadership skills for effective governance 82
6.5 Catalysing investment for the creation of nursing jobs 84
6.6 Research and evidence agenda 87

CHAPTER 7 **Conclusion** 91

Tables

5.1 Number of nurses globally and density per 10 000 population, by WHO region, 2018 38
5.2 Changes in nursing stock due to better data and actual increase between 2013 and 2018 38
5.3 Nurses as a percentage of health professionals (medical doctors, nurses, midwives, dentists and pharmacists), by WHO region 39
5.4 Percentage of female nursing personnel, by WHO region 41
5.5 Density of nursing personnel per income group (2018) 46
5.6 Percentage of nursing personnel foreign born (or foreign trained) per income group 48
5.7 Percentage of responding countries reporting existence of nursing regulations on education and training, by WHO region 50
5.8 Production of graduate nurses, by WHO region and income group 53
5.9 Percentage of countries responding on existence of nursing regulations on working conditions, by WHO region 56
5.10 Leadership and governance indicators: percentage of countries with chief nursing officer position and nursing leadership development programme, by WHO region 60
5.11 Simulation of projected stock of nursing personnel from 2018 to 2030 under three scenarios, by WHO region 63
A2.1 List of 36 indicators used for the *State of the world's nursing 2020* report 111
A2.2 Estimates of shortage of nursing personnel (millions) in countries below the Global Strategy threshold by income level: 2018 and 2030 (three scenarios) 116

Boxes

3.1 Nursing contribution to patient safety 12
3.2 Nurse-led model of community care for ageing populations 14
4.1 Australia: engaging underrepresented populations in the nursing workforce 21
4.2 Cost of nursing education 22
4.3 Addressing the shortage of nurse educators 24
4.4 Global skills partnerships 26
4.5 Examples of economic demand for nurses in high-income countries 27
4.6 Expanding access via nurse prescribing in Poland 28
4.7 Example of a specialist nursing role in the African Region 29
4.8 Rural retention guidelines 31
4.9 Examples of harmonization of education standards and licensure examination 33
5.1 Equity within countries 46
6.1 Scotland health labour market analysis 68
6.2 East, Central and Southern African Health Community: national collaboration on nursing data reporting using NHWA indicators 70
6.3 Germany's approach to managing migration 71
6.4 Technology in nursing education and practice 73
6.5 Pakistan efforts to increase nurse education capacity 75
6.6 Expanding access to community health services in Oman 77
6.7 African Health Profession Regulatory Collaborative 80
6.8 Health worker strikes 81
6.9 Leadership fellowship in the Western Pacific Region 84
6.10 Investing in human capital 86
A1.1 ISCO definitions of nursing personnel 109

Figures

1. Density of nursing personnel per 10 000 population in 2018. xiii
2. Relative proportions of nurses aged over 55 years and below 35 years (selected countries) xiv
3. Projected increase (to 2030) of nursing stock, by WHO region and by country income group xv
4. Average duration (years) of education for nursing professionals, by WHO region xvi
5. Percentage of countries with regulatory provisions on working conditions xvii
6. Percentage of female and male nursing personnel, by WHO region xx
2.1 Global Strategy on Human Resources for Health: strategic objectives and relevance for nursing 7
2.2 Number of distinct nursing titles within each WHO region 9
3.1 Nursing contribution to the triple billion targets 17
4.1 Public policy levers to shape health labour markets 20
5.1 Number of countries with workforce data available in the WHO NHWA (1990–2018) 36
5.2 Proportion of nursing headcount within each occupation group, by WHO region 40
5.3 Percentage of nursing personnel aged below 35 years and 55 years or over, by WHO region 41
5.4 Relative proportions of nurses aged over 55 years and below 35 years 42
5.5 Density of nursing personnel per 10 000 population in 2018. 44
5.6 Regional disparities in density of nursing personnel per 10 000 population (2018) 44
5.7 Density of nursing personnel per 10 000 population by income group (2018). 45
5.8 Percentage of responding countries indicating existence of nursing regulations and standards 50
5.9 Map of nursing education regulation scores, by country. 51
5.10 Average duration (years) of education for nursing professionals, by WHO region 54
5.11 Percentage of countries with regulatory provisions on working conditions 56
5.12 Map of regulation of working conditions score 57
5.13 Percentage of countries with advanced nursing role by level of density of medical doctors per 10 000 population 58
5.14 Association between GCNO and nursing leadership programme and the regulatory environment 60
5.15 Projection of nursing personnel density per 10 000 population in 2030 (global distribution) 62
5.16 Projected increase (to 2030) of nursing stock, by WHO region and by country income group 63
5.17 Estimation of shortages of nursing workforce in 2013, 2018 and 2030 64
A2.1 Number of indicators reported globally for the *State of the world's nursing 2020* report. 112
A2.2 Correlation of education indicators with a multiple correspondence analysis 113
A2.3 Correlation of working condition indicators with a multiple correspondence analysis 114
A2.4 Evolution of global nursing stock (millions) under a "business as usual"scenario and three "increased production of graduate nurses" scenarios, 2018 to 2030 115

Investment in nurses will contribute not only to health-related SDG targets, but also to education (SDG 4), gender (SDG 5), decent work and economic growth (SDG 8).

Tedros Ghebreyesus
Director-General, WHO

Elisabeth Iro
Chief Nursing Officer, WHO

Annette Kennedy
President
International Council of Nurses

Sheila Tlou
