# CONTENTS

Foreword.....	viii
Acknowledgements.....	ix
Abbreviations.....	x
Introduction.....	1
Acute respiratory infections.....	1
Coronaviruses.....	1
Purpose, scope and audience of this document.....	2
Infection prevention and control during health care when COVID-19 is suspected.....	3
Ensuring triage, early recognition and source control.....	3
Application of standard precautions for all patients.....	3
Contact and droplet precautions for people with suspected COVID-19.....	4
Airborne precautions for aerosol-generating procedures for people with suspected novel coronavirus infection.....	4
Modes of transmission definitions.....	5
Managing the epidemic.....	6
Epidemic phases and stages of intervention.....	6
Anticipation.....	6
Early detection.....	7
Containment.....	7
Scenarios of transmission.....	7
Scenario and strategic priorities.....	8
Key clinical and IPC activities for different transmission scenarios.....	10
Ventilation.....	12
Natural ventilation.....	12

Mechanical ventilation.....	14
Hybrid or mixed-mode ventilation.....	14
Advantages and disadvantages of different types of hospital ventilation system: summary.....	15
Proposed hybrid ventilation system for severe and critical wards.....	15
Extraction fan technical requirements.....	16
Installing an air extractor in a patient's room.....	17
<b>Exhausted air.....</b>	<b>18</b>
HEPA filter.....	18
Portable air filtration systems.....	19
Ultraviolet germicidal irradiation.....	20
UVC lamp requirements.....	21
UV lamp installation.....	22
UV light exposure risk.....	22
Testing the ventilation/exhausted air systems.....	23
Proposed ventilation system and exhausted air treatment by area or service: summary.....	23
Description of proposed exhausted air treatment system.....	24
<b>Screening for health-care facilities.....</b>	<b>25</b>
Identification, selection and survey of screening sites.....	25
Location criteria.....	25
Ground characteristics.....	25
Meteorological characteristics.....	25
Existing resources.....	26
Screening basic layout principles.....	26
Screening in new health-care facilities.....	26
Waiting room.....	28
Isolation room.....	28
Establishing a screening area in a tent.....	28
<b>SARI treatment centre.....</b>	<b>32</b>
Site identification, selection and survey.....	32
Location criteria.....	32
Ground characteristics.....	32
Meteorological characteristics.....	32
Existing resources.....	32

<b>Basic layout</b>	<b>33</b>
Minimum requirements for converting an existing building into a severe acute respiratory infection treatment centre	36
Recommended characteristics for selecting finishes and furniture	36
<b>Layout</b>	<b>37</b>
<b>Facilities and services</b>	<b>44</b>
Staff entrance and changing room	44
Triage area	44
Reception	45
Waiting room	45
Sampling room	45
Discharge room	45
Short-stay mild and moderate wards	46
Severe and critical wards, and intensive care units	46
Use of transparent surfaces	47
Establishing a SARI treatment centre in a tent	49
<b>Community facility</b>	<b>51</b>
<b>Surge capacity</b>	<b>52</b>
<b>Implementation of infection prevention and control measures</b>	<b>54</b>
Use of personal protective equipment	54
Surface cleaning and disinfection, materials and equipment for infection prevention and control at the facility level	56
Cleaning staff	56
Cleaning supplies and equipment	57
Environmental cleaning services area	58
General environmental cleaning techniques	59
Conduct visual preliminary site assessment	59
Proceed from cleaner to dirtier	59
Proceed from high to low (top to bottom)	59
Proceed in a methodical, systematic manner	59
Environmental surface cleaning and disinfection	60
Linen management	60
Cleaning and disinfection of biomedical devices	61
Management of dead bodies	61
<b>Laboratory equipment and consumables</b>	<b>63</b>

<b>Water supply</b>	<b>64</b>
Water quality	64
Water quantity	64
Waste zone	65
Wastewater and faecal waste	65
Excreta management	65
<b>Energy</b>	<b>68</b>
Electrical standard	68
Electrical panel	68
Plugs	69
Junctions	69
Cable protection	69
Exiting of buried cables	69
Other enclosures	70
Earth connection	70
Identification of electrical components	71
Equipment: quality and usage requirements	71
Identification rules for a coronavirus centre	72
Choosing the correct equipment	72
Energy consumption	73
Implementation of electrical project	74
Building equipment and power requirements	75
