LIST OF TABLES

Table 3.1. Maternal mortality data records by source type used in generating maternal mortality ratio estimates (MMR, maternal deaths per 100 000 live births) for 2017	17
Table 4.1. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, lifetime risk and proportion of deaths among women of reproductive age that are due to maternal causes (PM), by United Nations Sustainable Development Goal (SDG) region, subregion and other grouping, 2017	35
Table 4.2. Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths and HIV-related indirect maternal deaths, by United Nations Sustainable Development Goal (SDG) region, subregion and other grouping, 2017	37
Table 4.3. Comparison of maternal mortality ratio (MMR, maternal deaths per 100 000 live births) and number of maternal deaths, by United Nations Sustainable Development Goal (SDG) region, subregion and other grouping, 2000 and 2017	41

LIST OF ANNEXES

Annex 1.	Summary description of the 2019 country consultations.....	57
Annex 2.	Measuring maternal mortality	59
Annex 3.	Calculation of maternal mortality during crisis years.....	67
Annex 4.	Methods used to derive a complete series of annual estimates for each predictor variable	69
Annex 5.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, lifetime risk, percentage of HIV-related indirect maternal deaths and proportion of deaths among women of reproductive age that are due to maternal causes (PM), by country and territory, 2017	71
Annex 6.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by World Health Organization (WHO) region, 2017	77
Annex 7.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by WHO region, 2000–2017	79
Annex 8.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by United Nations Children’s Fund (UNICEF) region, 2017	81
Annex 9.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNICEF region, 2000–2017	83
Annex 10.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by United Nations Population Fund (UNFPA) region, 2017	85
Annex 11.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNFPA region, 2000–2017	87
Annex 12.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by World Bank Group region and income group, 2017.....	89
Annex 13.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by World Bank Group region and income group, 2000–2017	91
Annex 14.	Estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), number of maternal deaths, and lifetime risk, by United Nations Population Division (UNPD) region, 2017	93
Annex 15.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by UNPD region, 2000–2017	95
Annex 16.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by United Nations Sustainable Development Goal (SDG) region, subregion and other grouping, 2000–2017	97
Annex 17.	Trends in estimates of maternal mortality ratio (MMR, maternal deaths per 100 000 live births), by country and territory, 2000–2017	99

ACKNOWLEDGMENTS

The Maternal Mortality Estimation Inter-Agency Group (MMEIG) collaborated with Leontine Alkema (leading scientist) and Emily Peterson of the University of Massachusetts Amherst, USA in developing these maternal mortality estimates. The independent external Technical Advisory Group (TAG) reviewed and provided input throughout the process.

From each of the constituent agencies the following individuals were members of the MMEIG:¹

- World Health Organization (WHO): Doris Chou, Ann-Beth Moller and Lale Say.
- United Nations Children's Fund (UNICEF): Liliana Carvajal-Aguirre and Jennifer Requejo.
- United Nations Population Fund (UNFPA): Tapiwa Jhamba.
- The World Bank Group: Charles Kouame, Samuel Mills and Emi Suzuki.
- United Nations Population Division (UNPD, a division of the United Nations Department of Economic and Social Affairs [UN DESA]): Kirill Andreev, Lina Bassarsky, Victor Gaigbe-Togbe and Patrick Gerland.

The members of the TAG provided independent technical advice:

- Saifuddin Ahmed, of Johns Hopkins Bloomberg School of Public Health, United States of America (USA)
- Peter Byass, of the Umeå Centre for Global Health Research, Umeå University, Sweden
- Thomas W. Pullum, of the Demographic and Health Surveys (DHS) Program, ICF, USA. In addition, independent expert consultants for this project were:
- Tim Colbourn, of University College London, United Kingdom of Great Britain and Northern Ireland
- Jeff Eaton, of Imperial College London, United Kingdom
- Alison Gemmill and Stéphane Helleringer, of Johns Hopkins University, USA
- Marie Klingberg Alvin, of Dalarna University/Högskolan Dalarna, Sweden
- Laina Mercer, of PATH, USA
- Helena Nordenstedt, of the Karolinska Institutet, Sweden
- Jon Wakefield, of the University of Washington, USA.

The MMEIG is grateful for the support of a working group on maternal mortality in censuses. This work was funded by the United States Agency for International Development (USAID) through MEASURE
