Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

CONTENTS

Acknowledgements	iv
Acronyms and abbreviations	v
1. Introduction	1
1.1 Optimized supportive care	1
1.2 Optimized supportive care summary	1
1.3 Daily assessment checklist	2
2. Principles of patient management	4
2.1 Systematic assessment and re-assessment of all EVD patients	4
2.2 Vital signs	5
2.3 Physical examination	5
2.4 Fluid status	5
2.5 Laboratory monitoring	6
2.6 Recording and responding to change or abnormal clinical and laboratory parameters	7
3. Fluid resuscitation	8
3.1 Fluid resuscitation in patients with sepsis	8
3.2 Fluid resuscitation in patients with shock	8
3.3 Vasopressors	10
3.4 Daily fluid therapy	12
4. Hypoglycaemia	15
5. Electrolyte management	16
5.1 Hypokalaemia	16
5.2 Hyperkalaemia	17
5.3 Hypomagnesemia	17
5.4 Hypocalcaemia	18
5.5 Hyponatraemia	18
5.6 Hypernatraemia	18
6. Treatment of potential co-infections	19
6.1 Co-infection with malaria	19
6.2 Bacterial co-infection	20
7. Nutrition	21
8. Symptomatic care	22
9. Prevention of complications	24
10. Management of complications	25
10.1 Seizure	25
10.2 Altered mental status and encephalopathy	26
10.3 Haemorrhage	27
10.4 Acute kidney injury	27
10.5 Metabolic acidosis	28
10.6 Hypoxic respiratory failure	29
11. Psychosocial and palliative care	30
References	31
Appendix 1. Key criteria used to assess nutrition and vital signs in children	32
Appendix 2. Management of children with dehydration and gastrointestinal losses – Plan C	33
Appendix 3. Management of shock syndrome in Ebola virus disease	34

ACKNOWLEDGEMENTS

This document was developed by the WHO Emergency Programme Clinical Management Team under the leadership of Dr Janet V. Diaz with special thanks to lead writer, Dr William Fischer and experts from the WHO Emerging Diseases Clinical Assessment and Response Network (EDCARN) and other international partners including the Institut National de Recherche Biomédicale (INRB), the Alliance for International Medical Action (ALIMA) and Médecins sans Frontières (MSF).

WHO thanks the following experts for providing input and review (in alphabetical order).

Dr Neill Adhikari, University of Toronto, Canada; Dr Annick Antierrens, MSF, Belgium; Dr Ian Crozier, United States of America; Dr William Fischer II, University of North Carolina, United States of America; Dr Robert Fowler, University of Toronto, Canada; Dr Bernard Gauzere, France; Dr Shevin Jacob, University of Liverpool, United Kingdom; Dr Richard Kojan, The Alliance for International Medical Action (ALIMA), France; Dr Marie-Claire Kolie, Guinea; Dr Marta Lado, Partners in Health, Liberia; Dr François Lamontagne, Université de Sherbrooke, Canada; Dr Paula Lister University of Queensland, Australia; Dr Pierre Mora, Lariboisière Hospital, France; Dr Sabue Mulangu, INRB, Democratic Republic of the Congo; Dr Srin Murthy, University of British Columbia, Canada; Dr Jean-Jacques Muyembe, INRB, Democratic Republic of the Congo; Dr Armand Sprecher, MSF, Belgium.

WHO would also like to thank the clinicians that attended the Clinical Care Partners Meeting for EVD in Goma, the Democratic Republic of the Congo, 11–12 March 2019, for their additional reviews and input.

ABBREVIATIONS AND ACRONYMS

AG	anion gap
ALIMA	The Alliance for International Medical Action
ALT	alanine transaminase
ASAQ	artesunate-amodiaquine
AST	aspartate transaminase
AVPU	alert, voice, pain, unresponsive scale
BUN	blood urea nitrogen
Ca²⁺	calcium ions
CFR	case fatality rate
Cl⁻	chloride ion
CRT	capillary refill time
D5/10/50	5%/10%/50% dextrose solution
D5LR	5% dextrose in lactated Ringer's
D5W	5% dextrose in water
ECG	electrocardiogram
EDCARN	WHO Emerging Diseases Clinical Assessment and Response Network
EDTA	ethylenediaminetetraacetic acid
ETU	Ebola treatment unit
EVD	Ebola virus disease
GCS	Glasgow coma scale
GI	gastrointestinal
Hb	haemoglobin
HCO₃	bicarbonate
Hct	haematocrit
HR	heart rate
IM	intramuscular
INRB	Institut National de Recherche Biomédicale (Democratic Republic of the Congo)
IO	intraosseous
IV	intravenous
JVP	jugular venous pressure
K	potassium
LNS	lipid-based nutrient supplements
Mg	magnesium
MSF	Médecins sans Frontières

Na	sodium
NS	normal saline
NSAIDs	nonsteroidal anti-inflammatory drugs
PO	per os (orally)
PPE	personal protective equipment
PT/INR	prothrombin time/international normalized ratio
ORS	oral rehydration salts
oSoC	optimized supportive care
RL	Ringer's lactate
RR	respiratory rate
SBP	systolic blood pressure
SpO₂	peripheral oxygen saturation
