# Foreword

Few events have marked humanity as gravely as the influenza pandemic of 1918. With an estimated 50–100 million deaths, it remains one of the deadliest public health events on record.

Our highly interconnected world allows pathogens to spread at lightning speed, increasing the urgency to ensure that all countries are prepared to respond to an infectious disease outbreak wherever it may emerge. The World Health Organization (WHO) works to ensure that all countries, irrespective of their income or development status, have equitable access to the medical and other counter-measures necessary to respond to pandemics.

It is for these reasons that the Pandemic Influenza Preparedness (PIP) Framework holds such importance for public health: it shows that nations can come together and solve the most difficult issues through innovative solutions; that countries will undertake the work needed to strengthen their preparedness capacities; and that partners – public, private and nongovernmental – will sustain their commitment to achieving the highest level of preparedness so that our future global response is founded on solidarity and equity.

I am deeply grateful to all PIP Framework partners that have demonstrated their sustained commitment to this goal. I look forward to continuing this important work in the same spirit of partnership and solidarity.

Tedros Adhanom Ghebreyesus,  
WHO Director-General

# Acknowledgements

WHO thanks all stakeholders that contributed to the successful implementation of the Framework in the past four years.

This includes Member States, the Global Influenza Surveillance and Response System (GISRS), the PIP Advisory Group, influenza vaccine, diagnostic and pharmaceutical manufacturers (Industry), civil society and other organizations. WHO is thankful for the support of the GISRS network, including WHO Collaborating Centres for Influenza (CCs), WHO Essential Regulatory Laboratories (ERLs), WHO H5 Reference Laboratories, and National Influenza Centres (NICs).

We are deeply grateful to Industry and Industry Associations for their support over this time, notably through the payment of the annual Partnership Contribution that funded implementation.

We thank implementing units at WHO country offices, regional offices, and headquarters for facilitating implementation and supporting preparation of this final report.
