Annex 5: Sample format for an incident action plan	63
Annex 6: List of participants EOC-NET working groups meeting 17–19 October 2016	64
Annex 7: List of participants EOC-NET working groups meeting 27–31 March 2017	68

Acknowledgements

The *Handbook for developing a public health emergency operations centre* ("the handbook") was prepared by WHO's Health Emergencies Programme. The handbook is the result of several years' efforts by WHO and its Public Health Emergency Operations Centre Network (EOC-NET) partners. The handbook consists of three separate documents: **Handbook for developing a public health emergency operations centre Part A: Policy, plans and procedures ("the handbook Part A")**; Handbook for developing a public health emergency operations centre Part B: Physical structures, technology, and information systems ("the handbook Part B"); and Handbook for developing a public health emergency operations centre Part C: Training and exercises ("the handbook Part C"). The work and process was coordinated by Dr Jian Li and Mr Paul Cox. More than 200 individuals including EOC-NET experts and WHO staff (at headquarters, regional offices and country offices) were involved in developing the handbook. WHO is grateful to everyone involved for their support and contributions.

The handbook was developed on the basis of the [Framework for a public health emergency operations centre](#)¹ (the Framework), the findings of systematic reviews, and expert consultations. The lists of contributors to the PHEOC systematic reviews and development of the Framework are available in the following documents on the WHO website:

- [A systematic review of public health emergency operations centres \(EOC\), December 2013](#)²
- [Summary report of systematic reviews for public health emergency operations centres. Plans and procedures; communication technology and infrastructure; minimum datasets and standards; training and exercises, July 2015](#)³
- [Framework for a public health emergency operations centre](#)¹

This document, the handbook Part A, was written and revised by Mr William Douglas, with contributions by Mr Paul Cox, Dr Eric Sergienko, Mr Peter Rzeszotarski, Dr Jian Li, Mr David Knaggs, Mr Peng Du, Dr Yan Niu, Ms Senait Fekadu, and experts who participated in the following two EOC-NET working group meetings:
