# AVAILABLE PRODUCTS

Anaesthesia machine	
Breast exam, portable device	
Cardiac catheterization laboratory, mobile	
Cloud application for remote healthcare	
Colposcope for visualization of cervical cancer, mobile	
Continuous Positive Airway Pressure, bubble	
Cooling personal protective equipment for work in hot and humid environments	
Cryosurgery device for cervical cancer treatment and prevention 8	
DICOM gateway for difficult enviroments	
Disinfecting solution and equipment	)
Electrical stimulator for gait correction	
Electrocardiogram, handheld, digital	)
Electrocardiographic measurement, mobile phone application	5
External fixation for bone fracture	1
Hypothermia monitoring bracelet for newborns	5
Infusion rate monitor	5
Multi-slice CT scanner	7
Online platform for building mobile application for a low-resource settings	3
Phototherapy, for jaundice	)
Phototherapy, LED, for jaundice	0
Portable detector for analog radiographic systems	1
Preterm newborn simulator	2
Safety blood lancet	3
Sanitary pads, reusable	4
Sheet, multifunctional disposable biodegradable	5
Steel kit for mass transport of patients	6
Surgical gown,self donning and adjusting	7
Tuberculosis detection kit based on isothermal amplification	8
Ultrasound system, compact	9
Virtual midwife and obstetrician	0
White blood cell counting system	1

### PROTOTYPE PRODUCTS

3D printed prosthetics		 	 	33
Arm support for table activities		 	 	34
Bar code system for inventory		 	 	35
Biometric mobile tools for patient identification		 	 	36
Blood pressure measurement and management, smartphone application, device independent		 	 	37
Bubble CPAP with built-in pulse oximeter		 	 	38
Clinical assessment for children, integrated platform		 	 	39
Connected medical devices		 	 	40
Detection system for malaria		 	 	41
Disease screening and detection using magnetic levitation		 	 	42
Floss pick fastener		 	 	43
Hygienic enema device		 	 	44
Infant incubator		 	 	45
Light microscope for low-income settings		 	 	46
Light scan to determine skin age		 	 	47
Mechanical device for treatment of hemorrhoids		 	 	48
Mobile risk assessment application for pre-eclampsia		 	 	49
Newborn hearing screening device		 	 	50
Newborn resuscitation training device		 	 	51
Open source health platform for reproductive and maternal health		 	 	52
Packaging solution for authentication		 	 	53
Personal protective equipment, breathable		 	 	54
Personal protective equipment, integrated		 	 	55
Phototherapy, portable LED system		 	 	56
Point-of-care hemoglobin test with associated mobile application		 	 	57
Portable autorefractor for eyeglasses prescription		 	 	58
Portable colposcope using mobile health		 	 	59
Portable sterilizer		 	 	60
Portable vaccine refrigerator		 	 	61
Radiographic system, digital		 	 	62
Reusable sanitary napkin		 	 	63
Self-measurement of blood pressure and other vital signs on a smartphone	э	 	 	64
Single incision gasless laparoscopic surgical equipment		 	 	65
Software for efficient utilisation of hospital beds		 	 	66
Tent for emergency setting for tropical and equatorial climates		 	 	67
Trainer for visual inspection with acetic acid		 	 	68
Ultrasound, portable		 	 	69
Ventilator, battery powered		 	 	70
Wearable hand stretcher for post-stroke hand rehabilitation		 	 	71
Web app helper for local microscope images identification and diagnosis.		 	 	72

### Acknowledgements

The call, evaluation, and compilation of submissions for the Compendium were managed by the World Health Organization (WHO) under the coordination of Ms Adriana Velazquez Berumen, Senior Advisor on Medical Devices from the Innovation, Access and Use unit of the Essential Medicines and Health Products department, directed by Dr Suzanne Hill, under the Health Systems and Innovation cluster.

WHO thanks all reviewers and interns who volunteered their time and expertise as well as the Netherlands Ministry of Health, Welfare and Sport, for their financial support for the design of this book.

WHO acknowledges and is most grateful to all that collaborated to help identify potential health technology solutions for global health priorities, and which are listed below:

#### External reviewers:

Firas Abu Dalou, Jordan; Nicholas Adjabu, Ghana; Ahmed Ahidjo, Nigeria; Sizar Akoum, Lebanon; Mohammad Ameel, India; Jackson Amone, Uganda; Renzo Andrich, Italy; Clara Aranda, Mexico; Guillermo Avendaño Cervantes, Chile; Mahfuz Ashraf, Bangladesh; Roberto Ayala, Mexico; Ajai Basil, India; Alusine Bobson Khabia, Sierra Leone; Jagdish Butany, Canada; Cecilia C. Matienzo, Philippines; Saide Calil, Brazil; Mario Castaneda, USA; Goncalo Castro, Switzerland; Benny Chung Ying Zee, China; Nikita Conaul, USA; Melissa Culp, USA; Ugur Cunedioglu, Turkey; Cheer CW Lee, China; Yadin David, USA; Antoni Dedeu, Spain; Mireia Espallargues, Spain; Maria Elena Algorri, Germany; Mureji Fatunde, Nigeria; Mario Forjaz Secca, Mozambique; Sabata Gervasio, Denmark; Keiko Fukuta, Japan; Andrew Gammie, United Kingdom; Renato Garcia, Brazil; Bill Gentles, Canada; German Giles, Argentina; Santiago Gomez, Spain; Inaki Gutierrez-Ibarluzea, Spain; Antonio Hernandez, Colombia; Fred Hosea, Ecuador; David Huser, Switzerland; Ernesto Idanza, Italy; Gabriela Jimenez, Belgium; Roberta Joppi, Italy; Thomas Judd, USA; Godfrey Katabaro, Tanzania; Michael Kawooya, Uganda; Brendon Kearney, Australia; Einstein Kesi, India; Baset Khalaf, South Africa; Niranjan Khambete, India; Sriram Krishna, South Africa; Jitendra Kumar, India; Zheng Kun, China; Paolo Lago, Italy; Jorge Letechipia, Mexico; Ying Ling Lin, Canada; Cai Long, Canada; Laura Lopez, Mexico; Ratko Magjarević, Croatia; Ružica Maksimović, Serbia; Claudio Meirovich, Spain; Mulugeta Mideksa, Ethiopia; Antonio Migliore, Italy; Myriam Mikhail, Switzerland; Ibrahim Mohedas, USA; Didier Mukama, Rwanda; Shauna Mullally, Canada; Manuel Munoz, El Salvador; Elina Naydenova, Bulgaria; Yukiko Nakatani, Japan; Ernest Nlandu Kamavuako, Denmark; Dieter Nürnberg, Germany; Marc Nyssen, Belgium; Santiago Ocejo, Mexico; Adrian Pacheco, Mexico; Maurice Page, France; Nicolas Pallikarakis, Greece; Tashi Penjore, Bhutan; Ledina Picari, Albania; Mladen Poluta, South Africa; Albert Poon, China; Elisa Puigdomènech, Spain; Martin Raab, Switzerland; Bryan Ranger, USA; Pradeep Ray, Australia; Madan Rehani, USA; Michael Reiter, USA; Amir Sabet Sarvestani, USA; Georg Schmidt, Switzerland; Stanley Siu, China; Tove Sorensen, Norway; Andrew J.T. Stevenson, Denmark; Lisa Stroux, Germany; Bonang Sylvia Tlhomelang, Botswana; Kelvin SZE, China; Billy Teninty, USA; Leigh-Ann Topfer, Canada; Laura Alejandra Velez Ruiz Gaytan, Mexico; Sam Wanda, Uganda; Isabel Watanabe, Mexico; James Wear, USA; Anna Worm, Benin.

Thanks also to Iana Aranda, and her team from E4C, Engineer for change, Programs Engineering for Global Development, American Society of Mechanical Engineering, USA.

Reviewers provided conflict of interest statements, which were reviewed in accordance to WHO requirements. All illustrations were provided by the developers who submitted the technologies.

#### WHO staff, for the evaluation of the 109 submitted health technologies:

Adham Rashad Ismail Abdel Moneim, Benedetta Allegranzi, Natalie Broutet, Maurice Bucagu, Shelly Chadah, Claudia Garcia Moreno, Josee Hansen, Andre Ilbawi, Pablo Jimenez, Walter Johnson, Chapal Khasnabis, Sophie Laroche, Garret Livingston Mehl, Blerta Maliqi, Silvio Mariotti, Claudius Micha Nuebling, Garcia Moreno Esteva, Francis Moussy, Ian Norton, Oyere Onuma, Gojka Roglic, Jordi Sacristan, Qazi Shamin, Constanza Vallenas, Wilson Were and Diana Zandi.

Special acknowledgement to the WHO interns listed below who, under supervision, dedicated countless hours to the different phases of the project: initiating the call, designing the survey, organizing the information required by external and internal reviewers, supporting the logistics of the selection process, and compiling the information for the publication.

Karen Kulp from Capella University, USA (July to December 2018); M. Mar Elena from University of Seville, Spain (June to August 2018) Alitzel Diaz from Universidad Iberoamericana, Mexico (October to December 2017); Daniel Diethei from University of Wuerzburg, Germany (December 2017); Sophie Girardin from Ecole Polytechnique Fédérale de Lausanne, Switzerland (December 2017); Ina Indlekofer from University Stuttgart, Germany (August to September 2016); Maniragav Manimaran from University College London, UK (July to August 2016); Supriya Mohan from Imperial College London (September and October 2017); Ngoc Minh Pham from Swiss Federal Institute of Technology in Zurich (October 2016 to March 2017); and Caroline Soyars from University of Michigan, Ann Arbor, USA (January to April 2016).

#### Terms, conditions and disclaimers for the Call

#### WHO compendium of innovative health technologies for low-resource settings, 2016-2017.

WHO reserves the right not to select any application or to annul the solicitation process at any time, without thereby incurring any liability or any obligation to inform the applicants of the grounds for the WHO's action. WHO reserves the right, at any time during the solicitation process, to modify the scope of the Call. At any step in the evaluation process, WHO reserves the right to issue an amendment to the Call detailing the change to only those applicants who have not been officially eliminated at that point in time. Applications will be evaluated by WHO, in collaboration with partner experts and institutions, in its sole discretion, taking into account the criteria outlined above. There is no obligation by WHO to reveal, or discuss with any applicant, how a submission was assessed, or to provide any other information relative to the selection process.

Incomplete applications and applications submitted after the deadline will, in principle, be disregarded unless WHO, in its sole discretion, decides otherwise in respect of such incomplete or late application. WHO may request applicants to submit complementary or additional information as a condition for consideration. Any possible requests to submit complementary information and/or to submit a more detailed application, as well as any discussions ensuing therefrom, will be exploratory only, and do not mean that the applicant concerned will be selected.

WHO will not be held to offer applicants any explanation or justification as to why their proposal has been rejected and/or why they have not been selected. The list of selected applications will not necessarily be made public as such. The submission of applications, the subsequent selection process and outcome of the selection process will not be subject to any claim of any kind whatsoever, or appeal. Each applicant will be notified in writing by WHO (by e-mail) whether or not the submission has been selected.

Any and all costs and expenses incurred in relation to, or ensuing from, the submission of an application (including the possible complementary information and/or a more detailed proposal, if so requested by WHO) will not be subject to claims for financial compensation of any kind whatsoever.

WHO does not warrant that any medical devices, innovations, concepts or products that may be used, identified or otherwise developed from selected proposals will be successfully commercialized in target countries, or that WHO will finance or otherwise support the development or commercialization of any product. By selecting applications, WHO will not be held to endorse any product but will solely aim at drawing stakeholders' attention to innovative technologies with a view to furthering development and availability of, and access to such innovative health technologies.

The mention of specific companies or of certain manufacturers' products at any stage of the selection process or subsequently will not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned, nor that they have been found to be safe and efficacious.

Without WHO's prior written approval, selected applicants shall not, in any statement of an advertising or promotional nature, refer to their selection under this Call for innovative health technologies. In no case shall selected applicants use the name or the emblem of the World Health Organization, or any abbreviation thereof, in relation to their business or otherwise. The same applies to all applicants during the selection process and thereafter.
