Executive summary	1
Background	1
Rationale for guideline development	1
Objective	2
Guideline development methodology	2
Other related WHO recommendations	3
Updating this guideline	3
Equity and human right perspectives	3
Assessing and managing children attending primary health-care facilities in order to prevent overweight and obesity	4
Best practice statements and Recommendations	4
Background	6
The Integrated Management of Childhood Illness	8
Rationale for guideline development	10
Scope and purpose of the guideline	11
Population of interest	12
Programmatic questions for review	13
Equity and human right perspectives	15
Evidence and recommendations	16
1. Anthropometric assessment of infants and children presenting to primary health-care facilities	16
Programmatic questions	16
Background	16
Summary of the evidence	16
Best practice statement	19
Research priorities	20

2. Care of infants and children with acute or chronic malnutrition presenting to primary health-care facilities	20
Programmatic questions	20
Background	20
Summary of the evidence	21
Best practice statement and Recommendation	25
Research priorities	28
3. Care of children who are overweight or obese presenting to primary health-care facilities	28
Programmatic questions	28
Background	28
Summary of the evidence	29
Recommendations	31
Research priorities	33
Methods	35
Evidence retrieval, assessment and synthesis	35
WHO steering committee	36
Guideline development group	36
External peer-review group	36
Declarations of interest and management of conflicts of interest	37
Grading the quality of the evidence	37
Decision-making process	38
Dissemination, adaptation and implementation	40
Dissemination	40
Adaptation and implementation	40
Monitoring and evaluating the implementation of the guideline	41
Implications for future research	41
Plans for updating the guideline	41
References	42
Annex 1. Analysis of demographic and health survey and multiple indicator cluster survey datasets	48
Annex 2. Systematic reviews	49
a. Anthropometric measures during infancy and childhood and the risk of developing obesity, cardiovascular disease or diabetes mellitus type 2 in later life: a systematic review	49
b. Nutritional assessment and growth monitoring in IMCI countries: a survey of IMCI chart booklets and clinical algorithms used in different countries, reporting current uptake and adaptations of IMCI at national level	49
c. Benefits and harms of supplementary foods in moderately and severely undernourished infants and children (6–59 months)	49

Annex 3. Systematic reviews of interventions to prevent or treat obesity in children	50
Search strategy to identify systematic reviews addressing the PICO questions	50
Algorithm used to determine which systematic reviews most appropriately address the PICO questions	51
Flow diagram showing screening and final selection of eligible studies	52
GRADE tables	53
Evidence profile 1	53
Evidence profile 2	55
Evidence profile 3	57
Annex 4. Evidence-to-decision for recommendations tables	59
1. Anthropometric assessment of infants and children presenting to primary health-care facilities	59
2. Care of infants and children with acute or chronic malnutrition presenting to primary health-care facilities	61
3. Care of children who are overweight or obese presenting to primary health-care facilities	64
Annex 5. Questions in population, intervention, comparison, outcome (PICO) format, when relevant, used for preparing systematic reviews	67
Annex 6. Guideline development group and advisory groups	69
Guideline development group	69
World Health Organization Secretariat and other United Nations agencies	70
Technical experts who participated in the guideline scoping meeting, 18–19 March 2013	70
World Health Organization steering committee, Geneva, Switzerland	71
Additional technical input	71
External peer-review experts	72
Annex 7. Declarations of interest, approved by the World Health Organization (WHO) steering committee October 2014	73

Abbreviations and acronyms

BMI	body mass index
CI	confidence interval
GRADE	Grading of Recommendations Assessment, Development and Evaluation
IMCI	Integrated Management of Childhood Illness
PICO	population, intervention, comparison, outcome
RCT	randomized controlled trial
RR	risk ratio
SD	standard deviation
SMD	standard mean difference
TB	tuberculosis
WHO	World Health Organization
