Sales, rights and licensing. To purchase WHO publications, see <http://apps.who.int/bookorders>. To submit requests for commercial use and queries on rights and licensing, see <http://www.who.int/about/licensing>.

Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

Acknowledgements

This guidance is the result of collaboration between the Climate Change and Health team and the Water, Sanitation, Hygiene and Health Unit, both from the Public Health, Environmental, and Social Determinants of Health Department (PHE) in WHO.

WHO gratefully acknowledges the financial and technical support provided by the United Kingdom International Climate Facility, the UK Department for International Development, the Australian Department of Foreign Affairs and Trade, the Ministry of Environment and Water Resources of Singapore, and the Ministry of Health, Labour and Welfare, Japan.

Editors: Elena Villalobos Prats, Angella Rinehold, Jennifer De France and Diarmid Campbell-Lendrum.

Lead author: Dan Deere.

List of authors and reviewers: Over 20 experts and practitioners contributed to this document through participation in workshops, peer review and provision of insights and text. These individuals include Jamie Bartram (formerly WHO, currently University of North Carolina), Karla Billington (Natural Logic), Robert Bos (formerly WHO), Katrina Charles (University of Oxford), Chee Keong Chew (formerly WHO, currently PUB Singapore), Vanya Delgermaa (WHO), John Dennis (Environmental Health Consulting NZ), Kristie Ebi (University of Washington), Bruce Gordon (WHO), Michael Hammond (independent consultant), Guy Howard (DFID), Alex von Hildebrand (WHO), Asoka Jayaratne (Yarra Valley Water), Ahammadul Kabir (WHO), Nam Raj Khatri (Thecho-9, Lalitpur, Nepal), Waltaji Kutane (WHO), Kah Cheong Lai (formerly WHO, currently PUB Singapore), Bonifacio Magtibay (WHO), Shamsul Gafur Mahmud (WHO), Rory Moses McKeown (WHO), Rachael Miller (Water Corporation), Maria Neira (WHO), Tuan Nghia Ton (WHO), Payden (WHO), Sophary Phan (WHO), Raja Ram Pote Shrestha (WHO), Masaki Sagehashi (National Institute of Public Health, Japan), Paul Samuels (HR Wallingford), David Sutherland (WHO), Nigel Walmsley (HR Wallingford), George Woolhouse (HR Wallingford), Osman Yiha (WHO), and Gertjan Zwolsman (KWR Watercycle Research Institute).

Contents

Abbreviations	vi
Executive summary	1
1. Introduction	3
1.1 Rationale for the document	3
1.2 Scope of the document	3
2. Outline of climate change impacts on water supply	5
2.1 Key messages from IPCC Fifth Assessment Report	5
2.2 Predicted impacts of climate change on the hydrological cycle	5
2.3 Climate impacts on water resources	8
2.4 Potential impacts on health	11
3. Regional climate vulnerability assessments for WSPs	14
3.1 Scope and objective of the assessment	15
3.2 Inputs and components of the assessment	15
3.3 Relevant outputs	17
3.4 Sources of regional climate vulnerability assessments	17
3.5 Case studies	18
4. Resilience and adaptation	19
4.1 DRR in the water safety planning context	20
4.2 IWRM in the water safety planning context	21
5. Integration of climate change into the WSP process	24
5.1 Module 1 – Assemble the WSP team	25
5.2 Module 2 – Describe the water supply system	26
5.3 Modules 3 and 4 – Identify the hazards and assess risks	27
5.4 Module 5 – Improvement planning	32
5.5 Examples of climate change impacts that may influence hazards and hazardous events and associated control measures	34
5.6 Modules 8 and 9 – Management procedures and supporting programmes	43
6. Supporting information and guidance	46
6.1 Introduction	46
6.2 Further resources on climate change and water supplies	46
References	51

Annexes

Annex 1. Netherlands case study: potential climate change impacts on the drinking-water function of the Rhine and Meuse rivers _____	53
Annex 2. Australia case study: water safety plans to manage risks from a supplemental water source in Western Australia _____	64
Annex 3. Nepal case study: water safety plans to manage risks in Nepal _____	71
Annex 4. United Republic of Tanzania case study: how can WSPs help adapt to an uncertain climate? _____	74
Annex 5. Ethiopia case studies: responding to climate change in Ethiopian water supplies _____	77
Annex 6. Bangladesh case study: Impacts of salinity on drinking-water sources _____	81

Abbreviations

CMIP	Coupled Model Intercomparison Project
CO₂	carbon dioxide
CORDEX	Coordinated Regional Downscaling Experiment
DFID	Department for International Development (United Kingdom)
DRR	disaster risk reduction
EPA	Environmental Protection Agency, United States
HACCP	hazard analysis and critical control point
IPCC	Intergovernmental Panel on Climate Change
IWA	International Water Association
IWRM	integrated water resources management
KNMI	Royal Netherlands Meteorological Society
NGO	nongovernmental organization
NTU	nephelometric turbidity unit
SWAT	Soil and Water Assessment Tool
UF	Ultrafiltration
UNEP	United Nations Environment Programme
UNISDR	United Nations Office for Disaster Risk Reduction
UV	Ultraviolet
WASH	water, sanitation and hygiene
WCI	Water Cycle Integrator
WEAP	Water Evaluation and Planning
WEDC	Water Engineering Development Centre
WHO	World Health Organization
