Cataloguing-in-Publication (CIP) data. CIP data are available at <http://apps.who.int/iris>.

Sales, rights and licensing. To purchase WHO publications, see <http://apps.who.int/bookorders>. To submit requests for commercial use and queries on rights and licensing, see <http://www.who.int/about/licensing>.

Third-party materials. If you wish to reuse material from this work that is attributed to a third party, such as tables, figures or images, it is your responsibility to determine whether permission is needed for that reuse and to obtain permission from the copyright holder. The risk of claims resulting from infringement of any third-party-owned component in the work rests solely with the user.

General disclaimers. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by WHO to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall WHO be liable for damages arising from its use.

This publication contains the collective views of Advisory Group on Integrated Surveillance of Antimicrobial Resistance (AGISAR) and does not necessarily represent the decisions or the policies of WHO.

Introduction

1 Surveillance of Antimicrobial Resistance

-  1.1. Scope — 5
-  1.2. Elements of a programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 7
-  1.3. Sample sources — 8
-  1.4. Target bacteria — 9
-  1.5. Sampling design — 9
- 1.6. Laboratory testing methodology — 12
- 1.7. Data management, validation, analysis and reporting — 14
- 1.8. Establishing and improving programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 19
- 1.9. References — 20

2 Surveillance of Antimicrobial Use

-  2.1. Background — 25
-  2.2. Surveillance of the use of antimicrobials in humans — 26
-  2.3. Surveillance of use of antimicrobials in animals — 33
-  2.4. Data management to support surveillance of antimicrobial use — 40
- 2.5. References — 46

3 Combined Analysis and Reporting

-   3.1 Description of combined analysis and reporting of a programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 51
-  3.2. Examples of combined analysis and reporting of a programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 53
-  3.3. Reporting options including risk communication — 61
-  3.4. Example for starting a programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 63
-  3.5. Evolution towards combined analysis and reporting of a programme of integrated surveillance of antimicrobial resistance in foodborne bacteria — 65
- 3.6. References — 66

Appendix 1. Interpretation of antimicrobial susceptibility test results — 68

Appendix 2. Quality control — 70

Appendix 3. Interpretive criteria according to CLSI and EUCAST — 72

Appendix 4: The use of whole genome sequencing in antimicrobial resistance surveillance — 76

Declaration of Interest

All experts and resource advisors invited to participate in the Expert Consultation completed the WHO standard form for declaration of interest prior to the meeting. At the start of the meetings, all participants were asked to confirm their interest, and to provide any additional information relevant to the subject matter of the meeting. No conflicts of interest were identified.
