Glossary	3
Preamble	8
What is new?	9
Introduction	11
1. Principles and practice of malaria elimination	15
1.1 The starting-point: understanding malaria transmission intensity and country stratification	16
1.2 Aligning country field actions with the <i>Global technical strategy for malaria 2016–2030</i>	17
2. Strategies and interventions for malaria elimination	22
2.1 Introduction	22
2.2 Local stratification by malaria transmission intensity	23
2.3 Enhancing and optimizing vector control	24
2.4 Enhancing and optimizing case detection and case management	28
2.5 Role of quality assurance and reference laboratories in malaria elimination	34
2.6 Surveillance	35
2.7 Accelerating activities towards elimination	43
3. Management and planning	45
3.1 Planning process	45
3.2 Informed decision-making	47
3.3 Programme structure and management	49
3.4 Supply chain systems	50
3.5 Independent national malaria elimination advisory committee	51
3.6 Creating an enabling environment	51

4. Prevention of re-establishment of malaria	54
4.1 Risks for re-establishment of malaria	56
4.2 Maintaining a strong health system	58
4.3 Integrating malaria activities into general health services	59
5. Certification and verification of malaria elimination	60
5.1 WHO certification of malaria elimination – general	61
5.2 WHO certification of malaria elimination – procedure	61
5.3 Follow-up of WHO certification	65
5.4 Subnational verification of malaria elimination	65
6. Innovation and research for malaria elimination	67
6.1 Research and development for malaria elimination and eradication	68
6.2 Operational research	68
6.3 Regulatory environment for malaria elimination	69
References	70
Annexes	
Annex 1. Biology of malaria	73
Annex 2. Diagnosis and treatment of <i>Plasmodium falciparum</i> and <i>P. vivax</i> malaria	78
Annex 3. Monitoring and evaluation indicators for interventions in an elimination programme	80
Annex 4. Terms of reference for the WHO Malaria Elimination Certification Panel	82
Annex 5. Documents for the Malaria Elimination Certification Panel to be prepared from the elimination database by the national government	84
Annex 6. Outline of content of a national elimination report	85
Annex 7. Example of individual case investigation form for a national malaria case register	87
Annex 8. Example of individual focus investigation form for a national malaria case register	90
Annex 9. Information to be included in annual report for follow-up of WHO certification	92
Annex 10. Generic terms of reference for an independent national malaria elimination advisory committee	93

Acknowledgements

In June 2015, the WHO Global Malaria Programme (GMP) established an evidence review group, with the specific objective of preparing new guidance for malaria elimination. The group's work was led by Dr Hoda Atta (WHO Regional Office for the Eastern Mediterranean) and Dr Keith Carter (WHO Regional Office for the Americas) in consultation with Dr Pedro Alonso (GMP).

The GMP is very grateful to the members of the evidence review group and their organizations (when applicable) for their participation in WHO meetings held in New Delhi, India (July–August 2015), Montreux, Switzerland (December 2015) and Shanghai, China (June 2016); for preparing various sections of the framework on the basis of their areas of greatest expertise; and for their involvement in the peer review. Special thanks to the Chair, Dr Richard Steketee (Malaria Control and Elimination Partnership in Africa, a programme at PATH [United States of America]) who drafted sections and reviewed the entire document.

The 13 members were (in alphabetical order): Dr Majed Al-Zadjali (Department of Malaria, Ministry of Health, Oman); Professor Graham Brown (Nossal Institute for Global Health, University of Melbourne, Australia); Professor Thomas Burkot (Australian Institute of Tropical Health and Medicine, James Cook University, Australia); Dr Justin Cohen (Global Malaria, Clinton Health Access Initiative, USA); Dr Mikhail Ejev (independent consultant, Canada); Professor Rossitza Kurdova–Mintcheva (independent consultant, Bulgaria); Dr Bruno Moonen (Bill & Melinda Gates Foundation, USA); Dr Gao Qi (Jiangsu Institute of Parasitic Diseases, China); Dr Frank Richards (The Carter Center, USA); Professor Christophe Rogier (Pasteur Institute of Madagascar and French Military Health Service); Dr Allan Schapira (independent consultant, Philippines), Professor Robert Snow (KEMRI Wellcome Trust Research Programme, Kenya) and Dr Richard Steketee.

The following are also gratefully acknowledged: Dr Hana Bilak (Malaria Control and Elimination Partnership in Africa) for rewriting and technically editing the entire report, in collaboration with Dr Richard Steketee and with Dr Pedro Alonso and Laurent Bergeron (WHO GMP) for overall management of the project.

Substantial comments and valuable input to the document were provided by Dr Andrei Beljaev, Dr Charles Delacollette, Dr Anatoly Kondrashin and Dr Regina Rabinovich (ISGlobal, Barcelona Institute for Global Health) and by the following WHO staff based in regional and country offices and at headquarters: Issa Sanou (WHO Regional Office for Africa); Rainier Escalada (WHO Regional Office for the Americas), Ghasem Zamani (WHO Regional Office for the Eastern Mediterranean); Elkhan Gasimov (WHO Regional Office for Europe); Leonard Icutanim Ortega (WHO Regional Office for South–East Asia, now with WHO GMP); Eva–Maria Christophel (WHO Regional Office for the Western Pacific, now at the WHO Regional Office for South–East Asia); Walter Kazadi (coordinator, Emergency Response to Artemisinin Resistance Hub, WHO Country Office, Cambodia, now at the WHO Country Office, Burundi); Gawrie Loku Galappaththy (WHO Country Office, Viet Nam, now with WHO GMP); and Maru Aregawi, Andrea Bosman, Richard Cibulskis, Tessa Knox, Kimberly Lindblade, Abraham Mnzava, Sivakuraman Muragasampillay, Abdisalan Noor, Martha Quinones, Charlotte Rasmussen, Pascal Ringwald and Emmanuel Temu (WHO GMP).

The framework for malaria elimination was complemented by contributions from a wide range of malaria programme managers in the six WHO regions during an extensive consultation (international meetings and face-to-face interviews). In addition, it was refined after field testing at training workshops on malaria elimination in Paro, Bhutan (organized by WHO on 27 June–2 July 2016) and in Pasay City, Philippines (organized by ACTMalaria in collaboration with WHO on 4–9 July 2016) and by an in-depth review by the WHO Malaria Policy Advisory Committee in September 2016.

Funding for the production of this document was gratefully received from the Bill & Melinda Gates Foundation.
