Acronyms and abbreviations	vi
Executive Summary	xiii
1. Background	1
1.3 Responsibilities	5
1.4 Methods	5
1.5 Expected outputs	6
2. Epidemiology: Malaria situation, disease burden, trends, indicators and targets.....	7
2.1 Malaria situation, trends and village/hamlet stratification	7
2.2 Impact and outcome indicators	18
3. Malaria case management	21
3.1 Current malaria diagnosis and treatment strategy.....	21
3.2 IEC/BCC strategy to support malaria case management	27
3.3 Research strategy on case management	29
4. Vector control and individual protection measures.....	30
4.1 Current entomological strategy	30
4.2 Current vector control strategy by malaria stratum	33
4.3 Current insecticide-treated net distribution, IRS and repellent strategy	35
4.4 Vector Control: Human resource and capacity building	42
4.5 Vector control: Research strategy in entomology and vector control.....	46
4.6 IEC/BCC and community strategy to support entomology and vector control	48
5. Surveillance, monitoring and evaluation (SME)	51
5.1 SME strategy	51
5.2 Surveillance as an intervention.....	52
5.3 Case investigations.....	53
5.4 Outbreak detection and response	54
5.5 Area stratification	55
5.6 Data flow, management and use	56
5.7 SME: Sustainability and capacity strengthening	57

6.	Policy and malaria programme management: Health systems challenges towards malaria elimination	59
	Introduction	59
6.1	Human resources strategy	60
6.2	Skill building, skill retention and upgradation in service providers	62
6.3	Human resources specific to malaria interventions in the context of malaria elimination and prevention of reintroduction	63
6.4	Integration in general service delivery.....	65
6.5	Integration in financing	68
6.6	Integration of malaria information systems	71
6.7	The Local Administration Health Fund and its potential	72
6.8	Addressing malaria in mobile and migrant populations (MMPs).....	74
6.9	Cross-border malaria elimination strategy and challenges.....	76
6.10	Malaria elimination in conflict-affected provinces.....	80
6.11	Coordination at the level of programme management	82
6.12	Malaria-free Thailand by 2024: the malaria elimination road map	83
6.13	Elimination at supranational level: Mekong and ASEAN perspectives.....	84
6.14	Technical collaboration and partnerships	86

Annexes

1.	Agenda of the 2015 Review	88
2.	Brief historical background of the malaria programme in Thailand	91
3.	Decree to establish the national malaria elimination committee.....	96
4.	Progress made against the MPR 2011 review recommendations	97

Acknowledgements

Members of the external review team would like to express their thankfulness to all senior experts in the Ministry of Public Health and other ministries who have given their time to discuss and express their views to members of the review team.

Special thanks as well to PHOs, DHOs, VBDCs and VBDUs' staff and all health and malaria volunteers and workers met in the field at all levels for welcoming us, making useful presentations and freely discussing and clarifying issues with team members.

Team members had also the opportunity to discuss with various stakeholders from NGOs to academic institutions and donors, including GFATM experts who have joined the overall review exercise.

Team members acknowledge also the full support of the DDC/Bureau of Vector Borne Diseases' staff who have prepared and discussed background documents and finalized field visits.

Last but not least, team members would like to express their gratitude to WHO staff in the WHO Country Office Thailand for their coordinating and supportive role before and during the review mission. Special mention to Dr Krongthong Thimasarn who provided technical inputs throughout and valuable translations.

The External Review team would like to acknowledge also the financial support of the GFATM in making this review possible.

Disclaimer

Opinions and views expressed in the report are only those of the review team members.

Acronyms and abbreviations

A1	Perennial transmission area
A2	Seasonal transmission areas (less than six months)
ABER	Annual blood examination rate
ACD	Active case detection
ACT	Artemisinin-based combination therapy
ACT Malaria	Asian Collaborative Training Network for Malaria
ADB	Asian Development Bank
AFRIMS	Armed Forces Research Institute of Medical Sciences
AMI	Aide Médicale Internationale
AMT	Artesunate monotherapy
AP	Atovaquone-proguanil
API	Annual parasite incidence
ARC	American Refugee Committee
B1	Area with no local transmission but presence of malaria vectors (high to moderate receptivity)
B2	Area with no local transmission without malaria vectors (low receptivity)
