Contents

Foreword	viii
Preface	ix
Authorship and acknowledgements	xi
Glossary of terms	xiv
Abbreviations	xvi
Executive summary	xix
CHAPTER 1. Introduction	1
1.1 WHO's role in global climate change and health.....	2
1.2 WHO's work on climate change and health in the Pacific region.....	4
CHAPTER 2. Health impacts of climate change: science and evidence	9
2.1 Climate change science.....	9
2.2 Climate change in the Pacific.....	14
2.3 The links between climate change and human health.....	16
CHAPTER 3. Vulnerabilities of Pacific island countries to the health impacts of climate change	21
3.1 Assessing climate change and health vulnerability.....	21
3.2 Methods used to assess climate change and health vulnerabilities in Pacific island countries.....	24
3.3 Summary of climate-sensitive health risks identified in Pacific island countries.....	26
3.4 Categories of climate-sensitive health risks in Pacific island countries.....	27
CHAPTER 4. Health adaptation strategies for Pacific island countries	41
4.1 Defining “adaptation” in the context of climate change and health.....	41
4.2 Adaptation to the health impacts of climate change in the Pacific context.....	42
4.3 Climate-resilient health systems in Pacific Island countries.....	44

CHAPTER 5. Country-specific health vulnerability assessments and adaptation plans in the Pacific region	47
5.1 Cook Islands.....	48
5.2 Federated States of Micronesia.....	52
5.3 Fiji.....	59
5.4 Kiribati.....	65
5.5 Marshall Islands.....	69
5.6 Nauru.....	74
5.7 Niue.....	78
5.8 Palau.....	82
5.9 Samoa.....	86
5.10 Solomon Islands.....	92
5.11 Tonga.....	95
5.12 Tuvalu.....	99
5.13 Vanuatu.....	104
CHAPTER 6. Situation analysis of climate change and health adaptation in Pacific island countries and areas	107
6.1 Opportunities and comparative advantage for health adaptation.....	107
6.2 Challenges in strengthening health systems to manage the health impacts of climate change.....	109
6.3 Common priorities for health adaptation identified by the NCCHAPs of Pacific island countries and areas.....	111
CHAPTER 7. Future directions for climate change and health adaptation in Pacific island countries and areas	113
7.1 Key considerations in setting health adaptation priorities.....	113
7.2 Present and future support of WHO for health adaptation activities in the Pacific.....	115
7.3 Regional climate change and health activities led by other international organizations.....	120
7.4 Climate change mitigation and the localized co-benefits for health.....	121
CHAPTER 8. Recommendations	123
8.1 Strengthening the essential public health package for climate change adaptation.....	123
8.2 Building climate-resilient health systems.....	128
8.3 Resource mobilization for health adaptation in Pacific islands countries and areas.....	133
CHAPTER 9. Conclusions	135
REFERENCES	137

Figures, tables and boxes

Figure 1.	Map of Pacific island countries and areas.....	7
Figure 2.	Historical trends in carbon dioxide concentrations and temperature, on a geological and recent time scale	11
Figure 3.	Modelled recent temperature trends by region and globally.....	12
Figure 4.	Future trend of global average surface temperature based on four different future climate change scenarios.....	13
Figure 5.	Global mean sea-level rise projections based on four different future climate change scenarios, representative concentration pathways (RCPs).....	15
Figure 6.	Pathways by which climate change may affect human health in the Pacific islands	18
Figure 7.	The driving force–pressure–state–exposure–effect–action (DPSEEA) framework for climate change and health.....	19
Figure 8.	Overview of the vulnerability and adaptation assessment process.....	22
Figure 9.	Annual average temperature and average reporting rates for diarrhoeal disease, Pacific islands (1986–1994).....	30
Figure 10.	Monthly cases of diarrhoea versus monthly rainfall of previous month in Suva, Fiji.....	30
Figure 11.	The relationship between maximum temperature in January and malaria transmission from February to May in the Solomon Islands.....	33
Figure 12.	Conceptual framework of the human–animal–environment interface for leptospirosis in American Samoa.....	34
Figure 13.	Relationship between levels of rainfall, lag structure and leptospirosis cases in Palau	35
Figure 14.	Relationship between monthly climate variables and cases of outpatient cases of respiratory complaints, derived from time-series analyses for Majuro, Marshall Islands ...	36
Figure 15.	Conceptual model summarizing the pathways between climate change and NCDs.....	38
Figure 16.	The concept of resilience in the context of health system stressors.....	44
Figure 17.	Relationship between the relative risk (RR) of respiratory disease and diarrhoeal disease and the previous month's temperature in Pohnpei, Federated States of Micronesia.....	53
Figure 18.	Relationship between sea surface temperature (SST) and ciguatera rates in Kiribati.....	66
Figure 19.	Relationship between weather variables and monthly outpatient presentations and hospital admissions in Majuro, Marshall Island.....	71
Figure 20.	Relationship between monthly precipitation and number of dengue cases in Palau.....	83

Figure 21.	Framework for developing early warning systems for climate-sensitive diseases.....	112
Figure 22.	Reducing the health impacts of climate change via primary prevention (mitigation), secondary prevention (adaptation) and the role of co-benefits.....	122

Tables

Table 1.	Categories of climate change-related risks to health, according to causal pathway.....	17
Table 2.	Matrix of the risks posed by climate change, cross-classified by their likelihood and their impact (on health).....	25
Table 3.	Highest priority climate-sensitive health risks in Pacific island countries.....	26
Table 4.	Odds ratios of climate-sensitive disease (CSD) outbreaks in the month following extreme weather events in Ba subdivision, Fiji.....	28
Table 5.	The changing rates of ciguatera in Pacific island countries.....	32
Table 6.	Types of action required for each level of risk posed by climate change to health.....	43
Table 7.	Adaptation strategies related to priority climate-sensitive health risks in Cook Islands.....	49
Table 8.	Potential adaptation strategies to deal with climate-sensitive health risks in the Federated States of Micronesia.....	54
Table 9.	Relationship between monthly climate variables and monthly cases of climate-sensitive disease (1995–2009).....	61
Table 10.	Adaptation strategies related to priority climate-sensitive health risks in Kiribati.....	67
Table 11.	Ranking of climate-sensitive health risks in Nauru.....	75
Table 12.	Adaptation strategies related to priority climate-sensitive health risks in Niue.....	79
Table 13.	Climate change and health needs and adaptation strategies for Palau.....	84
Table 14.	Climate-sensitive health risks in Samoa.....	88
Table 15.	Climate change and health risks in Solomon Islands.....	92
