# ACKNOWLEDGEMENTS

This case-study is part of a series of malaria elimination case-studies conducted by the WHO Global Malaria Programme and the Global Health Group at the University of California, San Francisco (UCSF/GHG).

The two groups wish to acknowledge the financial support of the Bill & Melinda Gates Foundation in developing the elimination case-study series.

The following institutions and individuals collected the data for this case-study: Dr Dhikrayet Gamara (coordinator of the Tunisia National Malaria Control Programme), Professor Karim Aoun (Pasteur Institute, Tunis), Professor Hamouda Babba (Faculty of Pharmacy, Monastir, and Laboratory of Maternity and Neonatology Centre of Monastir), Professor Mounir Ben Djemaa (Hedi Chaker University Hospital of Sfax), Mohamed Bel Kahla (Surveillance Officer at the Tunisia National Malaria Control Programme), Dr Ali Bouattour (Pasteur Institute, Tunis), Professor Aïda Bouratbine (Pasteur Institute, Tunis), Professor Emna Chaker (Laboratory of Parasitology and Mycology, La Rabta, Tunis), Professor Ahmed Ghoubantini (Faculty of Medicine, Tunis) and Dr Faïçal Zouiten (Infectious Diseases, La Rabta, Tunis).

Dr Jean-Olivier Guintran, formerly WHO/AFRO/Inter-Country Support Team and currently WHO/Vanuatu, was the lead author of the case-study. He compiled and analysed the information and drafted the text of this case-study, which was subsequently finalized in collaboration with Dr Hoda Atta and her team of the WHO Eastern Mediterranean Regional Office and Drs Rossitza Kurdova-Mintcheva and Aafje Rietveld of the WHO Global Malaria Programme.

The author would like to thank everyone who contributed to the development of this case-study, particularly Dr Dhikrayet Gamara (coordinator of the Tunisia National Malaria Control Programme), who facilitated the work of Dr Guintran in Tunis, and the reference librarians and other WHO staff who extracted a large amount of information from the WHO archives in Geneva and Cairo. The case-study was reviewed by Mr Laurent Bergeron, Dr Richard Cibulskis, Dr Michael Lynch, Ms Cara Smith Gueye and Dr Ghasem Zamani, who all provided valuable assistance and comments.

The author remains responsible for any errors and omissions.

# ACRONYMS AND ABBREVIATIONS

ABER	annual blood examination rate
ACD	active case detection
ACT	artemisinin-based combination therapy
AL	artemether–lumefantrine
API	annual parasite index
DBHC	Department of Basic Health Care
DDT	dichlorodiphenyltrichloroethane
DEHP	Department of Environmental Health and Protection
EMRO	WHO Regional Office for the Eastern Mediterranean
GDP	gross domestic product
GMEP	Global Malaria Eradication Programme
IRS	indoor residual spraying
MoH	Ministry of Health
NMCP	National Malaria Control Programme
NMEP	National Malaria Eradication Programme
WHO	World Health Organization
