Introduction

1.1 Background

Health-in-all-policies (HiAP) was built on the foundation of the WHO Declaration of Alma-Ata on Primary Health Care 1978; the Ottawa Charter for Health Promotion 1986; the Adelaide Recommendations on Healthy Public Policy 1988 and subsequent global health promotion conferences; the Gothenburg Consensus Paper on Health Impact Assessment 1999; and the Declaration on Health in All Policies, Rome 2007. Health is seen as a positive concept that could draw attention of other sectors beyond health. HiAP is a renewal of healthy public policy, joined-up with public policy approach where health became a driving force for social and economic development.

Sustainability of health of the population is as critical as the sustainability of the environment and development. Improving population health became a shared goal across all sectors. HiAP approach implies health impacts derived from policies across all sectors, and provides a lever for governments to address the key determinants of health through a systematic approach.

Recognizing the complexity of health determinants and the urgent
