Requests for permission to reproduce or translate WHO publications –whether for sale or for non-commercial distribution– should be addressed to WHO Press through the WHO website (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

2011-2014

Acknowledgements

The call, evaluation, and compilation of submissions for the Compendium were managed by the World Health Organization (WHO) Medical Devices team, Policy Access and Use unit of the Essential Medicines and Health Products department under the coordination of Ms Adriana Velazquez Berumen and supervision of Dr Gilles Bernard Forte and Mr Cornelis de Joncheere.

Field experts evaluated submitted technologies without external financial compensation. We thank each and every applicant and reviewer who dedicated countless hours to the publication in order to help identify potential health technology solutions.

2014

For the evaluation of medical device, assistive device, eHealth solution, in vitro diagnostic and Ebola relief technology submissions we thank:

- Dr Meena Cherian, Dr Sergey Eremin, Mr Michael George Kay, Mr Chapal Khasnabis, Professor Francis Moussy, Mr Andrea Pupulin, Ms Anita Sands, Dr Rosa Vallenias and Ms Diana Zandi from WHO headquarters, Geneva, Switzerland
- Mr Ken Steffen Frahm, Dr Sabata Gervasio, Mr Ernest Nlandu Kamavuako, Mr Dan Stieper Karbing, Dr Thomas Nørgaard Nielsen and Mr Andrew JT Stevenson from Aalborg University, Denmark
- Dr Roberta Joppi, Italian Horizon Scanning Project, Pharmaceutical Department of the Local Health Unit, Verona, Italy
- Dr Brendon Kearney, Health Policy Advisory Committee on Technology (HealthPACT), Australia
- Dr Setefilla Luengo Matos, Agencia de Evaluacion de Tecnologias Sanitarias (AETS), Madrid, Spain
- Dr Hubert Messner and Dr Grazia Molinaro, Neonatal Intensive Care Unit, Regional Hospital, Bolzano, Italy
- Mr Maurice Page, HUMATEM, France
- Dr Ute Pieper, Independent Environmental Health Expert
- Dr Manlio Prosperi, Niguarda Ca' Granda Hospital, Milan, Italy

Thanks to the medical devices staff: Dr Yukiko Nakatani and Ms Adriana Velazquez, and short term consultants: Mr Antonio Migliore, Dr Miriam N. Mikhail, Ms Gabriela Jimenez Moyao, Mr Didier Mukama and Ms Daniela Rodriguez, as well as the following interns: Marina Alfons, Ileana Freige, Ying Ling Lin, Samantha Straitz and Dr Grace Wu. Special thanks to intern Megan M. Smith for organizing the documents for final review, extracting information from submissions and completing data sheets to compile content for publication.

2013

The coordination of the Compendium project and the evaluation of the submissions were managed by the Medical Devices team, Policy, Access and Use unit of the Essential Medicines and Health Products department under the direction of Adriana Velazquez-Berumen, coordinator, and Jennifer Barragan, technical officer, the Disability and Rehabilitation team of the Violence and Injury Prevention and Disability department under the direction of Chapal Khasnabis, and the eHealth unit of the Knowledge Management and Sharing department under the direction of Diana Zandi and Misha Kay.

For the evaluation of submitted medical devices, assistive devices and eHealth solutions we thank:

- Aurora Llanos Méndez from Agencia de Evaluación de Tecnologías Sanitarias de Andalucía (AETSA), Seville, Spain;
- Antonio Migliore and Maria Rosaria Perrini from the Agenzia Nazionale per i servizi sanitari regionali (Agenas), Rome, Italy;
- Gaizka Benguria-Arrate, Iñaki Gutiérrez-Ibarluzea, and Nora Ibarгойen-Roteta, from the Basque Office for Health Technology Assessment (Osteba), Vitoria-Gasteiz, Spain;
- Debra Kriger and Andra Morrison from the Canadian Agency for Drugs and Technologies in Health (CADTH);

- Alexandre Barna, Martin Blachier, Emmanuel Charpentier, Bjorn Fahlgren, and Marc Vanicatte from the Committee for Evaluation and Diffusion of Innovative Technologies (CEDIT), Paris, France;
- Kees Groeneveld and Cees A. Postema from the Health Council of the Netherlands (GR), The Hague, The Netherlands;
- Brendon Kearney and Linda Mundy from the Health Policy Advisory Committee on Technology (HPACT), Queensland, Australia;
- Setefilla Luengo-Matos from the Agencia de Evaluacion de Tecnologias Sanitarias (AETS) – Institute of Health Carlos III, Madrid, Spain;
- Orna Tal from the Israeli Center for Emerging Technologies (ICET), Israel;
- Roberta Joppi and Chiara Poggiani from the Italian Horizon Scanning Project (IHSP);
- Kristina Routh, Biruntha Senthinathan, and Sue Simpson from the National Institute for Health Research Horizon Scanning Centre (NIHR HSC), University of Birmingham, United Kingdom;
- Marianne Klemp and Inger Natvig Norderhaug from the Norwegian Knowledge Centre for the Health Services (NOKC), Oslo, Norway;
- Dr Johan Borg from Lund University, Sweden;
- Kevin Clausen from the Nova Southeastern University, USA;
- Antoine Geissbuhler from the University Hospital Geneva, Switzerland;
- Kendall Ho from the University of British Columbia, Canada;
- Tove Sorensen from the Norwegian Centre for Telemedicine, Norway.

Special thanks to Heike Hufnagel and Amir Sabet Sarvestani who managed the call for innovative health technologies and the submissions. We are additionally grateful to Keiko Fukuta for her support in producing the Compendium and Belén Valladares Vaquero for her support throughout the project.

For their financial support of the 2013 edition we thank the Japan Ministry of Health, Labour and Welfare, the Netherlands Ministry of Health, Welfare and Sport, and the US Agency for International Development.

2011

The coordination and organization of the Compendium project and the evaluation of the medical device submissions were managed by the Diagnostic Imaging and Medical Devices unit of the Essential Medicines and Health Products department of the World Health Organization under the direction of Adriana Velazquez-Berumen, team coordinator, and Heike Hufnagel, technical officer.

The coordination and evaluation of the eHealth solution submissions were managed by the eHealth Unit of the Knowledge Management and Sharing department of the World Health Organization under the direction of Diana Zandi, Health Academy Project Manager, and Misha Kay, Manager, Global Observatory for eHealth.

The contribution of the following persons and institutions has been invaluable:

For the evaluation of submitted medical devices we thank Euroscan represented by Sue Simpson and Brendon Kearney and the following Euroscan members:

- Rosimary Terezinha de Almeida, Angaja Phalguni, and Beth Boddice from the National Horizon Scanning Centre (NSCH), University of Birmingham, United Kingdom;
- Alexandre Barna, Emmanuel Charpentier, Bjorn Fahlgren, and Marc Vanicatte from the Committee for Evaluation and Diffusion of Innovative Technologies (CEDIT), Paris, France;
- Setefilla Luengo, Iñaki Imaz-Iglesia, and Jesús González Enríquez from the Agencia de Evaluacion de Tecnologias Sanitarias (AETS) -ISCIII, Madrid, Spain;
- Aurora Llanos from Agencia de Evaluación de Tecnologías Sanitarias de Andalucía (AETSA), Seville, Spain;
- Antonio Migliore and Maria Rosaria Perrini from the Agenzia Nazionale per i servizi sanitari regionali (Agenas), Rome, Italy;
- Orna Tal from the Division of Medical Technology Policy (DMTP), Ministry of Health, Jerusalem, Israel;

- Sirpa-Liisa Hovi and Marjukka Mäkelä from the Finnish Office for Health Technology Assessment (FinOHTA), Helsinki/Tampere, Finland;
- Kees Groeneveld and Cees A. Postema from the Health Council of the Netherlands (GR), The Hague, The Netherlands;
- Inger Natvig Norderhaug, Helene Arentz-Hansen, and Tove Ringerike from the Norwegian Knowledge Centre for the Health Services (NOKC), Oslo, Norway;
- Paul Fennessy, Linda Mundy, Kaye Hewson, and Brendon Kearney from the Health Policy Advisory Committee on Technology (HealthPACT), Queensland, Australia;
- Nora Ibargoyen-Roteta, Gaizka Benguria-Arrate, and Iñaki Gutiérrez-Ibarluzea from the Basque Office for Health Technology Assessment (Osteba), Vitoria-Gasteiz, Spain.

We also thank DIMDI (German Institute of Medical Documentation and Information) represented by Hans-Peter Dauben for their support concerning the organization of the evaluation phase as well as Ahmet Metin Gulmezoglu and Helena Ardura-Garcia from WHO for their input.

For the evaluation of submitted eHealth solutions we are grateful to:

- Antoine Geissbuhler, University Hospital Geneva, Switzerland
- Kendall Ho, University of British Columbia, Canada
- Pradeep Ray, University of New South Wales, Australia
- Tove Sorensen, Norwegian Centre for Telemedicine, Norway

For their collaboration we thank the Centre for Global Health at the University of Michigan represented by Kathleen Sienko and directed by Sofia Merajver; we especially thank Amir Sabet Sarvestani and Eva Shiu for their assistance with identifying potential technologies and contacting the respective developers for the Compendium.

For her design of the Call announcement as well as her contribution to the successful launch of the Call we thank Lisa Stroux. For their valuable input on the submission template we thank Tony Easty from the University of Toronto, Mladen Poluta from the University of Cape Town, Lisa Stroux from the University of Oxford, and Santiago Ocejó from ProMujer, Mexico City.

We would like to thank the following WHO interns: Yen Low for her support in producing the Call announcement, Bryan Ranger for his support in producing the Compendium, and Rahul Rekhi, Shreesh Naik, Alicia De Hoyos Reyes, and John Akrofi for their support in different phases of the project.

All illustrations were provided by the developers who submitted the technologies.

For their financial support in the 2012 edition we thank the Ministry of Health, Labour and Welfare, Government of Japan, as well as The Netherlands Ministry of Health, Welfare and Sport. For their financial support in the 2011 edition, we profoundly thank the Bill and Melinda Gates Foundation.

Table of contents

Acknowledgements	iv
Technologies by health topic.. .. .	xi
Introduction	xiv
Terms, conditions and disclaimers	xv

eHealth solutions 2014

Doctor assistant app	1
e-Health software for NCD health education	2
Electronic Health Record (EHR) solution	3
Smartphone-powered cloud-enabled portable Electrocardiograph (ECG)	4

Medical devices 2014

Anaesthesia delivery for low resource setting	6
Cooling mattress for neonates	7
Infant radiant warmer for primary care	8
Infant resuscitation and suctioning device	9
Infant T-piece resuscitator	10
Infusion pump	11
Integrated respiratory blower & humidifier	12
Low-cost computed tomography scanner	13
Low pressure anaesthetic machine with pneumatic ventilator	14
Mobile-enabled non-invasive measure-through motion and low perfusion pulse oximeter	15
Neonatal bag-mask	16
Non-invasive haemoglobin monitoring device	17
Oxygen reservoir filling system	18
Pulse oximeter	19
Trans-oral nasopharynx brush biopsy-quantitative PCR for epstein barr virus DNA detection	20
Z-arm digital x-ray	21

Other technologies 2014

Breastfeeding simulator	23
Healthy newborn kit	24
Task and room light for health workers	25

Technologies for outbreaks 2014

Alcohol & chlorine free sanitizer	27
Autoclave powered by solid fuel.. .. .	28
Bleach dilution gauge	29
Disposable patient transfer sheet	30
Formaldehyde gas sterilizer	31
Inexpensive cleaning and sterilization kit	32
Medical device transfer and storage system	33
Portable, power-free medical instrument sterilizer.	34
Safi-safe water drops	36
U-sterilize	37

Assistive devices 2013

Artificial prosthetic knee joint	39
Child wheelchair	40
Hollow mattress	41
Magnetic prosthetic suspension system.	42
Pen-mounted CCTV camera	43
Polycentric prosthetic knee joint.	44
Polypropylene endoskeletal lower limb prosthetic system	45
Prefabricated components for lower limb orthoses	46

eHealth solutions 2013

Blood pressure eReader	48
ePharmacyNet system.	49
Health and hospital information system.	50
Hearing screen eRecord	51
Maternal and child health mobile services	52
Mobile supply chain management tool	53
Remote healthcare solution	54
SMS-DMCare	55
SMS service.	56
T1D system (Type 1 Diabetes system)	57
TeleOphthalmology aided primary eye care	58

Medical devices 2013

Bedside newborn phototherapy	60
Compact portable ultrasound	61
Dry blood spot screening	62
Electro-hyperthermia	63
Fecal occult blood test	64
Infant radiant warmer.. .. .	65
Infant warmer	66
Infrared ear thermometer	67
LED phototherapy for neonatal jaundice	68
Low pressure anaesthesia machine	69
