Contents

Acknowledgements	viii
Introduction	x
Abbreviations	xii

Chapter 1

Analysis of aggregated TB notification data	15
1.1 Aggregated notification data: what are they?	16
1.2 Assessment and assurance of the quality of aggregated TB notification data	18
1.3 Analysis of aggregate data	21
1.4 Examples of analysis of trends	22
1.5 Limitations of aggregated notification data	40
1.6 Summary	41
References	43
Annex 1 TB surveillance data quality standards with examples	44

Chapter 2

Analysis of case-based TB notification data	49
2.1 Case-based notification data: what they are and why are they important	50
2.2 Developing an analytic plan	52
2.3 Preparing the dataset	53
2.4 Data analysis: conducting and interpreting descriptive analyses	62
2.5 Data analysis: conducting and interpreting more complex analyses	71
2.6 Communicating findings	73
2.7 Conclusion	75
References	76
Annex 2 Analytic plan example	77
Annex 3 Example of multivariable analysis to assess risk factors for loss to follow-up	80

Chapter 3

Using genotyping data for outbreak investigations	83
3.1 Genotyping data: an overview	84
3.2 Preparation of data	86
3.3 Analysing outbreaks	88
3.4 Analysing large clusters	98
3.5 Limitations of genotyping data	103
3.6 Special considerations for genotyping in high TB burden settings	104
3.7 Conclusion: using genotyping data for public health	106
References	107

Chapter 4

Analysis of factors driving the TB epidemic	109
4.1 Ecological analysis	110
4.2 TB incidence	110
4.3 Using ecological analysis to understand TB epidemics	112
4.4 Conceptual framework for ecological analysis	114
4.5 Preparing your data for analysis	116
4.6 Case studies	117
4.7 Conclusion	120
References	121
Annex 4 Which types of data should be investigated as part of TB ecological analyses?	122
Annex 5 Detailed conceptual framework on how factors influence TB burden	130

Chapter 5

Drug-resistant TB: analysis of burden and response	131
5.1 Methodology	132
5.2 Estimation of the burden of drug-resistant TB and time analysis	139
5.3 Monitoring programme effectiveness	141
5.4 Conclusion	165
References	166

Chapter 6

HIV-associated TB: analysis of burden and response **169**

6.1	Introduction to HIV-associated TB	170
6.2	Analysis of programme data	170
	References	181

Chapter 7

Estimating TB mortality using vital registration and mortality survey data **183**

7.1	Sources of mortality data	184
7.2	Monitoring TB mortality among HIV-negative individuals	186
7.3	Monitoring TB mortality among people living with HIV	190
7.4	Mortality to notification ratio	192
7.5	MDR-TB mortality	192
	References	194

Chapter 8

Combining surveillance and survey data to estimate TB burden **195**

8.1	TB incidence	196
8.2	TB prevalence	199
8.3	TB mortality and case fatality ratio	201
	References	204

Epilogue **205**

Acknowledgements

This handbook, *Understanding and using tuberculosis data*, was developed as part of the work of the World Health Organization (WHO) Global Task Force on TB Impact Measurement. Strengthening of TB surveillance is one of the Task Force's three major strategic areas of work. The development of the document took place between 2012 and 2014, and it is hoped that it will provide a foundation for critically reviewing, understanding and systematically using TB surveillance data in countries throughout the world.

The handbook was developed by a core writing team of: Laura Anderson (Public Health England, UK), Lori Armstrong (Centers for Disease Control and Prevention, USA), Emily Bloss (Centers for Disease Control and Prevention, USA), Anna Dean (WHO headquarters), Julia Ershova (Centers for Disease Control and Prevention, USA), Dennis Falzon (WHO headquarters), Philippe Glaziou (WHO headquarters), Susan van den Hof (KNCV Tuberculosis Foundation, the Netherlands), Irwin Law (WHO headquarters), Ellen Mitchell (KNCV Tuberculosis Foundation, the Netherlands), Ikushi Onozaki (WHO headquarters), Charalambos Sismanidis (WHO headquarters), Deanna Tollefson (Centers for Disease Control and Prevention, USA), Rachel Yelk Woodruff (Centers for Disease Control and Prevention, USA) and Matteo Zignol (WHO headquarters). The group was led and coordinated by Philippe Glaziou and Charalambos Sismanidis. Overall guidance was provided by the Coordinator of the Global TB Programme's Monitoring and Evaluation team, Katherine Floyd.

The development of the handbook benefited from the inputs of others. The core team
