Requests for permission to reproduce or translate WHO publications –whether for sale or for non-commercial distribution– should be addressed to WHO Press through the WHO web site (www.who.int/about/licensing/copyright_form/en/index.html).

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted lines on maps represent approximate border lines for which there may not yet be full agreement.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by the World Health Organization in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

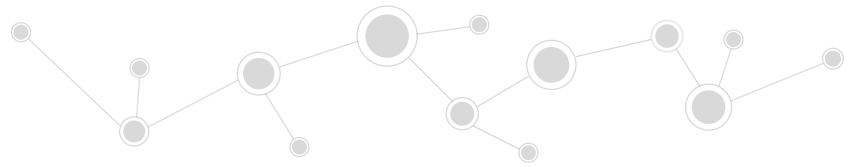

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. In no event shall the World Health Organization be liable for damages arising from its use.

● Acknowledgements

This manual is a collaborative effort between the World Health Organization (WHO), the National Center on Birth Defects and Developmental Disabilities from the US Centers for Disease Control and Prevention (CDC) and the International Clearinghouse for Birth Defects Surveillance and Research (ICBDSR).

We would like to acknowledge the technical input in the preparation of this manual of staff from CDC's National Center on Birth Defects and Developmental Disabilities (NCBDDD), ICBDSR and WHO, particularly, from the following individuals (in alphabetical order): Dr Jose Fernando Arena, Dr Alejandro Azofeifa, Dr Robert J Berry, Dr Marie Noel Brune Drisse, Dr Jan Ties Boerma, Dr Lorenzo Botto, Dr Luz Maria De-Regil, Ms Alina Flores, Dr Jaime Frías, Dr Melba Filimina Gomes, Dr Margaret Davis, Dr Margaret Honein, Dr Elizabeth Mary Mason, Dr Pierpaolo Mastroiacovo, Dr Mario Merialdi, Dr Cynthia Moore, Dr Joseph Mulinare, Dr Maria Neira, Dr Juan Pablo Peña-Rosas, Dr Vladimir B Poznyak, Dr Francoise Renaud, Dr Jorge Rosenthal, Dr Csaba Siffel, Dr Joseph Sniezek, Dr Gretchen Stevens, Dr Marleen Temmerman, Ms Diana Valencia and Dr Severin Von Xylander.

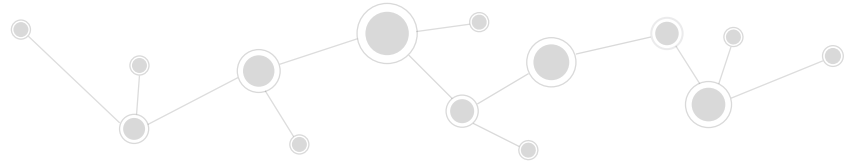

The drawings in Chapter 4 and the working logic model in Appendix D were all supplied by CDC/NCBDDD.

We would also like to thank Dr Rajesh Mehta and Dr. Neena Raina from the WHO Regional Office for South-East Asia and the US National Birth Defects Prevention Network, for providing valuable feedback during the development process.

WHO, CDC and ICBDSR gratefully acknowledge the technical input of the meeting participants for the global and regional training on surveillance of birth defects.

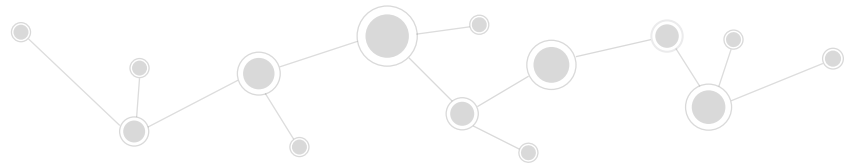

● Financial support

WHO thanks the US CDC, especially the National Center on Birth Defects and Developmental Disabilities, for providing financial support for the publication of this manual as part of the cooperative agreement 5 E11 DP002196, *Global prevention of non-communicable diseases and promotion of health*.

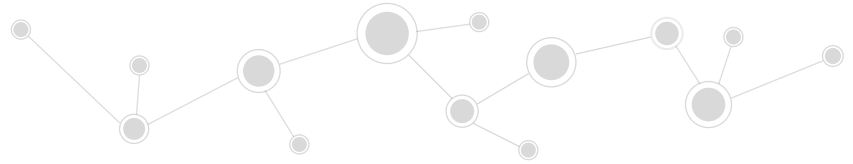

Contents

Abbreviations	vi
Objectives of the manual	1
1. Surveillance of congenital anomalies	2
Introduction	2
The purpose of congenital anomalies surveillance	2
Types of surveillance programmes	3
Congenital anomalies: definitions	3
2. Planning activities and tools	6
Logic models	6
Partners and funding	9
Legislation	10
Privacy and confidentiality issues	10
Data dissemination	11
Communicating with parents	12
3. Approaches to surveillance	13
Population coverage	13
Case ascertainment	18
Case finding	20
Case inclusion	21
Description formats for congenital anomalies	22
Age of inclusion	23
Inclusion of pregnancy outcomes	24
Coding system	27
Potential inclusion/exclusion criteria	27
Examples of inclusion criteria for population-based surveillance	27
Examples of inclusion criteria for hospital-based surveillance	28
Examples of exclusion criteria for both population- and hospital-based surveillance	29
Core ascertainment variables	30
Data-collection methods and tools	32
Data management and protocols	34
Data collection and management	36

4. Diagnosing and coding congenital anomalies	40
Initial list of congenital anomalies to consider for monitoring	40
Congenital malformations of the nervous system	42
Cleft lip and cleft palate	52
Congenital malformations of genital organs	56
Congenital malformations and deformations of the musculoskeletal system	58
5. Coding	68
Coding of congenital anomalies	68
International Classification of Diseases	68
Personnel responsible for diagnosing and coding	70
Effect of the certainty of diagnosis on coding	70
Coding multiple congenital anomalies	70
Use of codes for surveillance, data analysis and presentation	71
References	74
Glossary of terms	77
Appendix A. Suggested initial list of congenital anomalies to consider for monitoring and relevant ICD-10 codes	88
Appendix B. External minor congenital anomalies	89
Appendix C. Causes of congenital anomalies and classification according to developmental mechanism and clinical presentation	97
Appendix D. Sample logic model	100
Appendix E. Worksheet for capacity development	102
Appendix F. Suggestions for delivering the news of a congenital anomaly diagnosis to a family	103
Appendix G. Sample abstraction form	104
Appendix H. Potential core variables	106
Appendix I. Potential optional variables	110
Appendix J. Suggestions for taking photographs of a fetus or neonate with a congenital anomaly	112
Appendix K. Prevalence of selected anomalies by surveillance programme during 2004–2008	113
