TABLE OF CONTENTS

ACRONYMS 1

ACKNOWLEDGEMENTS 2

FOREWORD 3

EXECUTIVE SUMMARY 4

PART 1: HOW THE USE OF ICT IS HELPING IMPLEMENT COIA RECOMMENDATIONS 6

FINDINGS ON RECOMMENDATION 1 :
Health monitoring and surveillance 11

FINDINGS ON RECOMMENDATION 1 :
Systems for the registration of vital events 13

FINDINGS ON RECOMMENDATION 2 :
Systems for monitoring RMNCH indicators 15

FINDINGS ON RECOMMENDATION 3 :
National electronic health information systems 20

FINDINGS ON RECOMMENDATION 4 :
Status of resource tracking systems 21

PART 2: ADVANCES IN THE DEVELOPMENT OF NATIONAL EHEALTH STRATEGIES AND PROGRAMMES SUPPORTING WOMEN'S AND CHILDREN'S HEALTH 24

National eHealth strategies 27

eHealth for women and children 30

Types of eHealth initiatives supporting women's and children's health 32

Providing access to information for citizens and health-care professionals 36

Enabling eHealth programmes 40

Training 40

Online safety for children 43

Privacy 45

Addressing the challenges of implementing eHealth services 49

CONCLUSIONS AND RECOMMENDATIONS 51

NRHM	National Rural Health Mission
PCR	Polymerase Chain Reaction process
PNC	Postnatal Care
RCH	Reproductive and Child Health
RMCH	Reproductive, Maternal, and Child Health
RMNCH	Reproductive, Maternal, Neonatal, and Child Health
SMS	Short Messaging Service
SNOMED	Systematized Nomenclature of Medicine
SRS	Sample Registration System
UNFPA	United Nations Population Fund
UNICEF	United Nations Children's Fund
UP	Uttar Pradesh
USAID	United States Agency for International Development
WHO	World Health Organization
ZCHARD	Zambia Centre for Applied Health Research and Development
ZPCT	Zambia Prevention Care & Treatment Partnership

ACKNOWLEDGEMENTS

This publication is based on a WHO/ITU joint survey that explored the use of eHealth for women's and children's health in countries that are covered by the Commission on Information and Accountability for Women's and Children's Health (CoIA). It was conducted by the World Health Organization (WHO) and the International Telecommunication Union (ITU) through the WHO Global Observatory on eHealth (GOe). Experts in 64 responding countries helped shape this report by sharing their knowledge and completing the survey. We wish to acknowledge the special effort made by Bangladesh contributors in piloting the survey and providing valuable feedback before its launch.

Authors and reviewers who contributed to this publication include: Peter Drury, Lilia Perez-Chavolla, Misha Kay, Jo Wood, and Daphne Liu. Data processing and visualization were performed by Mohamed Nour, seconded from the WHO Eastern Mediterranean Regional Office to support this project. The text was reviewed by Najeeb Al Shorbaji, Joan Dzenowagis, Frederik Kristensen, Jessie Schutt-Aine-Madkaud, and Diana Zandi.

WHO regional focal points including Jyotsna Chikersal, Hani Farouk, Clayton Hamilton, Mark Landry, David Novillo, and Miguel Peixoto encouraged the CoIA countries in their regions to participate. In addition, Rosemary Byanyima and Rodolfo Soares provided support to countries, especially in the African Region.

Country case studies were developed with the support of Aditi Dayal, from OneWorld International Foundation, for India; Erica Kochi and Lastone Chitembo, from UNICEF, for Zambia; and Richard Gakuba, National eHealth Coordinator, and Erick Gaju, of the Ministry of Health, for Rwanda.

The design and layout of this publication were managed by Jillian Reichenbach Ott, of Genève Design. Misha Kay and Hani Eskandar, of WHO and ITU respectively, jointly managed this project, coordinating the work for the two organizations. The final draft was edited by Thomson Prentice.
